Basic Instructions Lightroom 4,5,6,Cs6,CC

Adobe Lightroom 4, 5, 6 and Classic CC

1. In Lightroom Classic CC, open 'Preferences' and go to the 'Presets' tab.

2. Click on the button 'Show Lightroom Presets Folder'.

3. Double click on the 'Lightroom' folder, then double click on 'Develop Presets' folder.

4. Extract the ZIP file and copy the folder(s) with your presets into the 'Develop Presets' folder.

5. Restart Lightroom and you're done!

Adobe Lightroom CC 2018 V1.3 and newer

1. Extract the ZIP file(s)

2. In Lightroom CC, click on 'Presets' in the bottom right.

3. The 'Presets' panel will open. Click on the 3 little dots near the top of this panel.

4. Select 'Import Presets' or from the dropdown menu.

(If you see 'Open Preset Folder' instead of 'Import Presets', then you are using Lightroom CC version 1.2 and earlier. See instructions below.)

5. Navigate to the extracted preset folder(s) you want to import and select the specific preset folder(s) or drag and drop the folder(s) into the dialog box. Then click 'Import Presets'.

(It's highly recommended to select the preset folders, so that Lightroom will keep the organization structure.)

6. Lightroom will load up the presets and you're ready to use them.

Adobe Lightroom CC V1.2 and earlier

1. Extract the ZIP file(s)

2. In Lightroom CC, click on 'Presets' in the bottom right.

3. The 'Presets' panel will open. Click on the 3 little dots near the top of this panel.

4. Select 'Open Preset Folder' from the dropdown menu.

If you see 'Import Presets' instead of 'Open Preset Folder', then you are using Lightroom CC 2018 version 1.3 and newer. See instructions above.

5. The 'Develop Presers' folder opens up. Copy the folder(s) from the extracted ZIP file into the 'Develop Presers' folder (NOT into the 'User Preset' folder)

6. Restart Lightroom and you're done!
