

Hi there! My name is Riopurba. And I want to say thank you for purchasing **Pencil Drawing Photoshop Action.**

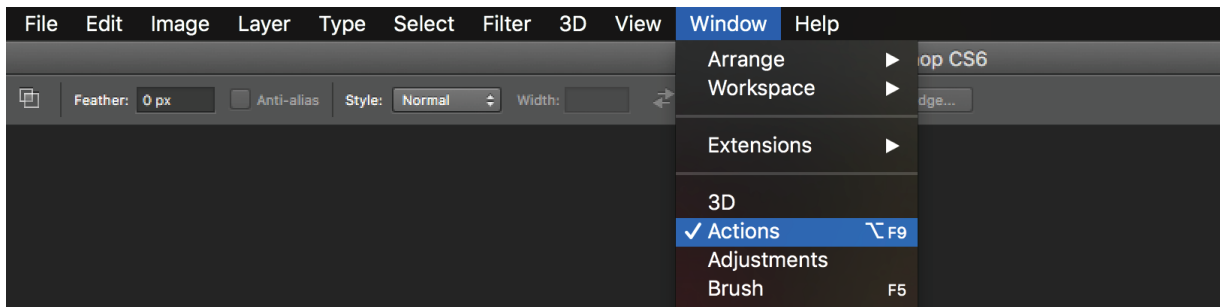

This action lets you to instantly create a pencil drawing sketches from your photos in Adobe Photoshop within 5 seconds! I promise you it just takes seconds.

In this ReadMe file I provide you the step by step tutorial how to use this Photoshop action. Please if you have any issue or porblem, please contact me via email to rio.andrew77@gmail.com . I will gladly help you.

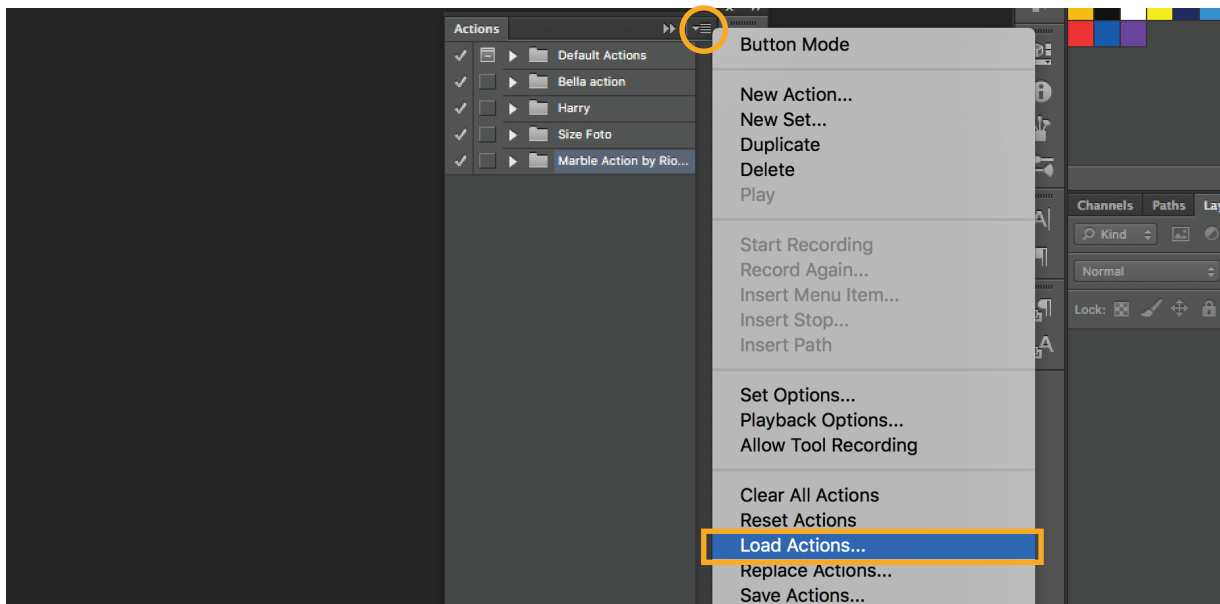

Best Regards,
Riopurba

How to install the Pencil Drawing action in your Photoshop?

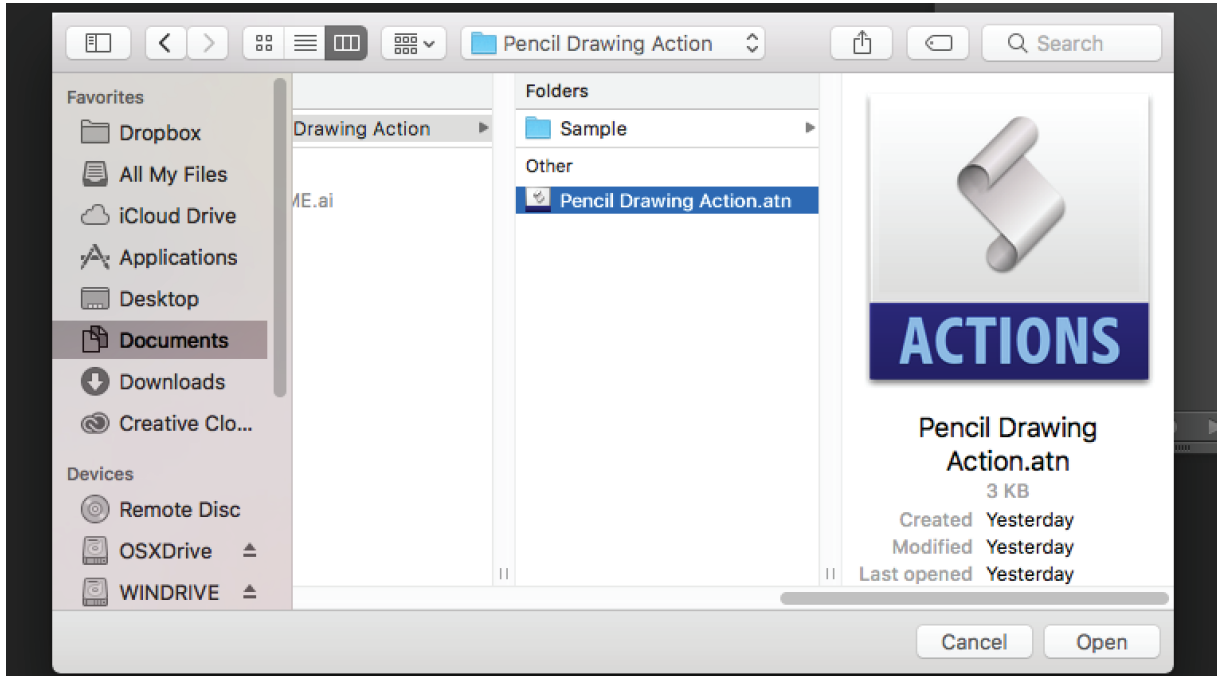

1. First you need to open Adobe Photoshop
2. Next, click menu **Window > Actions** to open the Actions palette.
Please see the image below.

3. Then the Actions palette will be opened in your Adobe Photoshop
4. Next, please **click on the icon**  **on the corner of the Actions palette.** More submenus will be appeared.
Please choose the **Load Actions**.

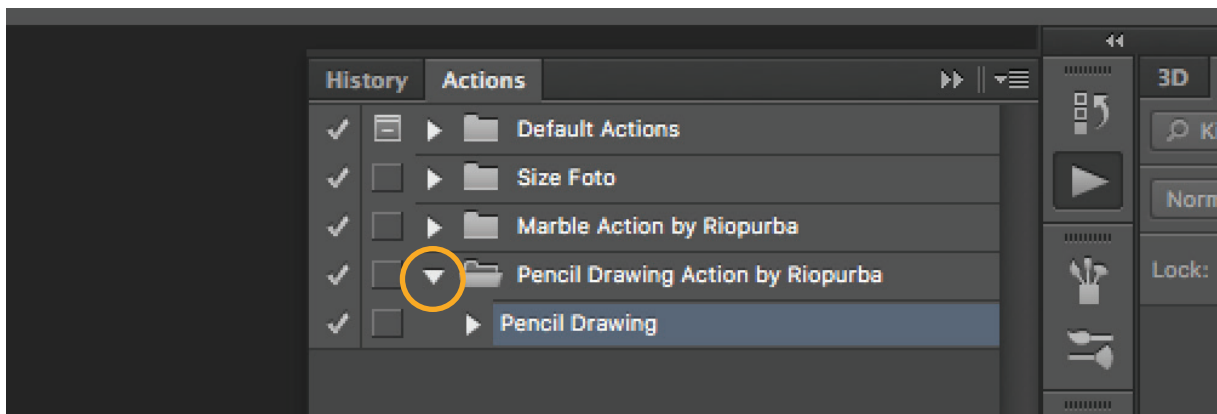

5. A popup window will be opened
6. Please find the action folder and select the **Pencil Drawing Action.atn** , then click **Open button**

7. If you did the right steps just like what I did, then you will see a new actions will be appeared on the Actions pallet. It's **Marble Action by Riopurba**

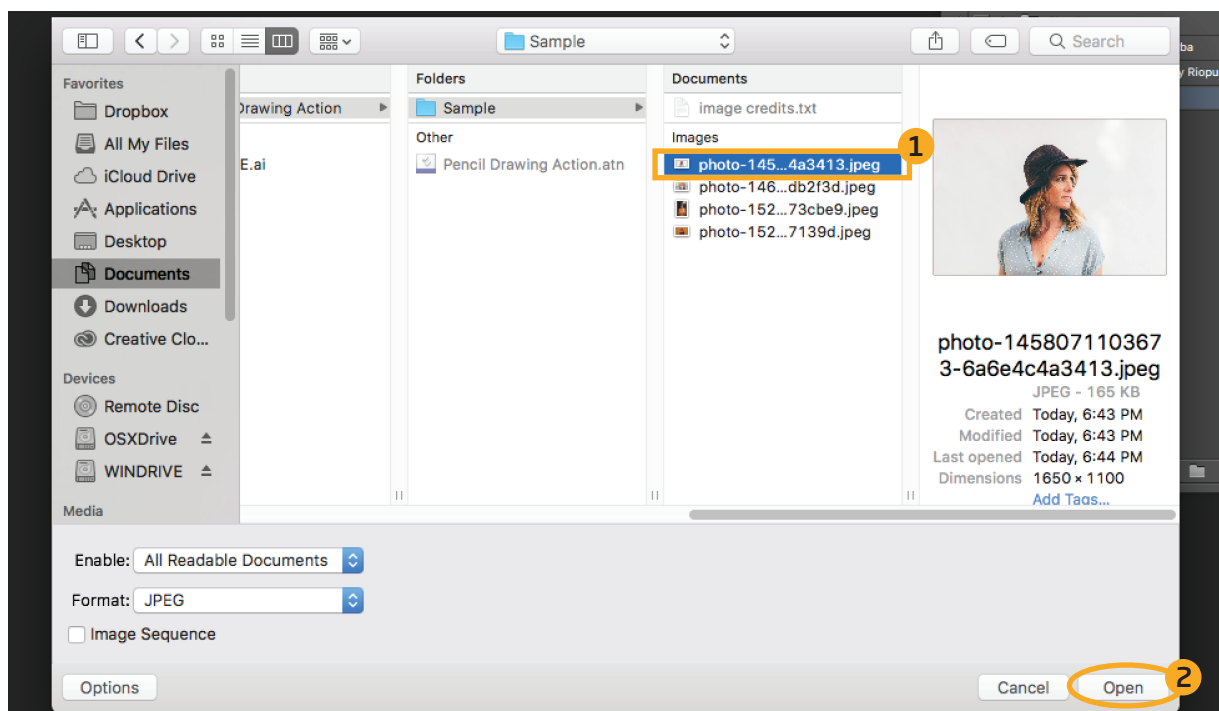

8. You can click on the arrow icon there to expand the Actions folder.

9. Done!

How to Use the Pencil Drawing Action in Adobe Photoshop?

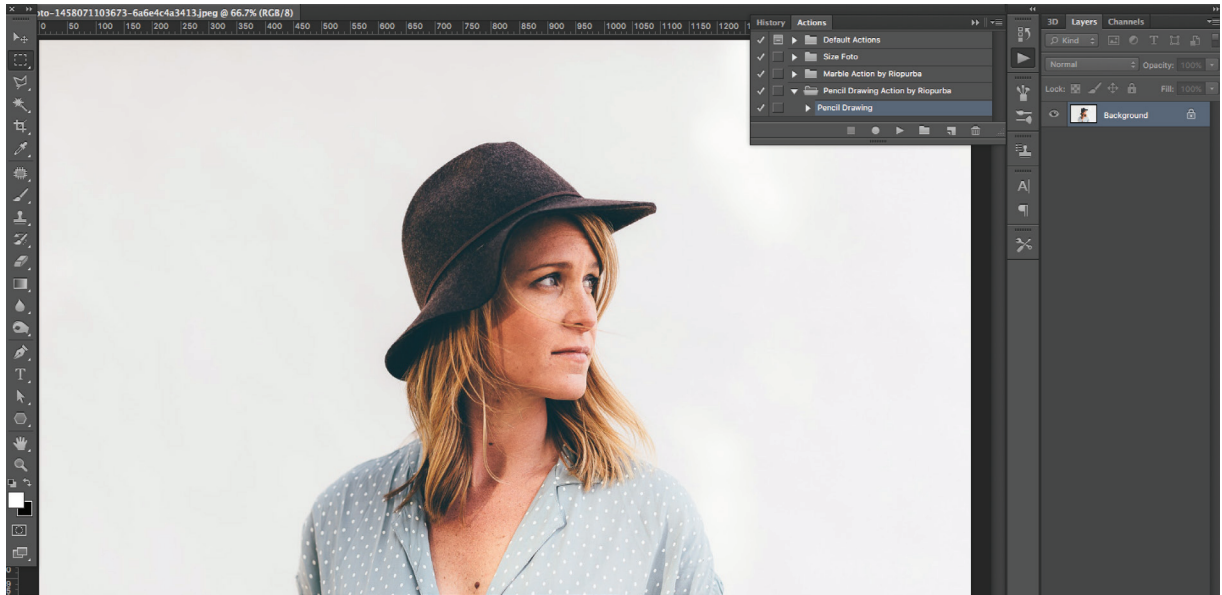

1. First, make sure you have already installed the action. Read this tutorial page 2-3.
2. Open your Adobe Photoshop
3. **Click File > Open** to open your photo/image or you can just hit CTRL + O (win) or CMD + O (mac) on your keyboard.
4. A new popup window will be opened. Find and select your photo. Then **hit Open button**. Just like I did in the image below.

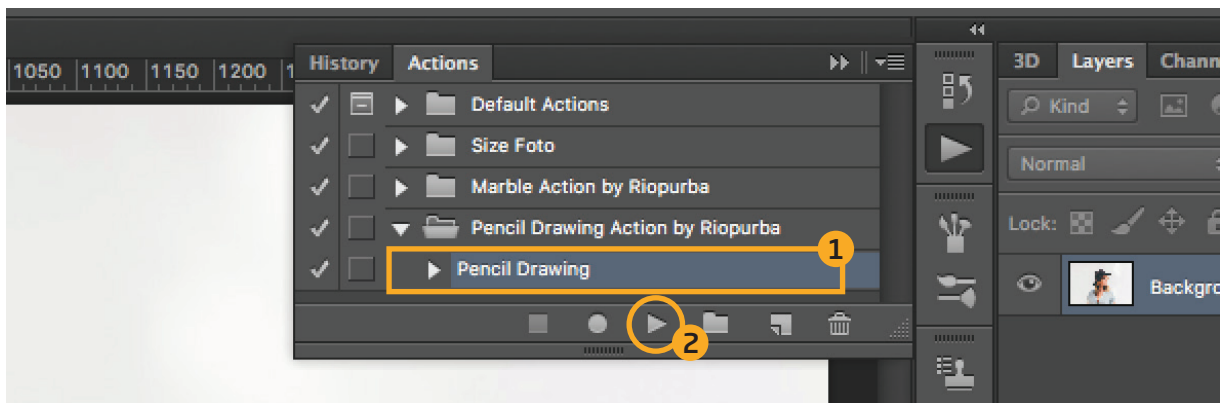

5. Your photo will be opened. Next open the Actions palette by clicking the menu **Window > Actions**. *Ignore this step if your Actions palette is already opened.*

6. Your artboard will look like this.

7. Go to the Action Pallette. Make sure the Pencil Drawing action is selected, then hit the Play button.

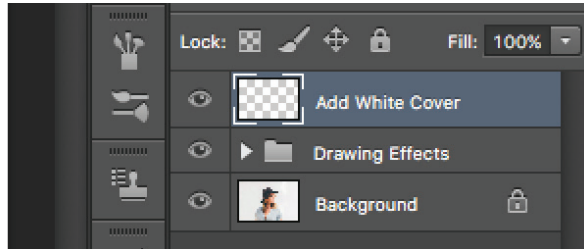

8. Bingo! It's done

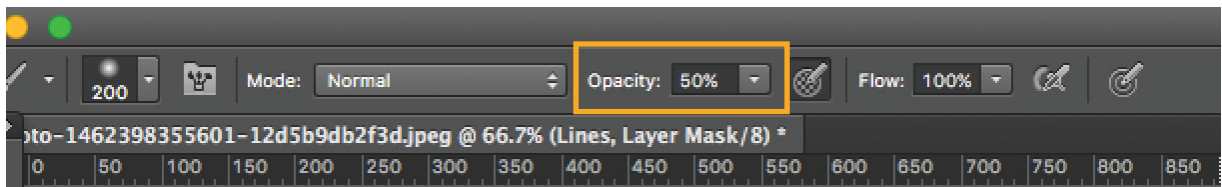

How to Remove Some Parts on Image?

1. First Select the **Add White Cover** layer.

2. Then activate the **Brush Tool**.  By click it on the Tool Box, or just **hit B** on your keyboard. Then set the Brush Opacity to be 50%

3. Make sure your foreground is White 

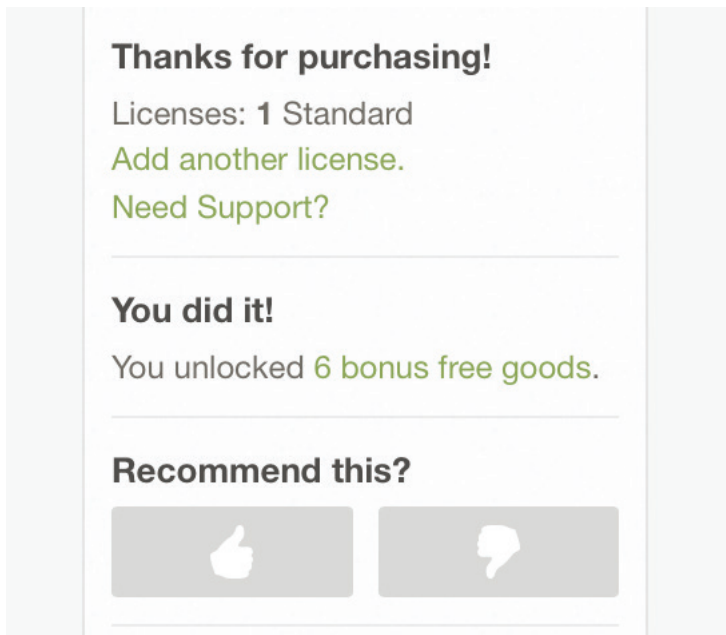

4. Then brush on the part of your image where you want to hide or remove. Like the image below.

Okay guys. That's all the information you need to use this Marble Texture generator. Pretty easy, right?

Recommend this product?

If you found my product is useful and pretty easy to use, please do recommend my product. I will be very happy for that :)

Best Regards, Riopurba.

How to Make the Sketch Drawing More Detail?

1. Sometime this action can generate too much drawing effects. But you don't have to be worried. You only need to remove or decrease the sketch effects a little bit. Please follow the steps below.
2. Go to Layer Pallete, and select the Layer Mask thumbnail of Sketch Effects layer. Look at the image below.

3. **Activate the Brush Tool** by pressing B on your keyboard.

4. Make sure your foreground is Black

5. Brush on the parts where you want to remove or decrease the sketch effect. For example, I want to brush it on the eyes part.

6. You can see the Below and After version below.
