Hi,

Thank You for purchasing **3D Parallax Photoshop Actions**.

Video tutorial will be available shortly here:

<https://www.youtube.com/channel/UCHLd6bf6Rqrg-DNMJfZntqg/videos>

Please check the following before you play the action:

1. Your photo is the "**Background**" layer. If not, select your photo layer and go to **Layer > New > Background from Layer**.
2. Go to **Image > Mode** and make sure your photo is in the "**RGB Color**", "**8 Bits/Channel**" mode.
3. Your photo is high quality and resolution. For best results use photos that are between **2000 px - 4500 px** high/wide.
4. You are using the **English** version of Photoshop. If you are using another language, you can change the language in this way:

<http://www.youtube.com/watch?v=GJAiu5W2gLE>

After you play the action, you can change the language back to your native language.

How to load the action:

1. Once you start the Photoshop, go to the "**Window**" menu and select "**Actions**" from there.
2. In the "**Actions**" panel, click on the menu icon in the top right-hand corner, choose "**Load Actions**", select the action that came with download and click "**Load**".
3. The action will now appear in the "**Actions**" panel.

How to use the action:

1. Go to **File > Open**, choose your photo and click "**Open**".
2. Go to **Layer > New > Layer** to create a new layer and name it "**brush**".
3. While the "**brush**" layer is selected, choose the "**Brush Tool (B)**", pick a soft brush and brush over your subject as guided in the action preview image. Or make a selection of your subject using any of the Photoshop selection tools and fill it with a color.

4. Open the **"3D Parallax"** action folder, select the **"Set Up"** action and click on **"Play"** button.

Now select any of the **"Subject Animation"** and **"Background Animation"** actions and click on **"Play"** button to animate subject and background. Make sure to open the **"Timeline"** panel by going to **Window > Timeline** so you can play the animation.

If you have played the **"125% Scale - From Center"** animation action for example, and would like to try some other, simply select other animation action (**"150% Scale - From Top Left"** for example) and click on **"Play"** button. The action will remove the previous animation and create a new one.

If you want to invert the animation, select the **"Invert Subject Animation"** or **"Invert Background Animation"** action and click on **"Play"** button. These actions will invert the animation of the subject/background. If you have played the **"125% Scale - From Center"** action for example, the animation will transform subject/background from original size to 125% scale. After running invert action, the animation will transform subject/background from 125% scale to original size. Invert actions will also invert the direction from which the subject/background is being transformed.

Once you are happy with the animation effect, you can select any of the **"Adjustments"** (**"Color Looks"**, **"Contrast"**, **"Brightness"** and **"Vibrance/Saturation"**) actions and click on **"Play"** button.

To save the animation, select one of the **"Export"** (**"Animation"** or **"Video"**) actions and click on **"Play"** button.

Please watch the video tutorial for demonstration of how to use the action and also how to customize the results to get the most out of the effect.

You can check out all photo effect actions here:
