

## How To Install Lightroom Presets for iOS and Android

### Method 1:

1. Download and Unzip file into your phone/tablet
2. Open Adobe Photoshop Lightroom CC Mobile
3. Click on Settings button (top right corner) and choose Add to button (bottom left corner)
4. Choose the location on your phone where you downloaded and unzipped the .dng files
5. Select and Import filters
6. Select Copy Settings
7. DNG file will install in Lightroom Mobile
8. Find and Open photos you want to edit in LR Library
9. Click on Settings (top right corner)
10. Copy Settings, then click on Select all and unselect Crop setting and click on OK button
11. Choose a photograph you would like to edit Lightroom
12. Again click on Settings button (top right corner)
13. Then Click on the Select Paste Settings
14. Enjoy applied presets
15. You may want to have minor adjustments especially in exposure and contrast.

### Method 2:

1. Do Steps 1-5 above
2. Click on 3 dots (Settings on top right)
3. A Menu will pop up then tap on Create Preset
4. Name the Preset whatever you like then tap on the check mark when done on top right.
5. Now import whatever photos you want to apply the presets on.
6. On the Menu below, swipe until you see "Presets", tap on it.
7. Then you will see Color, Creative, ETC, choose the "USER PRESETS" or wherever group you added your preset before.

8. Then another menu will pop up, you will see your saved presets there. Tap your desired preset to see the result.
9. Enjoy the applied preset!
10. You may want to have minor adjustments especially in exposure and contrast.
