<u>1. Setting Up The Files And Photoshop</u>	Page 2
<u>2. Installing The Files (Mac)</u>	Page 2
<u>3. Installing The Files (Windows)</u>	Page 4

1. SETTING UP THE FILES AND PHOTOSHOP

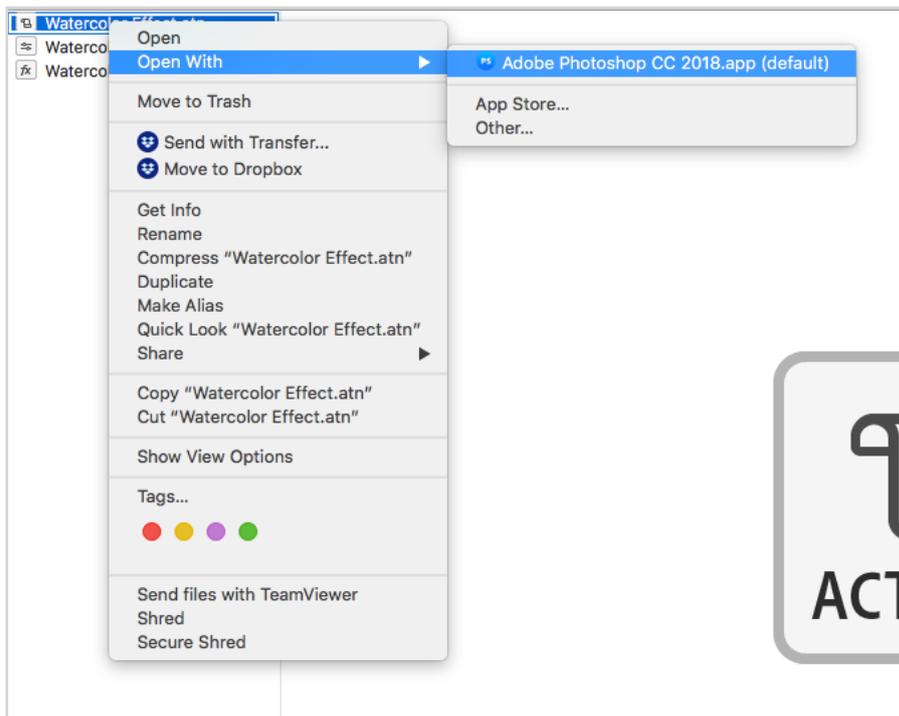

1.1 Open the folder containing the products you just downloaded and look for these 3 files: **Watercolor Effect.atn**, **Watercolor Eraser.abr** and **Watercolor Paper.pat**.

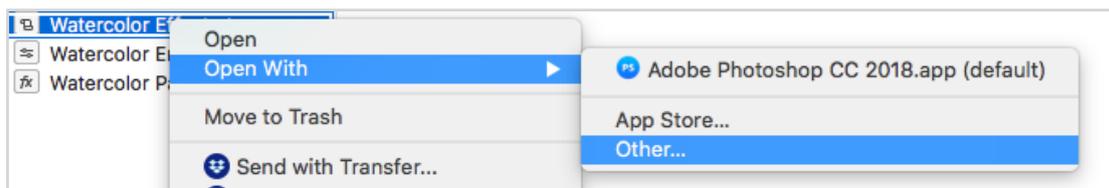

1.2 Open up Photoshop and wait for it to load, you don't need to create any new document at this stage, just have it ready and loaded.

2. INSTALLING THE FILES (MAC)

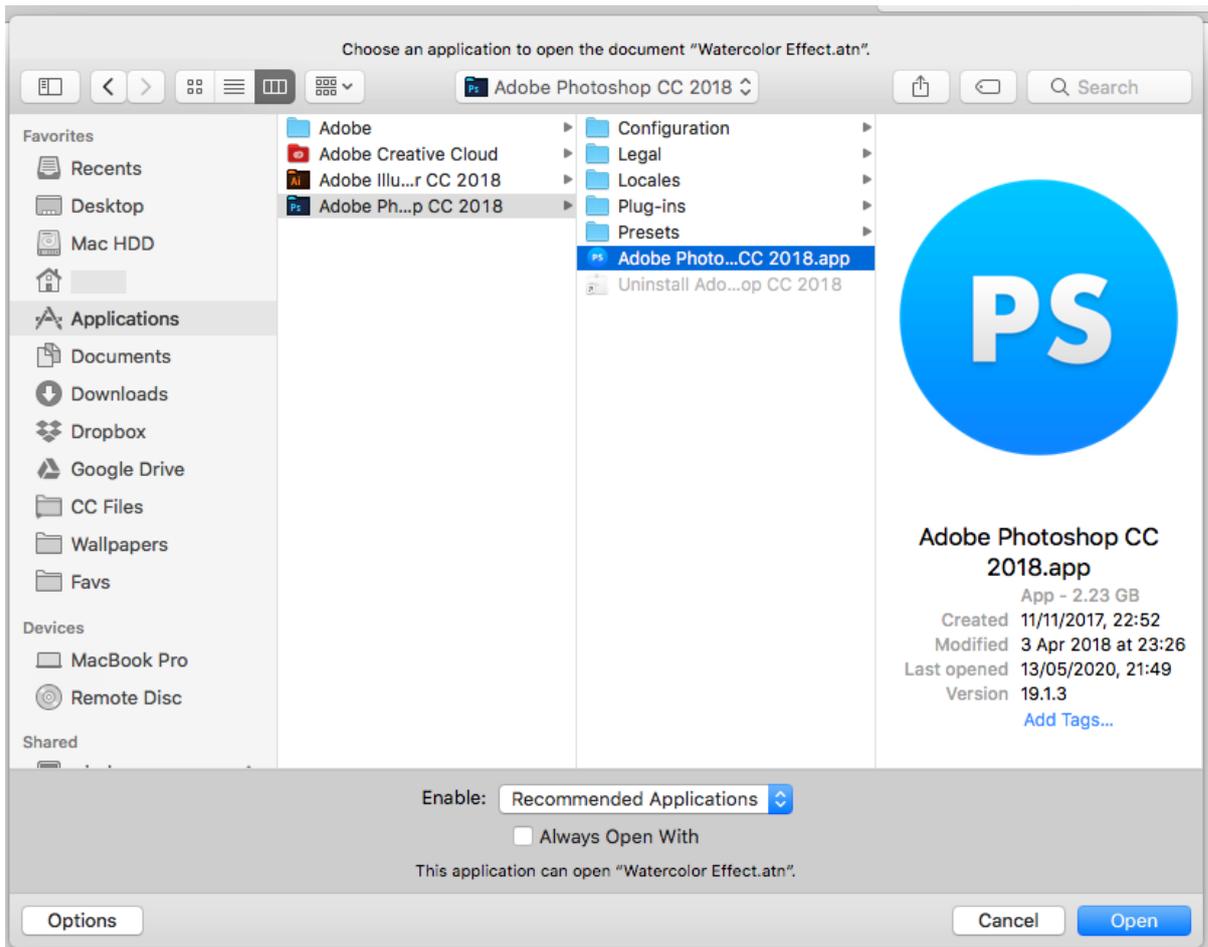

2.1 Go back to the folder with the 3 files mentioned above at **step 1.1**, select the first one and right click on it and then go to "**Open With > Adobe Photoshop**".

2.2 If you can't find Photoshop in the list click on "**Other**" instead.

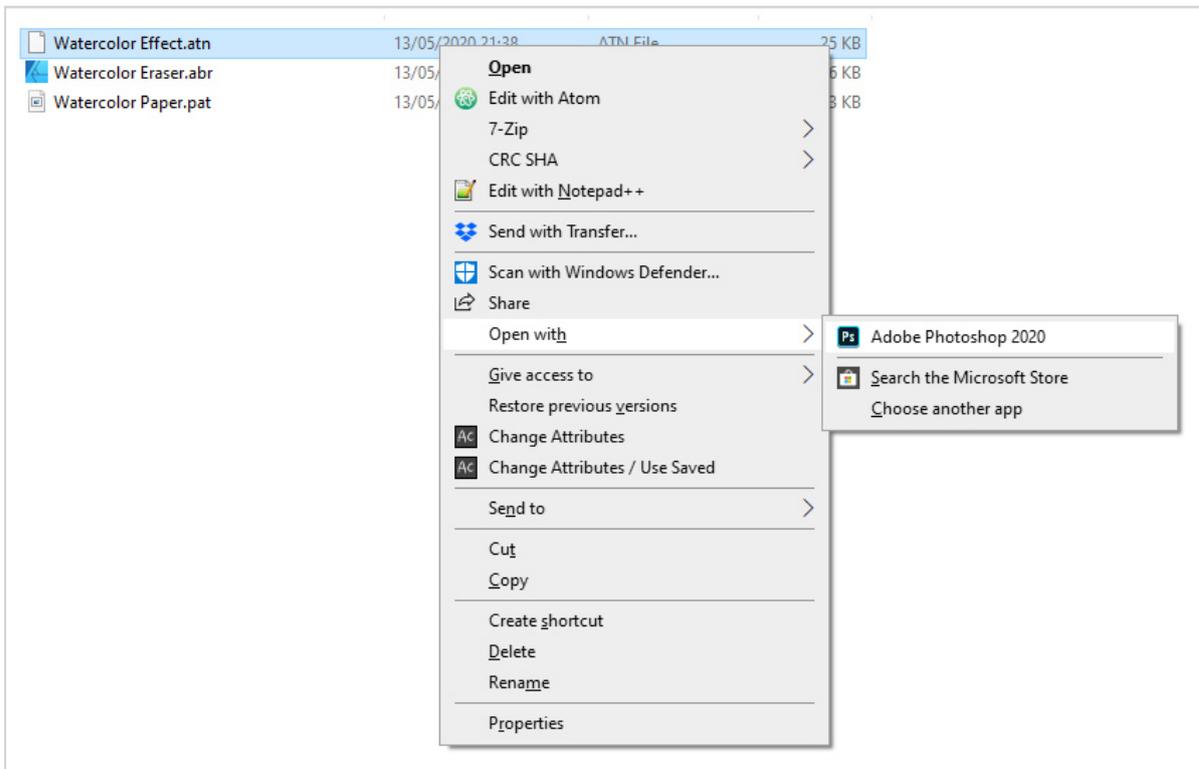

2.3 A new window will open up asking you to choose an application to open the files with. Look for Photoshop in the list and click on **"Open"**.

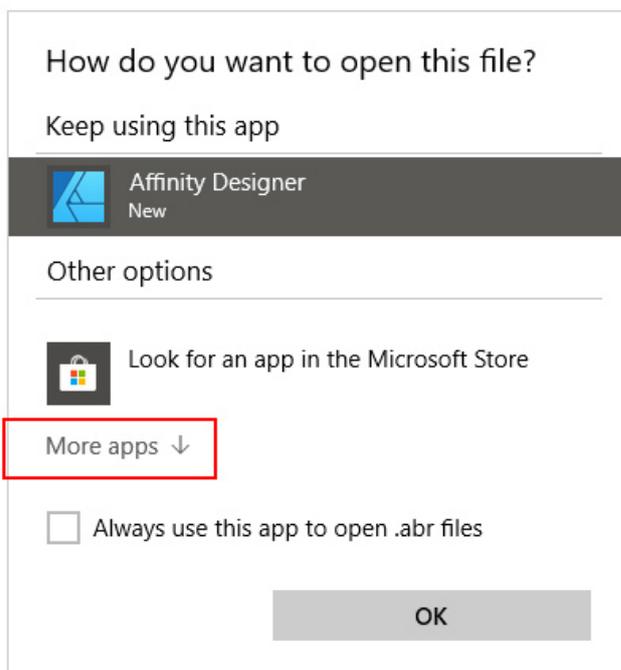

2.4 Repeat these steps for the remaining 2 files (**Watercolor Eraser.abr** and **Watercolor Paper.pat**) and you're good to go.

3. INSTALLING THE FILES (WINDOWS)

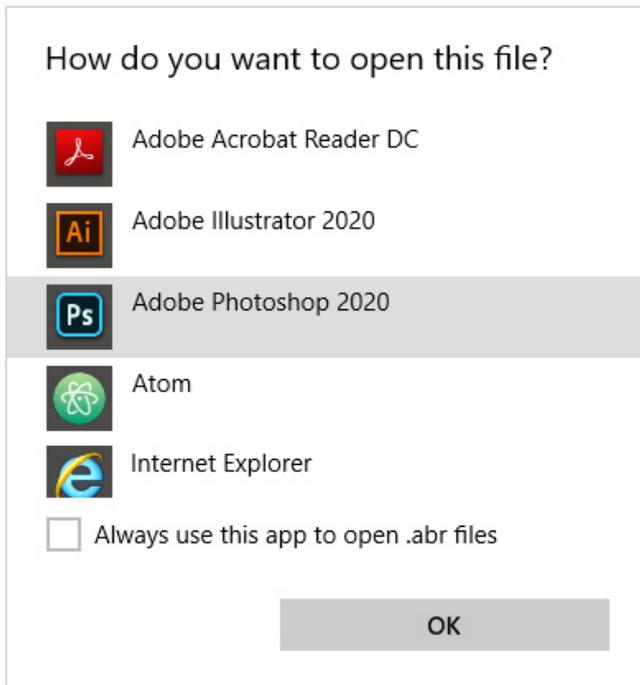

3.1 Go back to the folder with the 3 files mentioned above at [step 1.1](#). Right click on the first file (in my case **Watercolor Effect.atn**) and choose **"Open with > Adobe Photoshop"**.

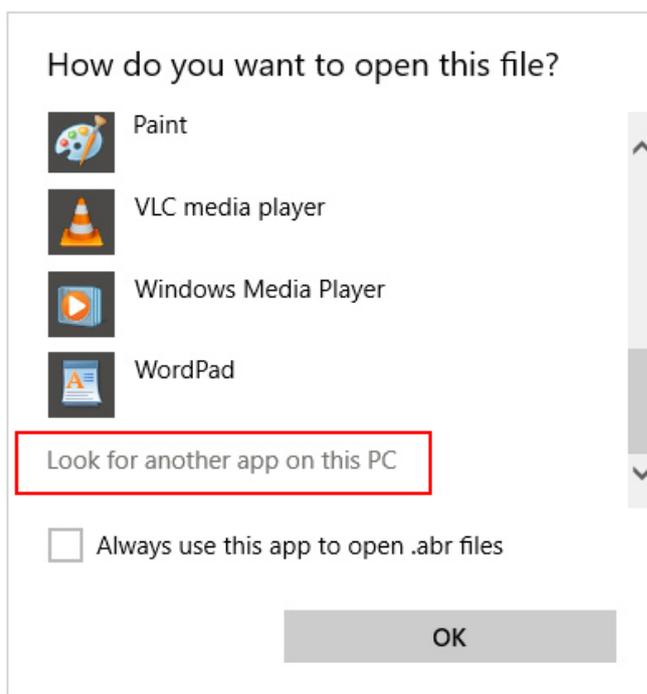

3.2 In case you can't find Adobe Photoshop in the list select **"Choose another app"**. This will open up a popup with more software to choose from.

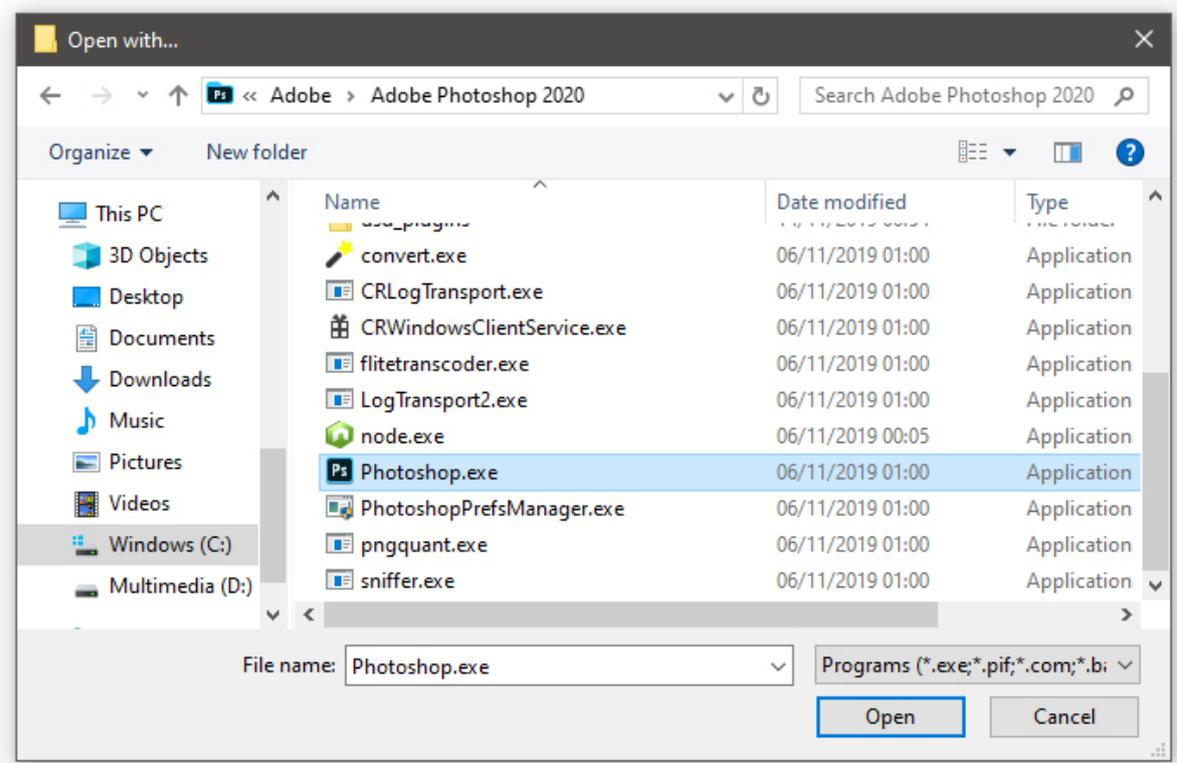

3.3 It's likely that Photoshop still won't be there at first so you'll have to click on **"More Apps"**. This will open up the list with a lot more software recommendations. Scroll through it and look for Photoshop and then click on OK.

3.4 If you still can't find Photoshop in this list then scroll all the way to the bottom and click on **"Look for another app on this PC"**.

3.5 A new window will open asking you to look through your PC for Photoshop. It's usually located in "**C://Program Files/Adobe**" unless you installed it in a different location. Once you find it you can select it and then click on "**Open**".

3.6 You just installed the first file! All that's left to do is to repeat these steps for the remaining 2 files (**Watercolor Eraser.abr** and **Watercolor Paper.pat**).
