PAINTER BOX

**Before anything please install our free Photoshop Panel PainterBox without this you are not be able to use or install any of our tools.**

https://ozonostudio.com/painterbox

Installing the Tool

HOW INSTALL & USE

.01   Open Photoshop and from our PainterBox Panel press on the install button
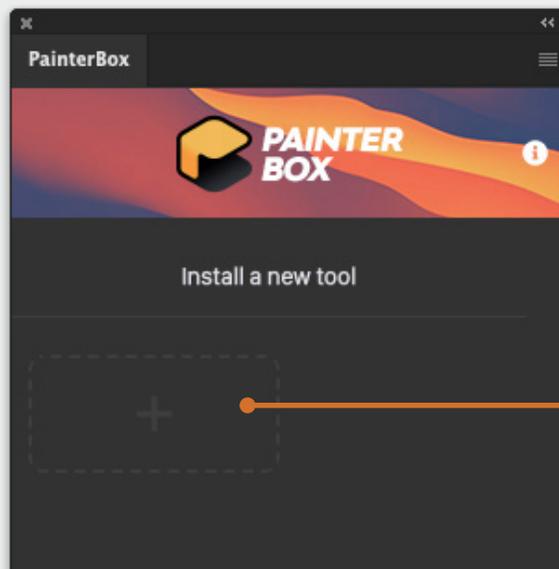

Install and load tools to the panel

.02   Browse to the unzipped folder and select the **installer.jsx** file
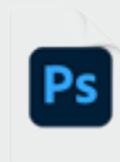

PainterBox   installer.jsx

.03 Once the installation finish, the panel would reload itself to display the new tool, once it's there you're ready to start.
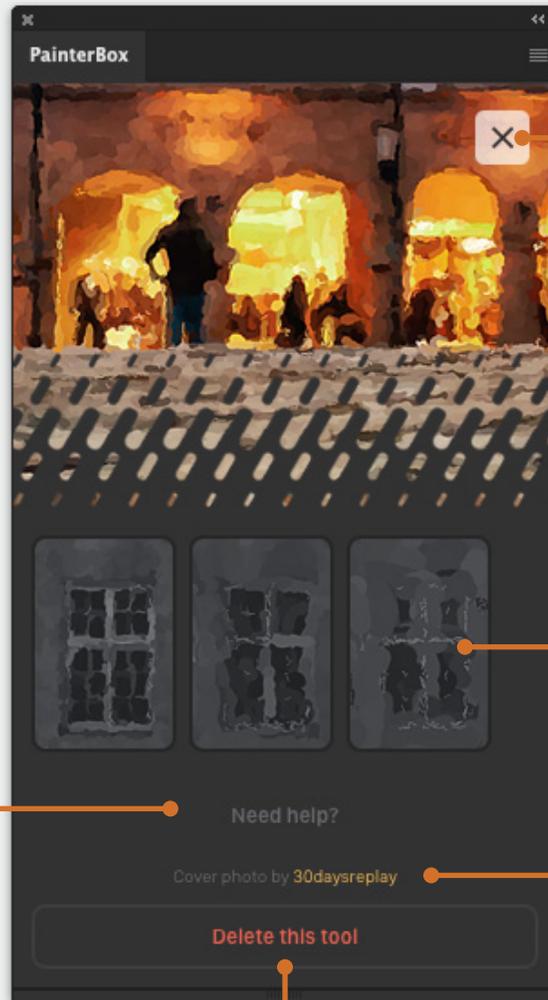

Close the current tool

Depending on the tool you're going to be able to use one or many effects from this list.

Open our support page or depending on the tool a page with a tutorial.

Credits for the photo used as cover on each tool

The never use option to delete our tools

Please don't modify the content of the PainterBox folder, this would break the panel, then you going to need to download or unzip the file again.

We support this panel and any of the installed tools, for this you can use our dedicated helpdesk or via Facenook Messenger.

Before you try to contact us directly please check the tutorials and information of the tools, sometimes many issues can be solved checking the documentation first.
