

**Thanks For Purchasing !** this document contains a how to guide and general information to help you get the most out of this product. Look here first for answers to get started .

---

## Project Documentation Help File

This Zip file contains 04 psd files,

There are basically grouped layers, which can be edited separately, for example, reducing the opacity of Shadows and Highlights or changing the colors etc.

This mockup uses smartobject feature of photoshop to give your presentation a Photo realistic look.

The Basic step includes, Double Clicking on the highlighted green smart object layers named "PLACE DESIGN HERE", it will open in a new tab replace the design with your design ,

Save it And enjoy ! its done
