

# DOCUMENTATION

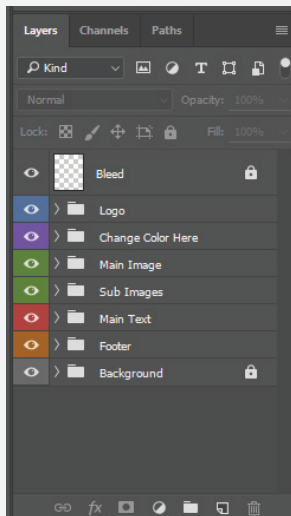

## HOW TO USE THE TEMPLATE

### USING THE FILES:

The Source file of this Composition is Photoshop format (.PSD), it is fully compatible with lower CS5 Version. The file can be located at folder named "Main" with file extension .PSD. To start with and before opening the file (PSD) and continue editing, you must **first DOWNLOAD AND INSTALL the FONTS** used in the composition, most of them are free to use

All links are located at  
**Resources.txt**

### USING THE LAYERS:

The file is fully layered, for your convenience the layers are grouped and well organized at their respected folders according to their Functionality.

To make it easier for you to locate the files the color Labels are also provided.

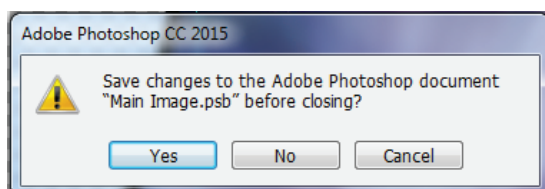

*Figure\_01*

*The image in figure\_01 is an example image layer only, layer name, colors, folder name may vary from one template to another.*

*Figure\_01*

### USING THE LAYERS:

To start editing, please Double click the text layer inside folder and replace with your desired content. Sometimes you may see layers in smart object and opens into another document when double clicked. there you may edit the content and click save\_ (Smart objects can be found in different layers particularly in text and image layers that needs most of the replacement)

*figure\_02:*

*The image In figure\_02 is an example Image layer only, layer name, colors, folder name may vary from one template to another.*
