CLASSIC PORTS
film look presets

Thank you for your purchase! I'm confident that these presets will help you take your images to the next level! My presets have been tested on a variety of images and they are very versatile. As a Pro photographer with over 10 year of experience I use these presets my-self to speed up my workflow. These aren't "filters" These are presets tweaked for amazing colour and skin tones in portrait photography.

In most cases these presets will work with one click but remember that all presets work differently on every image and because every image is different (different cameras, different light, different white balance) They are designed to be used on RAW images. You will likely need to tweak the edit after the preset is applied. It's normal to make adjustments after applying a preset.
