

THE 5 STEPS GUIDE HOW TO IMPORT AND USE

KIIN

LIGHTROOM PRESETS IN ADOBE LIGHTROOM APP FOR MOBILE PHONES (to use without lightroom desktop)

First of all , thank you for youre purchase!
I`m so grateful for the continuous support and I`m confident that
these presets will help you take your images to the next level!

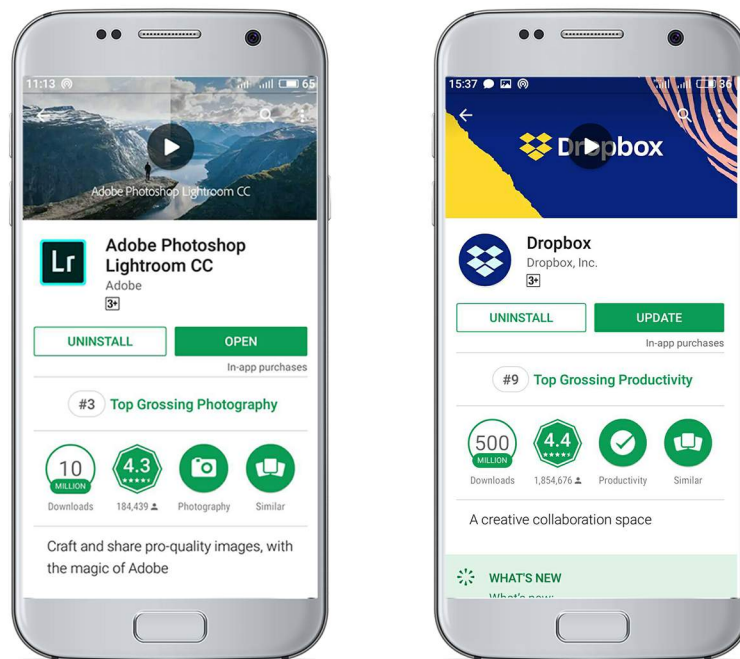

Let`s start ...

STEP 1

To start off , you're going to need to download the Lightroom CC App and DROPBOX app from the mobile App Store or Play Market.

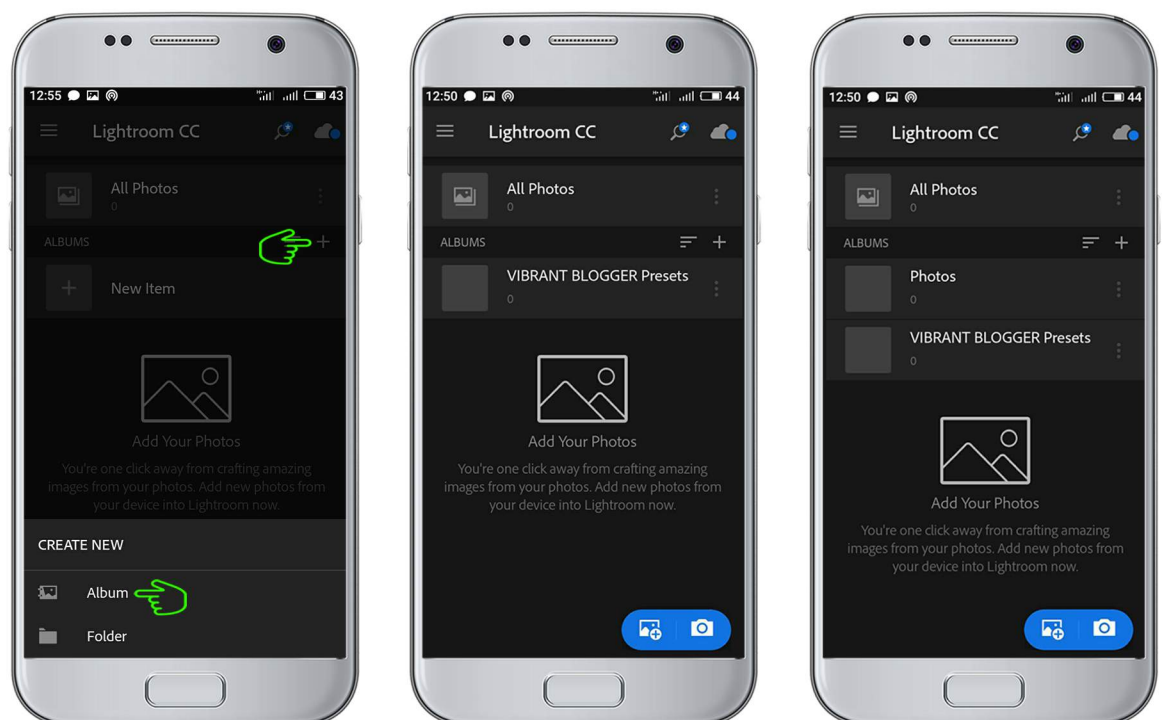

Once downloaded, you will then need to create an account.

This is quick and free to do for both the app.

STEP 2

Now open the Lightroom app , press “+” on the top right , next press “Album”. Create 2 albums, one called “Photos” and one called “VIBRANT Presets”.

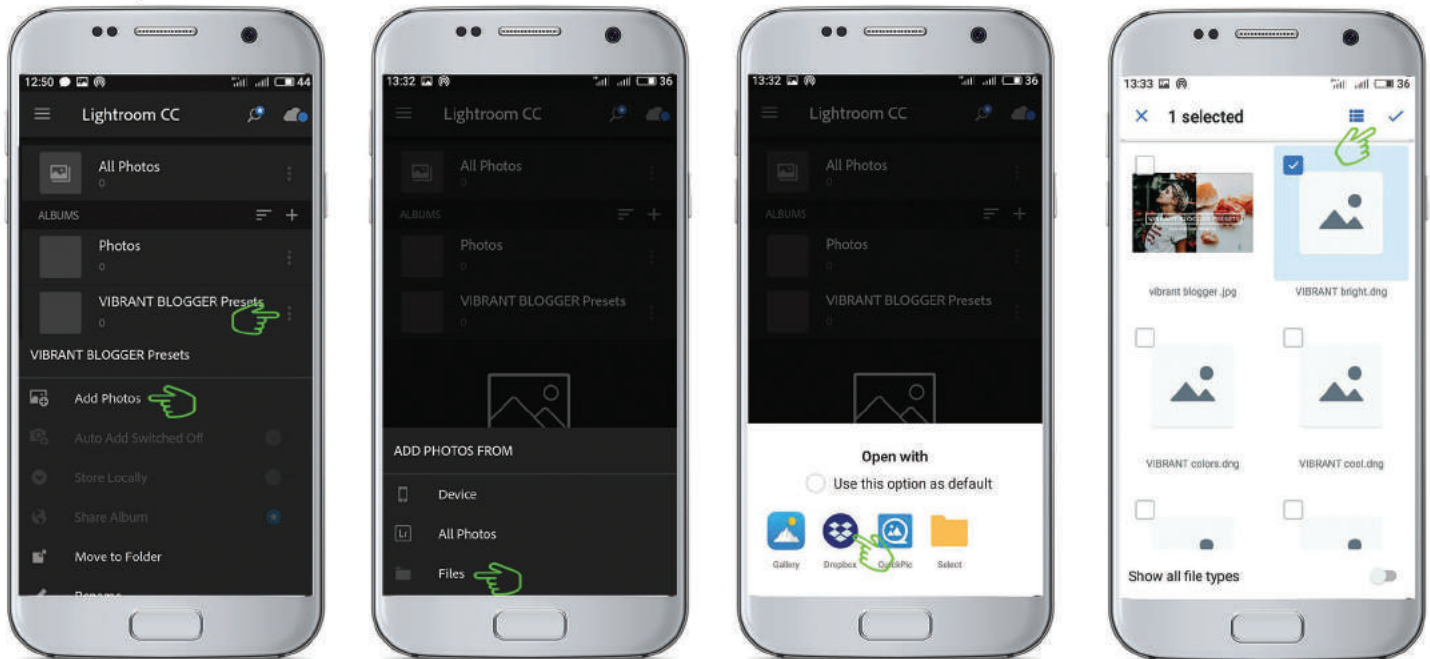

STEP 3

Before doing this step, add the downloaded DNG files to your DROPBOX. Choose our DNG preset file . For that Click the 3 dots on the "VIBRANT BLOGGER Preset" folder and click "Add Photos" and select upload from - "Files".

You will be given a choice of files from the DROPBOX application.

Go to the DROPBOX, select the DNG file and click the checkmark.

Cool your file DNG is added to the "VIBRANT BLOGGER Preset" folder.

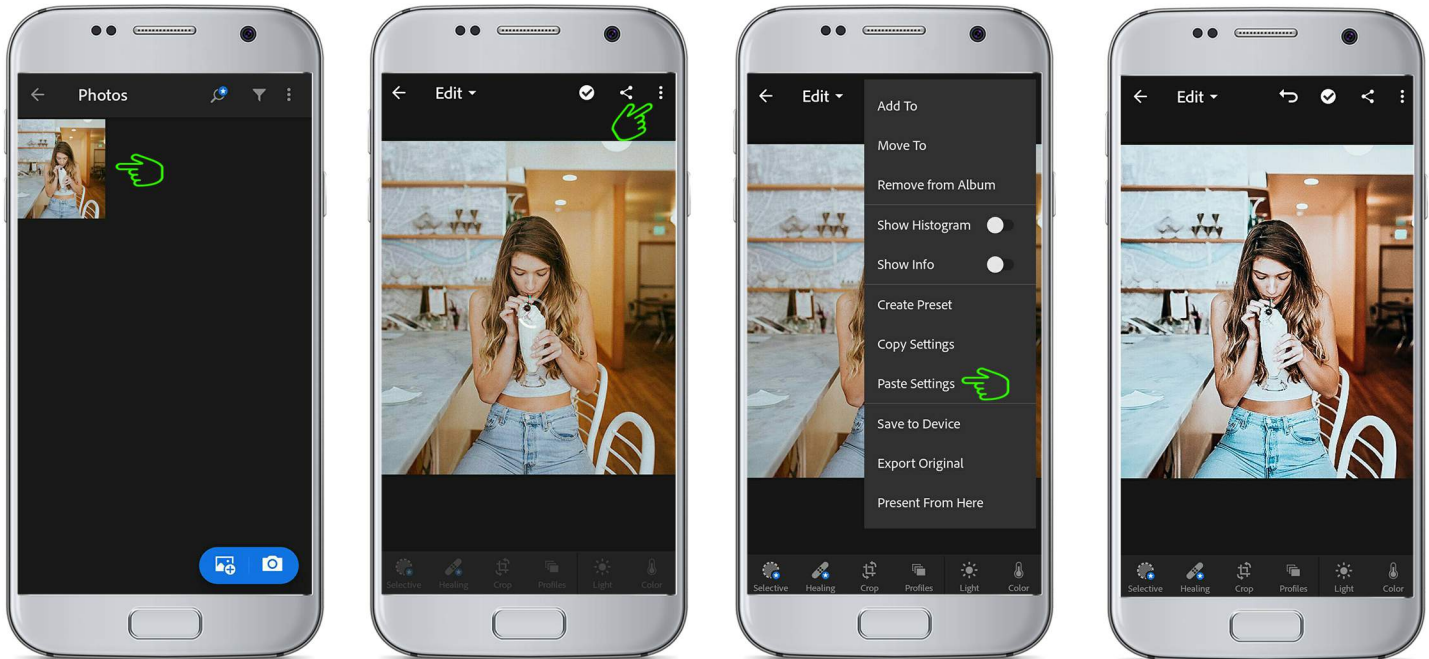

STEP 4

When you did uploaded DNG, click into to the "VIBRANT BLOGGER PRESET" select file preset DNG. Click the 3 dots on the top right and next click "copy settings" next click "OK". Preset settings have been copied.

STEP 5

Go to folder "Photos" and select whichever image you'd like to edit first.
Click on the 3 dots on the top right and then paste settings.
Congratulations! The preset is applied successfully.

QUICK NOTES

In most cases these presets are one-click magic , but please remember that all presets work differently on every image and because every image is different (shot in different light , with another camera settings). You will likely need to tweak the edit after the preset is applied. Presets are meant to be a base to work on of, it's normal to make adjustments after applying a preset.

BACKUP

I'd also like to highly recommend backing our presets up on your laptop or external hard drive because if you accidentally delete or change our preset settings, you'll be able to just re-upload them. Thanks again for buying my Mobile Presets!
If you have any questions please don't hesitate to ask!

TERM OF USE

Feel free to use the presets on photos you're making money for but you're not allowed to share or resell my presets (as is or with adjustments).
