

HOW TO LOAD XMP FILE IN PHOTOSHOP?

There is a ways to load xmp files in PS.

- * Go to control panel or press windows + R key, then write control & press enter
- * Click on File explorer options. Then open a File explorer options box.
- * Click on view tab, then check on the "Show hidden files,folders,or drives" option, which is under hidden files and folders. Then click ok.
- * Go to C drive->Users->XYZ->AppData->Roaming->Adobe->Camera Raw->Settings
- * Copy your all XMP files and paste here. Then opens your Adobe Photoshop CC Application.
- * Then go to Filter->Camera Raw Filter or press Ctrl+Shift+k, then click on the preset tab and you will find your desire XMP filter.

Thank you very much
