

HELP FILE

Hello!

Million thanks for purchasign Lightroom preset! :)

Here is a quick guide of using new presets.

01. Open Lightroom and open a photo you need to edit.

02. Find a tab "File" in the left of a top menu bar and choose "Import Profiles & Presets..." and choose Deepy Moody Teal preset.

03. In the right corner in the bottom, under the panel with general photo correction list, find a button "Presets" and then choose Moody Teal preset.

That's all! Enjoy the magic.

Tag #katebuke or @kate.buke on your shots in Instagram and get a **free moody preset.**

Moody Teal preset is for sky shots, streets and landscapes, nature details and architecture.
