PROJECT EDITION

Photo Edit

In the project in the window with layers (select from menu above "window -> layers") there are folders called "Photo_Replacement" which contains layers and they are smart objects (They have "Double_click" in their names). Double-click this layer and place your photo in the newly opened document and then close the document accepting the changes. Done.

Color Edit

You will find layers called "color_change" - just double click this layer and you can edit color.

Remember - every PSD file contains "Remove this layer" layer. Just delete this layer to see entire design.

Good luck in your business / Viel Glück in Ihrem Geschäft / Buena suerte en tu negocio

IF YOU NEED HELP WITH THIS ITEM LET ME KNOW

b3ast696@gmail.com

I have been designing web pages, online stores, projects for printing and all kinds of advertising for the purposes of social networking sites. If you need a professional and comprehensive service, or a single project contact me. I am able to establish long-term cooperation.
