

Plastic Jar Mockup

Hello dear buyer!

Thank you for purchasing this file, I hope it will be useful for you.

Let's start!

Main file is in "psd" folder. You can easily drag-n-drop this element to your scene.

To paste your design inside mockup, You need to select the main layer. Than right-click on it and select "Edit Contents". Than you need to find layer "(YOUR DESIGN) Label" -> right-click -> "Edit Contents" -> paste your design and save.

Every editable mockup has the same layer names and almost every layer has color choosing.

To change color of any element inside – simply double-click on the color box, and choose color you want.

You can play with layer opacity, to achieve the right result. This function looks best on "Glossy Effect" layer.

Color variation can be any, it all only depends on your need.
