Hi, I am Trying to solve photo attachment issue shortly
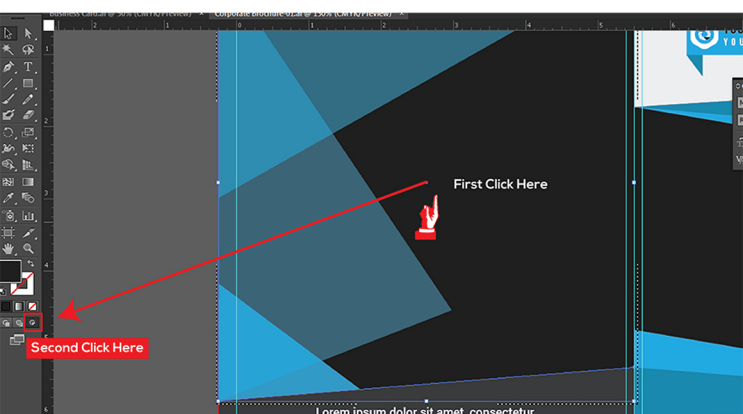

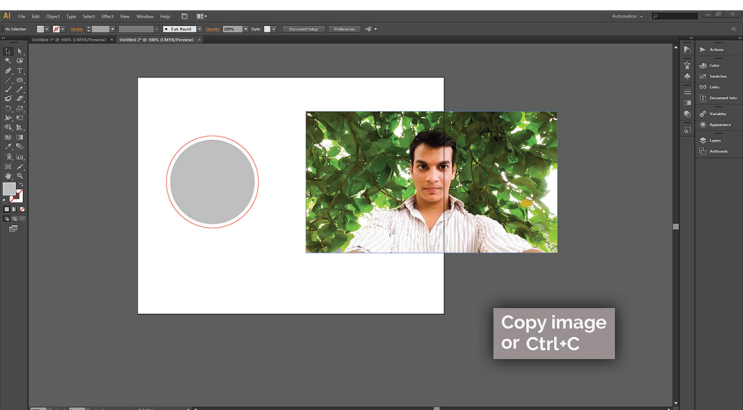

At first **Copy** your **image** by clicking **Ctrl+C** and then click on **Photo's shape** where **used image** on actual **view**. After clicking **Photo's shape** then click on the **Red Mark** area then press **Ctrl+v** # Done 🙂

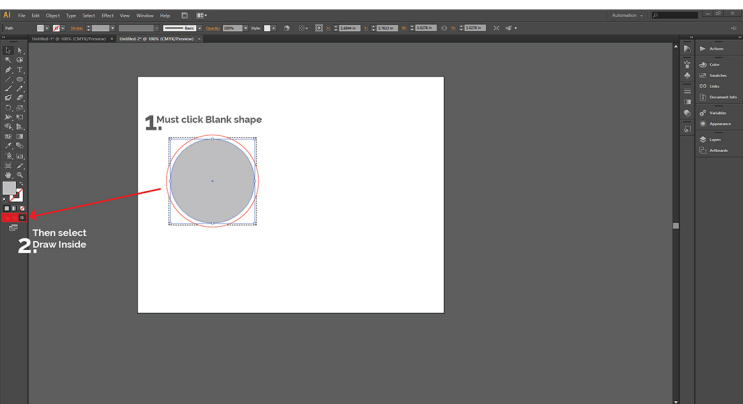

This Tutorial can be applied on Adobe illustrator

01. **Copy** Your image or press **Ctrl+C** on windows

02. **Click on blank shape** where your image should take place in the preview

03. Press **Draw inside** option(showed in the image)

04. **Paste** your image or **Ctrl+v** On windows

05. For **resize** image just drag **round shape** of image that showed in the **screenshot**
