

CITYTURTLES PRESETS

LIGHTROOM INSTALLATION GUIDE

THANK YOU

I'd like to thank you wholeheartedly for purchasing my presets. By purchasing these presets you are also supporting my efforts and my work, and I cannot thank you enough for that.

All of my presets are handmade from scratch and designed to be versatile to be used on both indoor photos and outdoor photos. I wanted to create a set of presets that work well on all types of photography. You can use these on your portrait, wedding, engagement, family, lifestyle, travel, and animal images.

This pack also comes with an additional tool kit that I personally use to help speed up workflow. They are created to only change one specific adjustment (grain, sharpness, exposure, etc) if you are in a hurry to edit. I also included how to install the presets on your desktop and on your phone in this user guide to help you properly use them.

I like to provide numerous materials in all of my preset packs to give you the ultimate editing kit. I don't want to leave you alone figuring out how to use the presets when there is so much potential.

With that said, I can't wait for you to try these out on your photos!

HOW TO INSTALL

First Method (for older versions of LR)

1. Download the zip file from Etsy. Unzip the file and open Lightroom.
2. Go to **Presets** located on the left side panel and create a new preset folder titled CITYTURTLES PRESETS.
3. Right click on the folder and select **Import**.
4. Import all of the presets from the folders.
5. **HAVE FUN!**

Second Method (for version 7.5 and newer)

1. Unzip the file and open Lightroom.
2. Go to **File > Import Develop Profiles and Presets**.
3. **Import** the .lrtemplate file desktop presets.
4. Restart Lightroom application if needed.

INSTALLING MOBILE PRESETS

1. On your desktop, download the zip file from Etsy and unzip it.
2. Double click on the main preset folder then double click on the mobile presets folder.
3. **Select** all the DNGs > **AirDrop** them to your iPhone. If you have an android, you can email them to yourself.

[Send me a message to email you the DNG files if you don't have a computer.](#)

After airdropping, the DNGs should be in your camera roll. They will appear as a blank photo which is completely normal since phones can't preview DNGs. You will be able to see the presets once you upload them to Lightroom. If you emailed the presets, you would have to save them to your camera roll.

4. Download the Lightroom CC Mobile App and create a free account if you haven't already. Open the app.
5. **Upload** the presets the same way you upload photos. Hold down on a preset and press select to quickly select all of them. Click **Add Photos**. When the DNGs have finished uploading, your presets are now ready for use!

Optional: Create an album called CityTurtles Presets and import all of the presets into the album so it can be organized and you can find them again easily.

USING MOBILE PRESETS

☆☆ PREFERRED METHOD ☆☆

1. Upload the photo(s) you want to edit.
2. Choose a preset you want to use and open it.
3. Click ⋮ on the top right corner of the screen. Here you will see a pop-up menu with different options. Click **Create Preset** and make sure Profile, Light, Color, Effects, and Detail is checked. Name the Preset then select where you want it to be saved. **User Presets** is fine. Press ✓. Repeat until you have saved all the presets to your Lightroom app.
4. Go to your photo and scroll left on the tools panel until you see **Presets**. This will open up all of the preset groups. Go to the group where you saved the presets. Choose the one you want to use then click ✓.

☾ COPY & PASTE METHOD ☾

1. Upload the photo(s) you want to edit.
2. Choose a preset you want to use and open it. It should be easy to tell which are presets as it will display 'DNG' on it. Make sure you're in Edit Mode.
3. Click ⋮ on the top right corner of the screen. Here you will see a pop-up menu with different options. Click **Copy Settings** and make sure every adjustment is checked except Crop and Spot Removal. Press **OK**.
4. Go to your photo, click (⋮), then press **Paste Settings**. You've successfully applied the preset to your photo! Feel free to adjust exposure, contrast and other tools to better suit your image. Happy editing!

Hey there! You've reached the end of the guide. I really hope you find this helpful in learning how to use your new presets. If you're happy with your purchase please let me know by leaving a positive review, I will appreciate your feedback!

If you have any questions or concerns, send a message to my email brittneyw611@me.com and I will get back to you as quickly as possible.

CREATED WITH LOVE AND INTENT.
