

35MM FILM GRAIN PHOTOSHOP ACTION

**THANK YOU FOR PURCHASING THE 35MM FILM GRAIN PHOTOSHOP ACTION!
TO HELP YOU GET STARTED, PLEASE READ THE FOLLOWING QUICK USER GUIDE.**

PRODUCTS OVERVIEW

The pack includes 1 PS actions file (.ATN) with 8 different grain variations to quickly emulate the grain found in various film photographs.

INSTALLING & USING THE 35MM FILM GRAIN ACTION

To install the .ATN file you can either double click the .ATN file included in package or drag the file directly into your Photoshop window. Photoshop should automatically include it to the Actions Panel.

If the extension is not recognizable by your system place the action preset (VD - 35mm Film Grain Effect Action.atn) into **Program Files > Adobe > Photoshop > Presets > Actions** (Win) or **Applications > Photoshop > Presets > Actions** (Mac). You will notice the default action presets that included with Photoshop in this folder.

Head over to the Photoshop Actions Palette (**Window > Actions**) open the palette options menu on the top right and choose Load Actions.
Follow the path to find the preset in the Photoshop Actions folder.

To use, open an image and select the 35mm Film Grain action and press the play button at the bottom of the actions palette on one of the eight grain effects actions.

REQUIREMENTS:

Adobe Photoshop Elements, CS and higher.
Basic knowledge of Adobe Photoshop is suggested.

PRODUCT DETAILS:
