# Actions Guide

Firstly, go to window – Actions.

Click on the little arrow top right – then click on Load actions and find the 30 Actions Bundle file you downloaded.

Once you have loaded the actions open your image. Simply click on any of the actions you want and press the play button at the bottom and it will instantly do

it for you.

To get the sharp effect on some of the actions, simply open the action by clicking the arrow next to it. Find the smart sharpen layer, click on it then press the play button at the bottom and it will sharpen the image.

And its as simple as that. All the layers are there for you to edit and alter as much as you want!.
