

## Optimizations:

- 1) Go to **Image > Mode > Select RGB Color**.
- 2) Go to **Image > Mode > Select 8 bits/Channel**.
- 3) Go to **Image > Image Size > Set the longest size to 2500 px – 3000 px. DPI to 72 - 300**.
- 4) Go to layers panel's **hamburger menu** (Three lines icon) > **panel options > Make sure “Add “Copy” to copied layers & Groups”**.

## Installation:

- 1) Go to **File > Open > Select all un-zipped files and open**. To verify Go to **Window > Actions & Window > Brushes**.

There are three files in zip files two are **Actions** files & one **Brushes** file.
