When you open up the template link, **make sure you go to File>-Make a Copy, before starting to edit the templates!** Then go to your "Canva Folders>Shared with you" and delete the template!

This process makes sure you do not edit the original files that other people will also download & you accidently sharing your own designs.
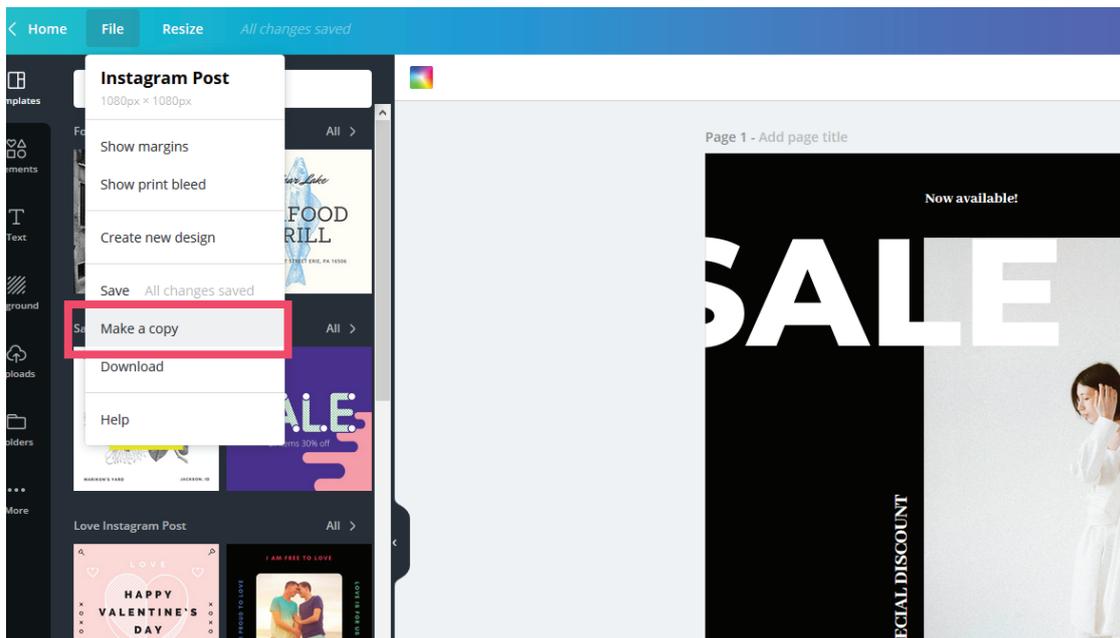

Here is the link to the canva template!
If you need some help with the templates, please send an email to pliiatsdisain@gmail.com and I will fly to the rescue!
