

FX GEOMETRIC DISPERSION

Installation and Use

1. Install The Actionscripts and Patterns

Geometric Dispersion FX.jsx

Copy and Place "Geometric Dispersion FX.jsx" into your Photoshop Scripts Folder which is usually located:

on Pc [C:\Program Files\Adobe\Adobe Photoshop\Presets\Scripts](#)

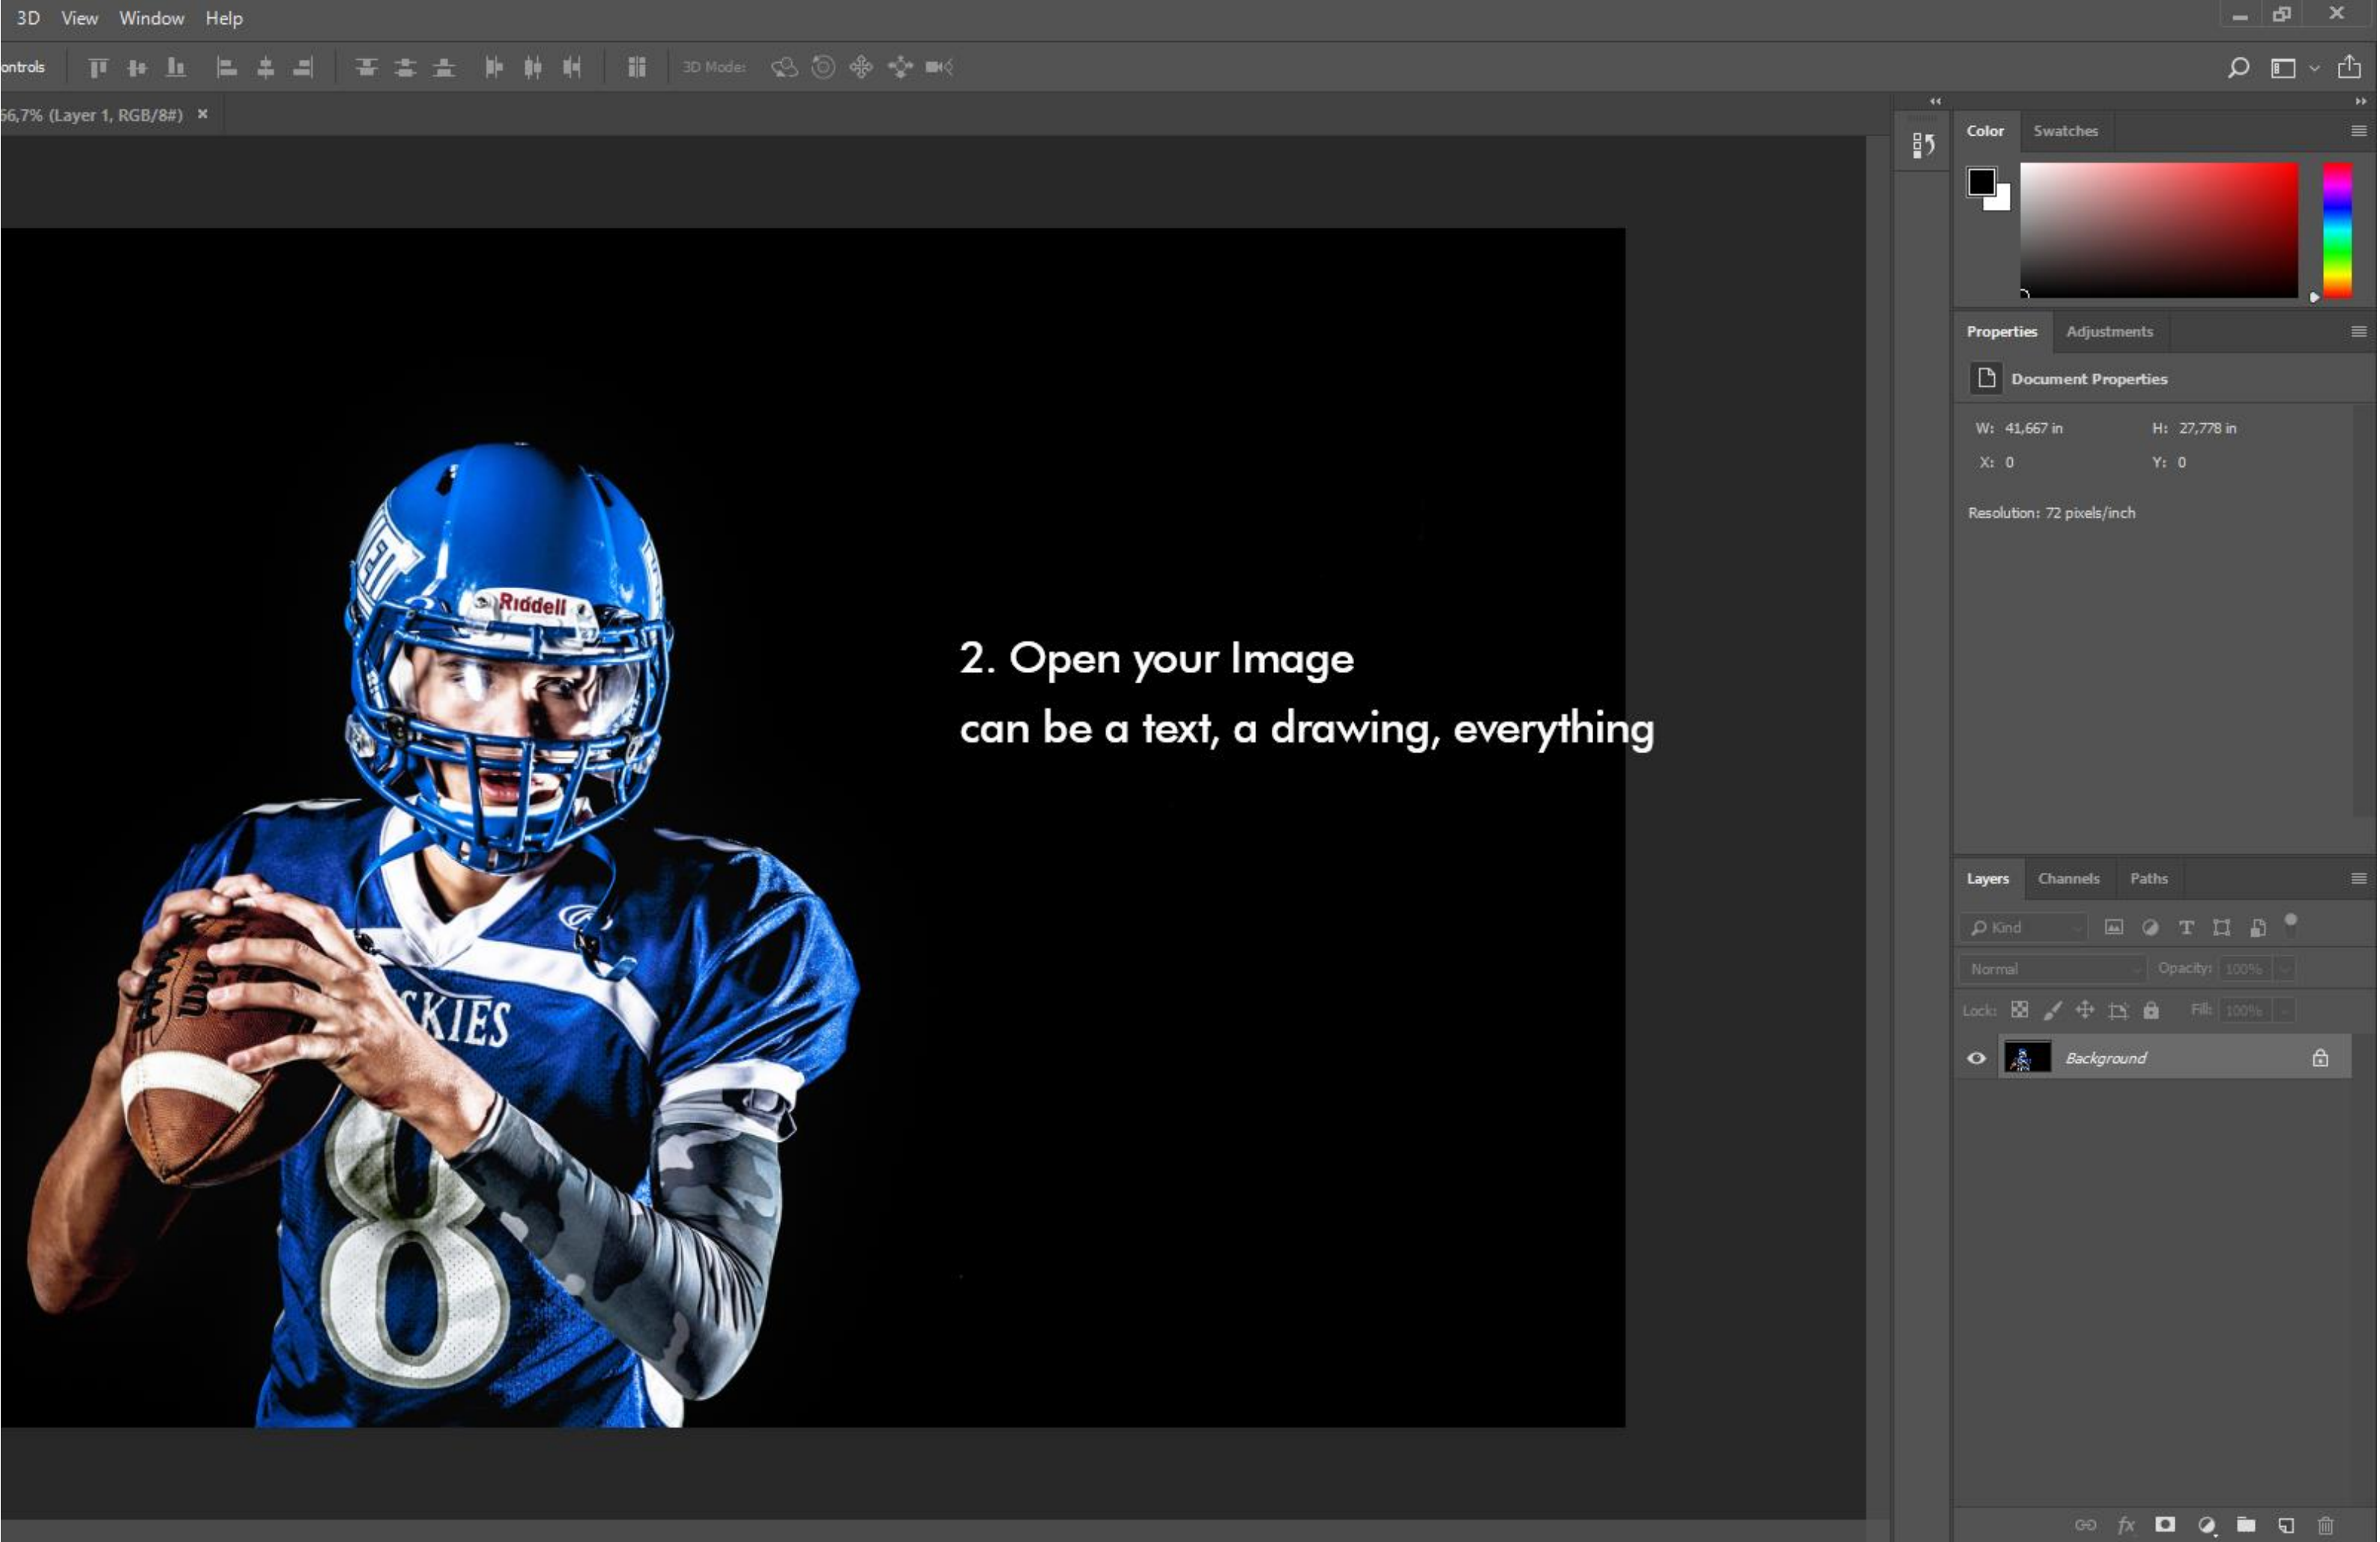

on Mac [Applications\Adobe Photoshop\Presets\Scripts](#)

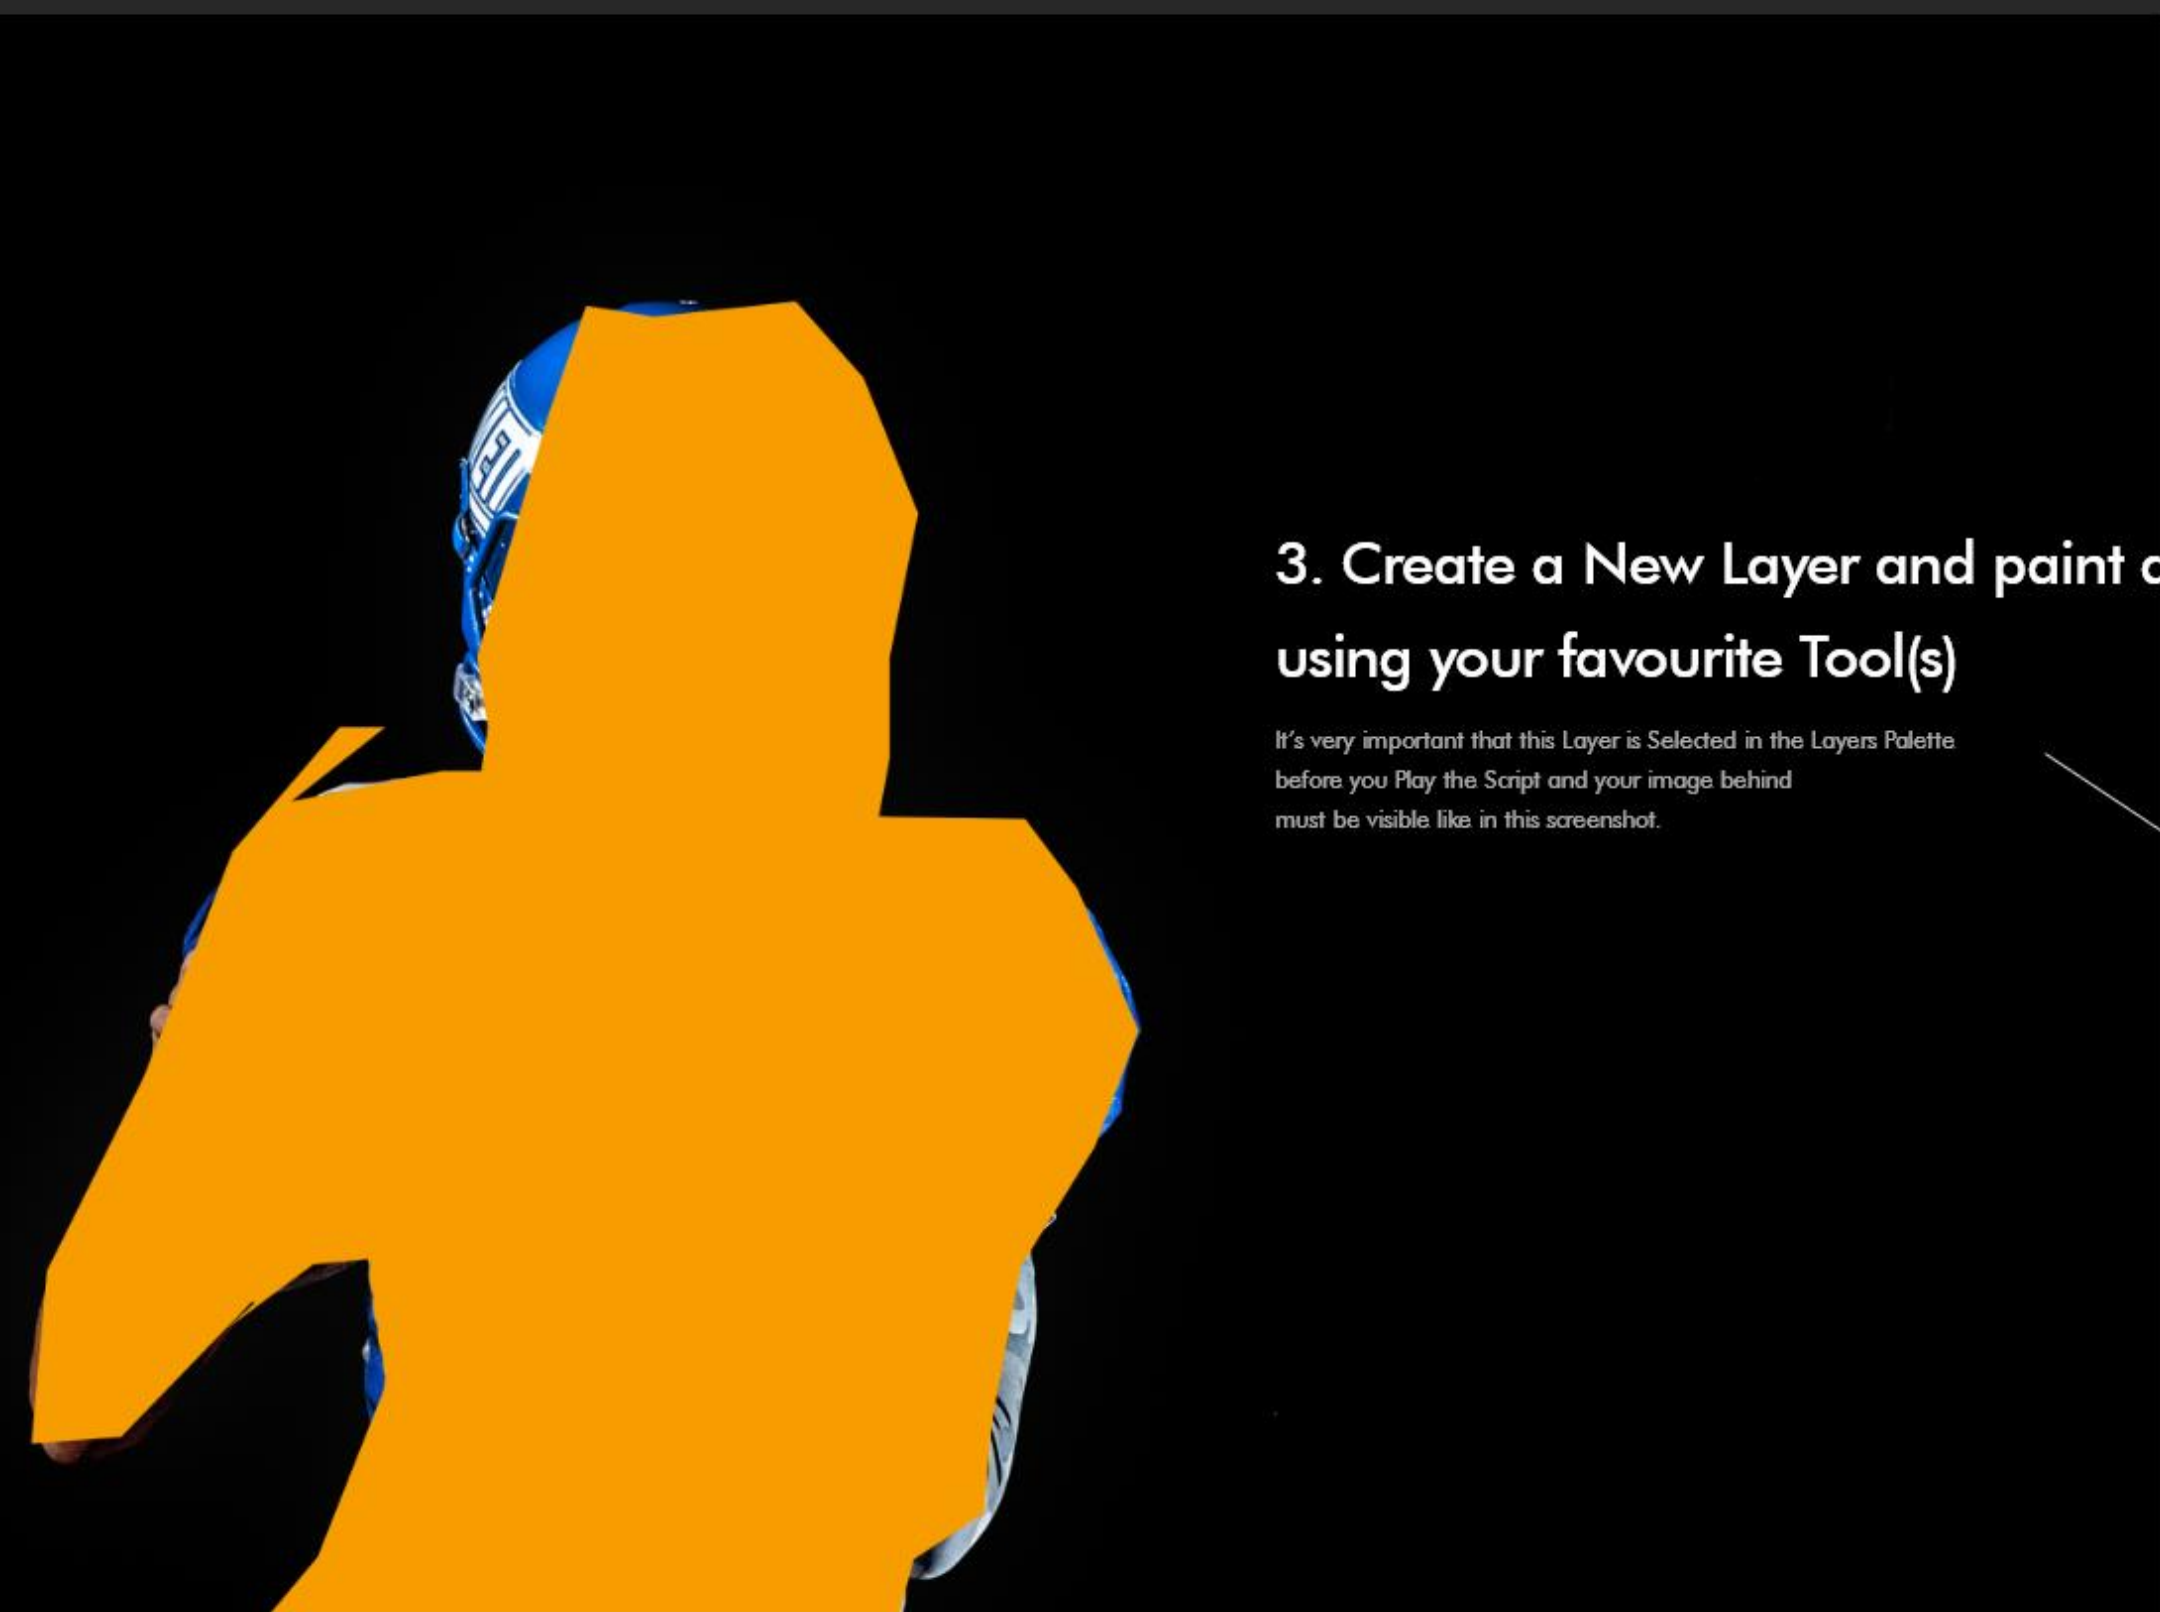

Geometric Dispersion Patterns.pat

Install "Geometric Dispersion Patterns.pat" with a double-click on the icon

or manually Load them from Photoshop under Edit > Presets > Preset Manager

3. Create a New Layer and paint an area using your favourite Tool(s)

It's very important that this Layer is Selected in the Layers Palette before you Play the Script and your image behind must be visible like in this screenshot.

Background

The screenshot shows the Photoshop Color panel. The 'Color' tab is selected, displaying a large gradient from red to black. To the right of the gradient is a vertical color bar with a rainbow spectrum. Above the gradient, there are two tabs: 'Color' and 'Swatches'. The 'Color' tab is active. In the top left corner of the panel, there are two small squares, one black and one white, representing the current foreground and background colors.

Download and Install FX Box

Go at <https://www.the-orange-box.com>

and download the FX Box. Watch the quick video tutorial to easily install it.

Once installed we can find it under Window > Extensions > FX Box.
Remember to restart Photoshop if it was open.

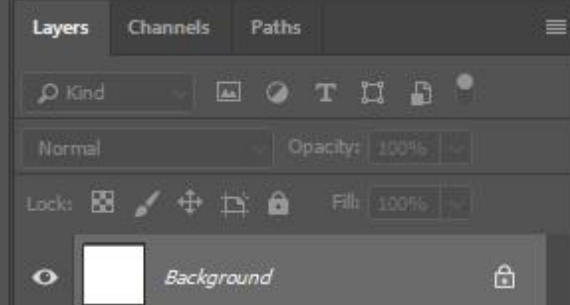

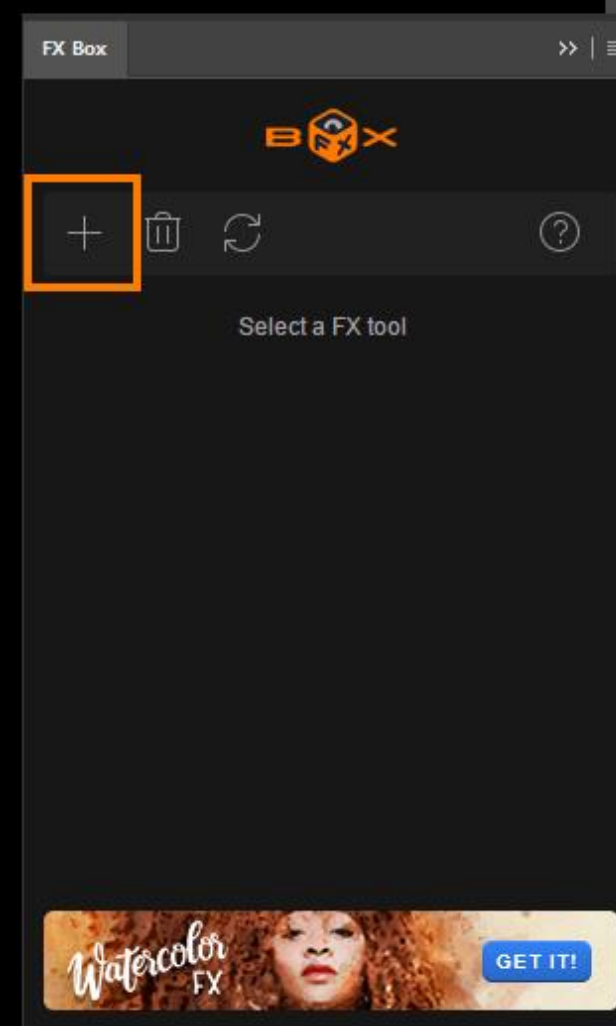

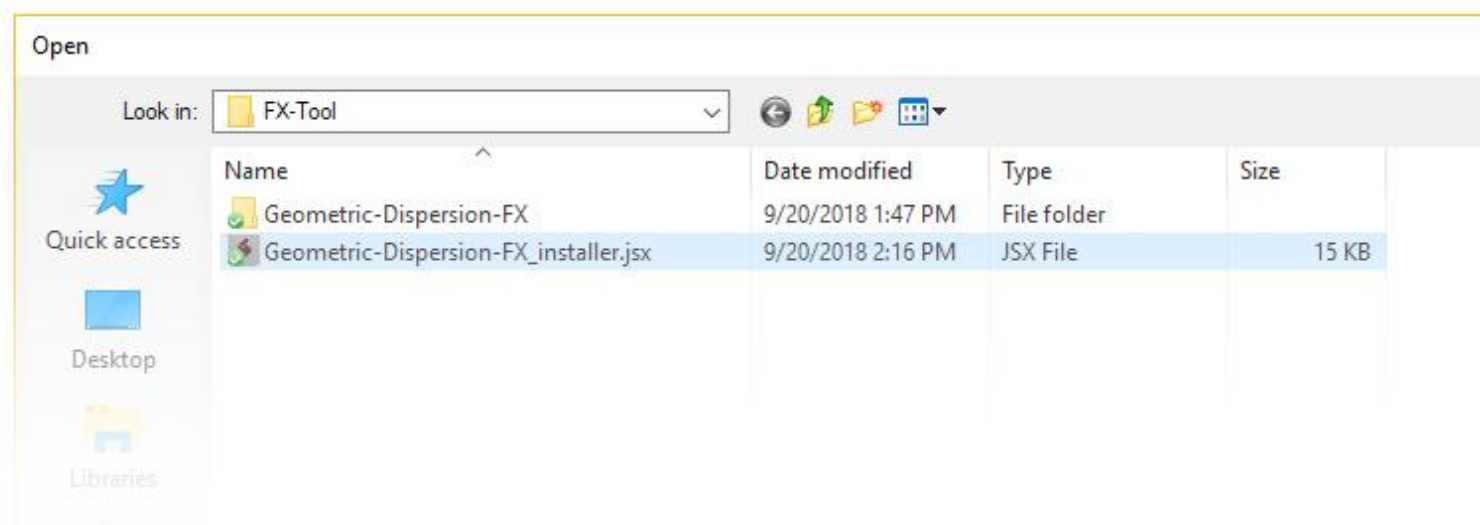

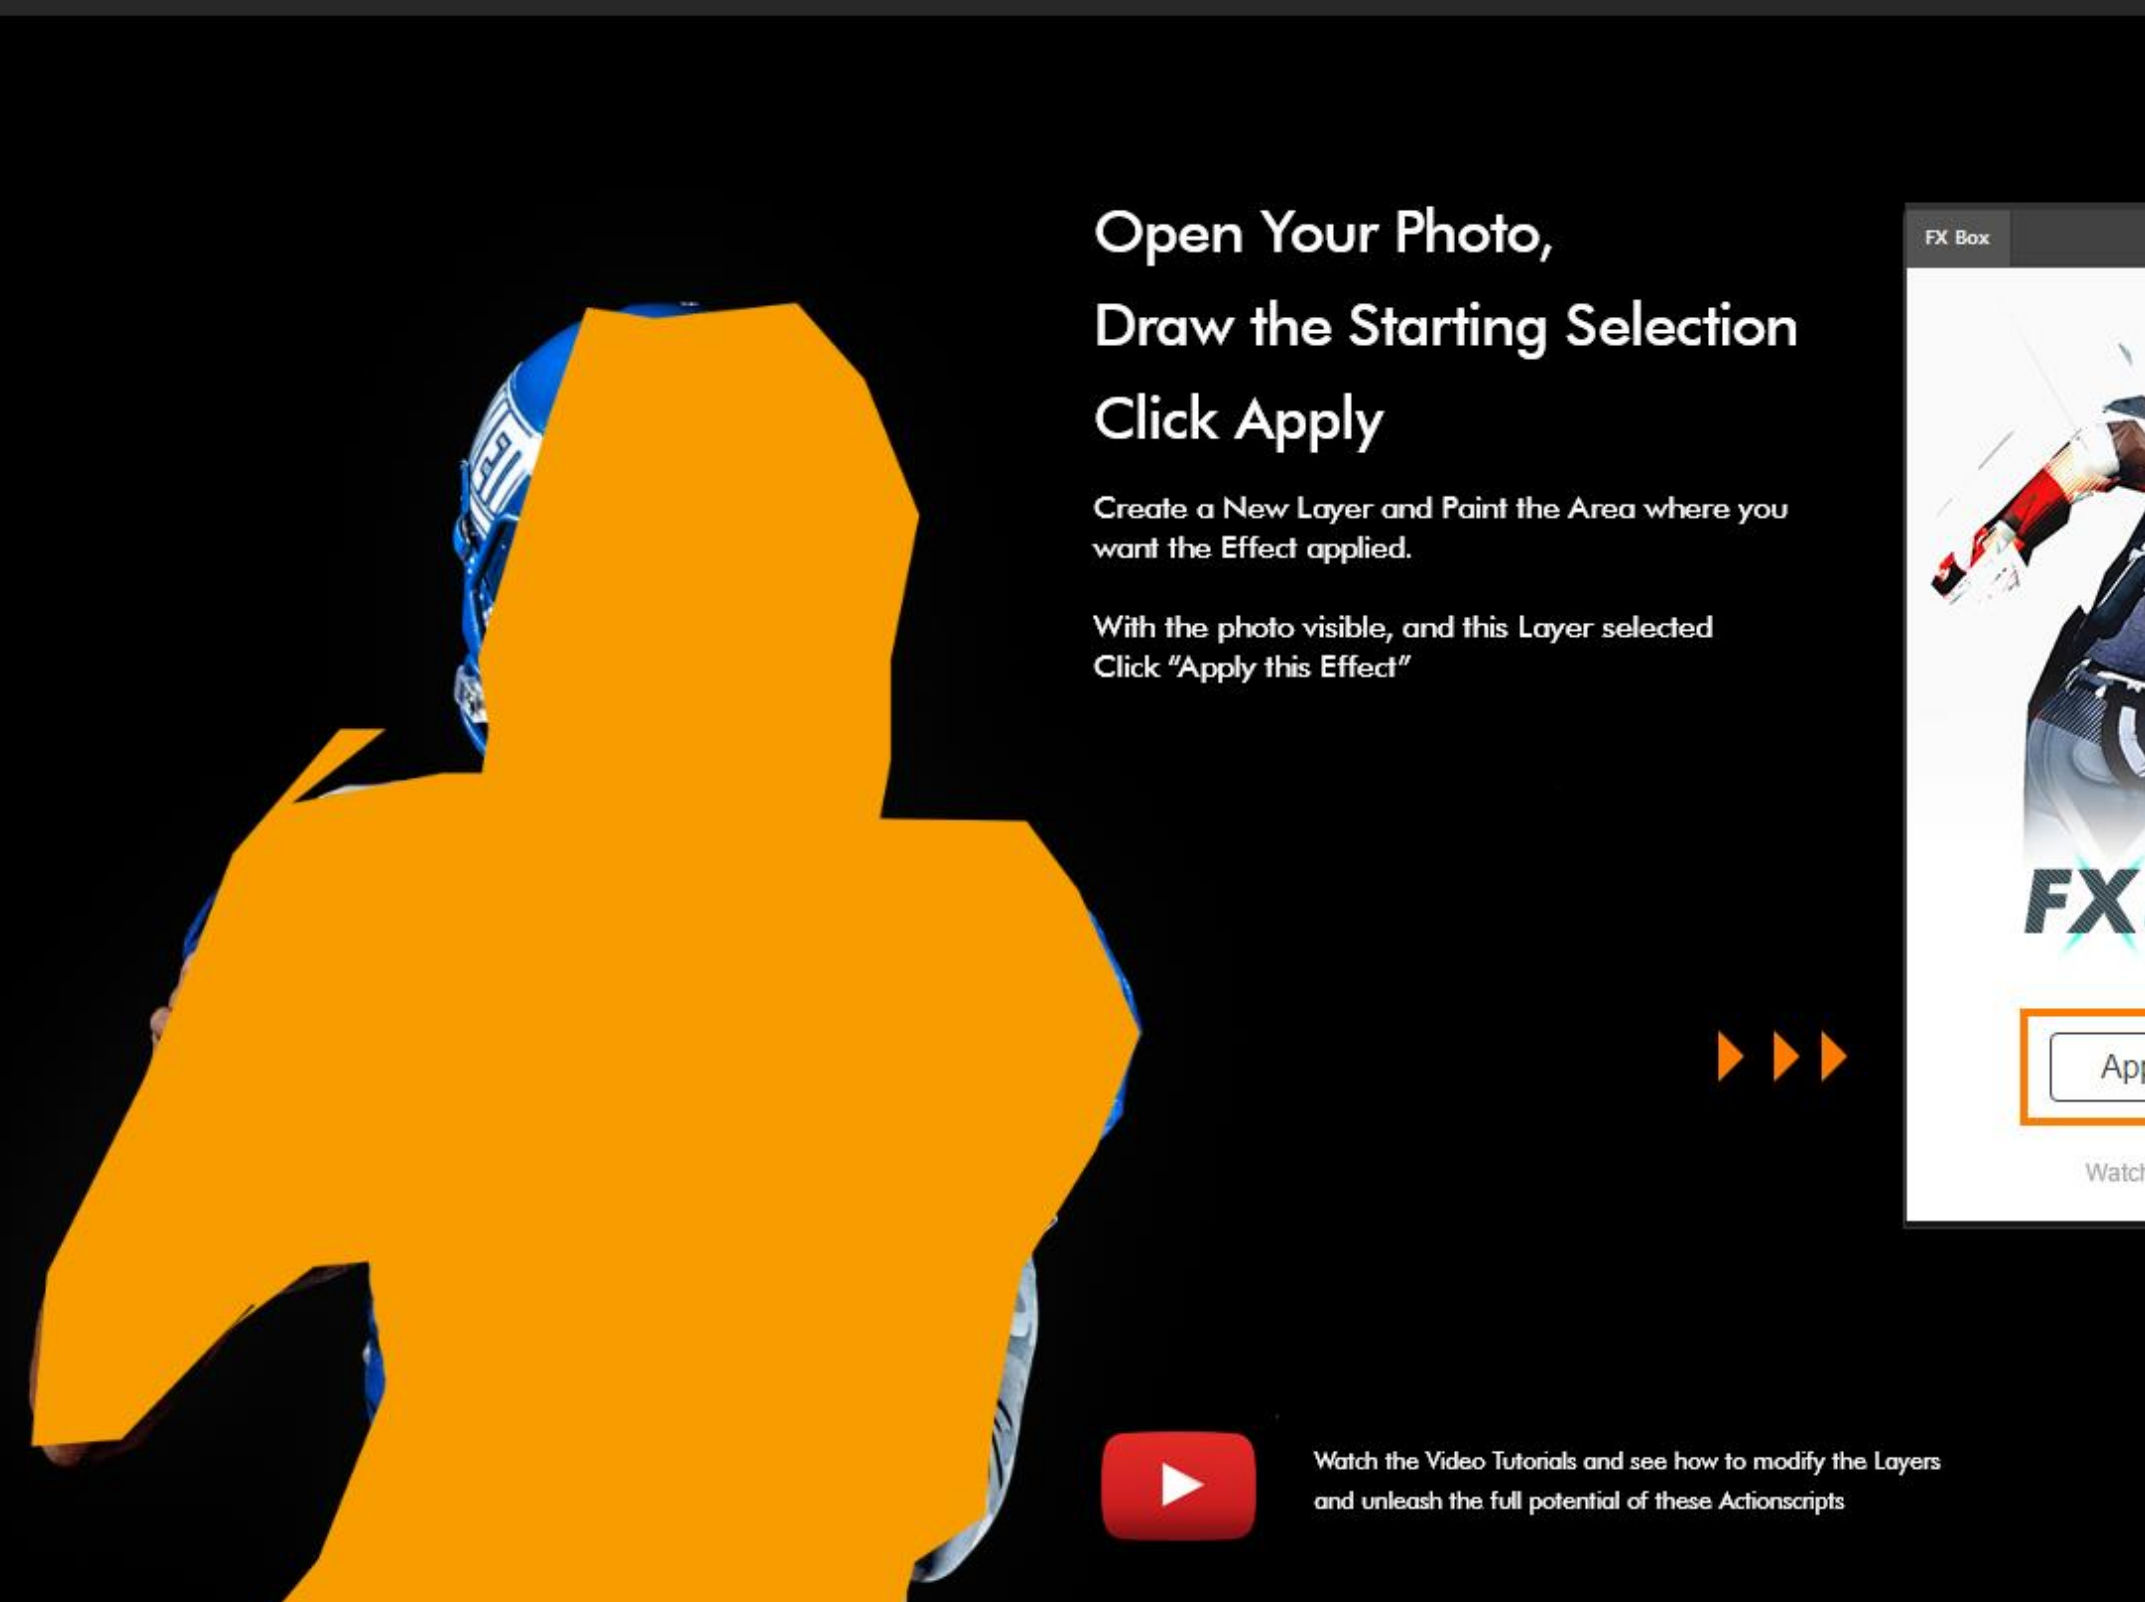

Click on the Plus Icon

When you Download "Geometric Dispersion FX" there's also a Folder called FX-Tool which contains this File:

Geometric-Dispersion-FX_installer.jsx

After you click on the Plus Icon navigate to this Folder and Select Geometric-Dispersion-FX_installer.jsx

Open Your Photo, Draw the Starting Selection Click Apply

Create a New Layer and Paint the Area where you want the Effect applied.

With the photo visible, and this Layer selected
Click "Apply this Effect"

Watch the Video Tutorials and see how to modify the Layers
and unleash the full potential of these Actionscripts
