

Hello,

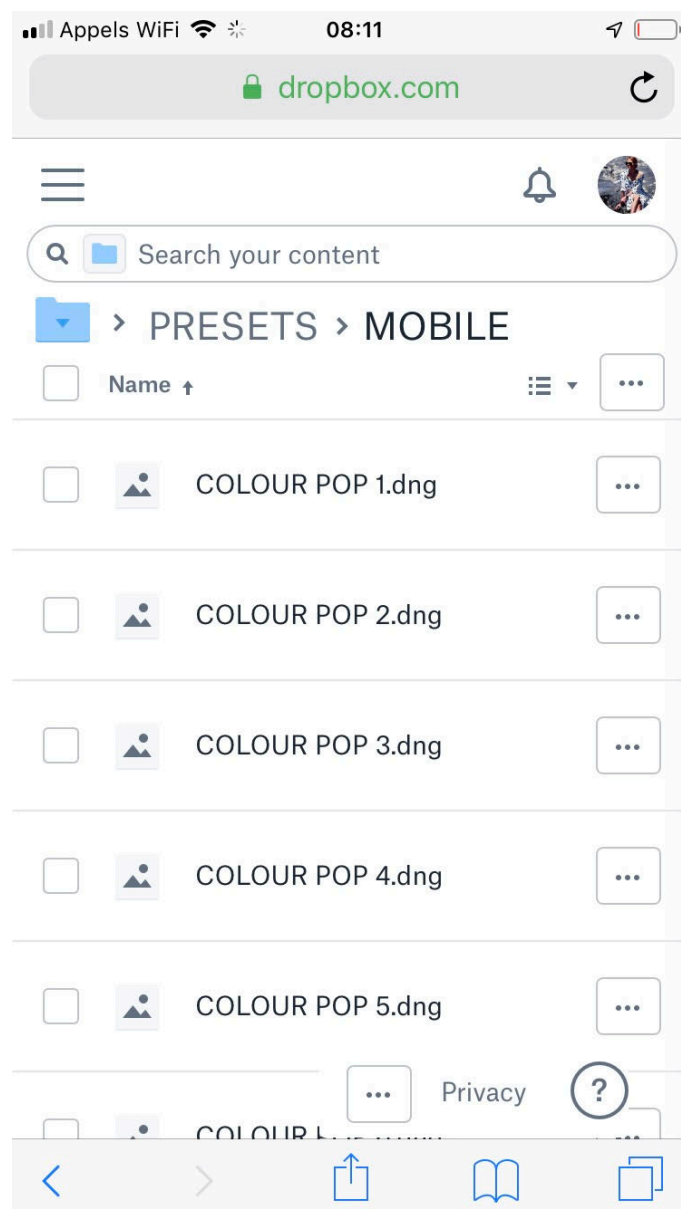

❤️🙏 **THANK YOU** so much for buying my presets! May it help you be creative with your photos. 🙏❤️

Let's get you all ready and set up!

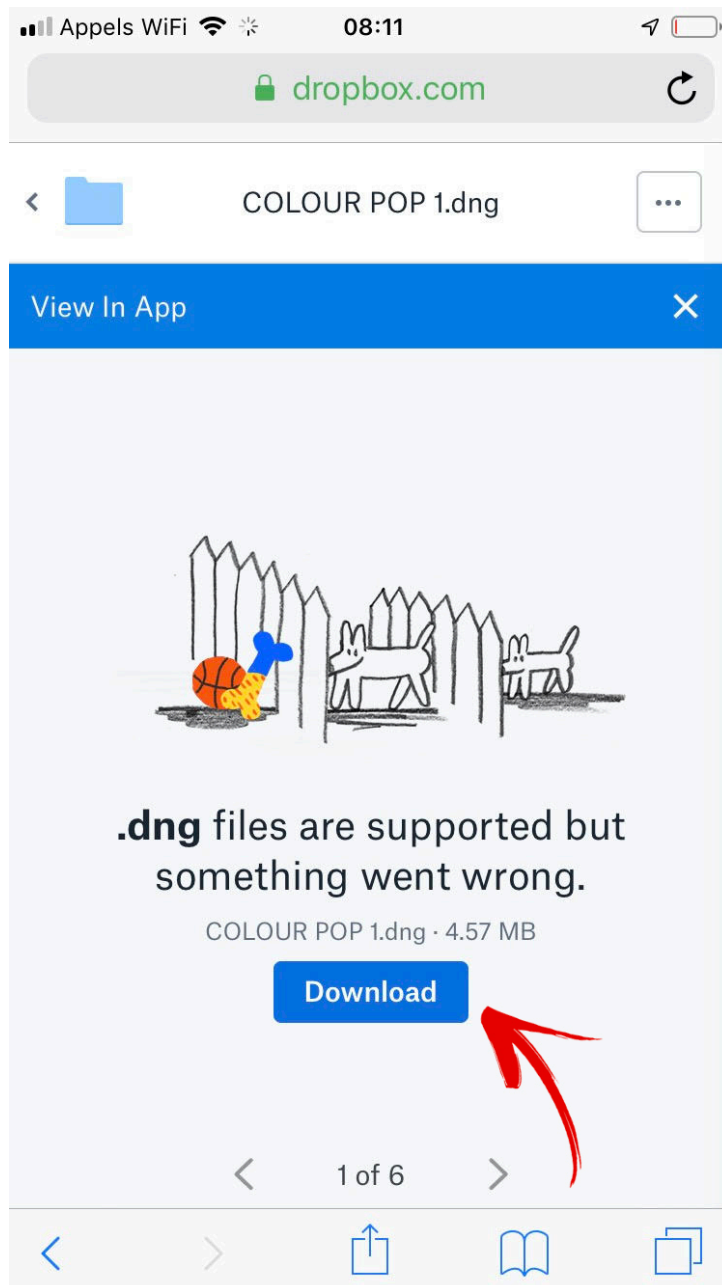

TO INSTALL FOR LIGHTROOM MOBILE let's try to do this step by step:

STEP 1. This is how to download files from Dropbox. If they already are on your phone, please, proceed with the step 2.

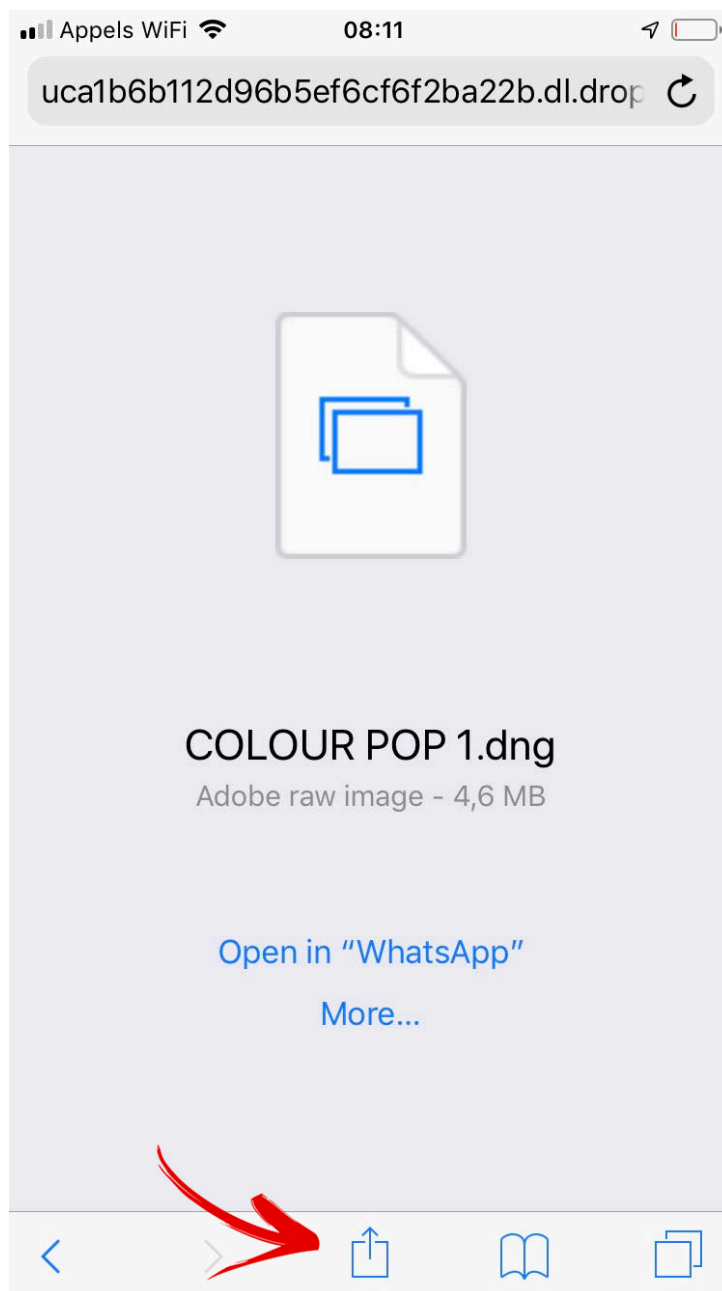

Open a Dropbox folder with files. Click on file ending with ".dng", it will open a new window.

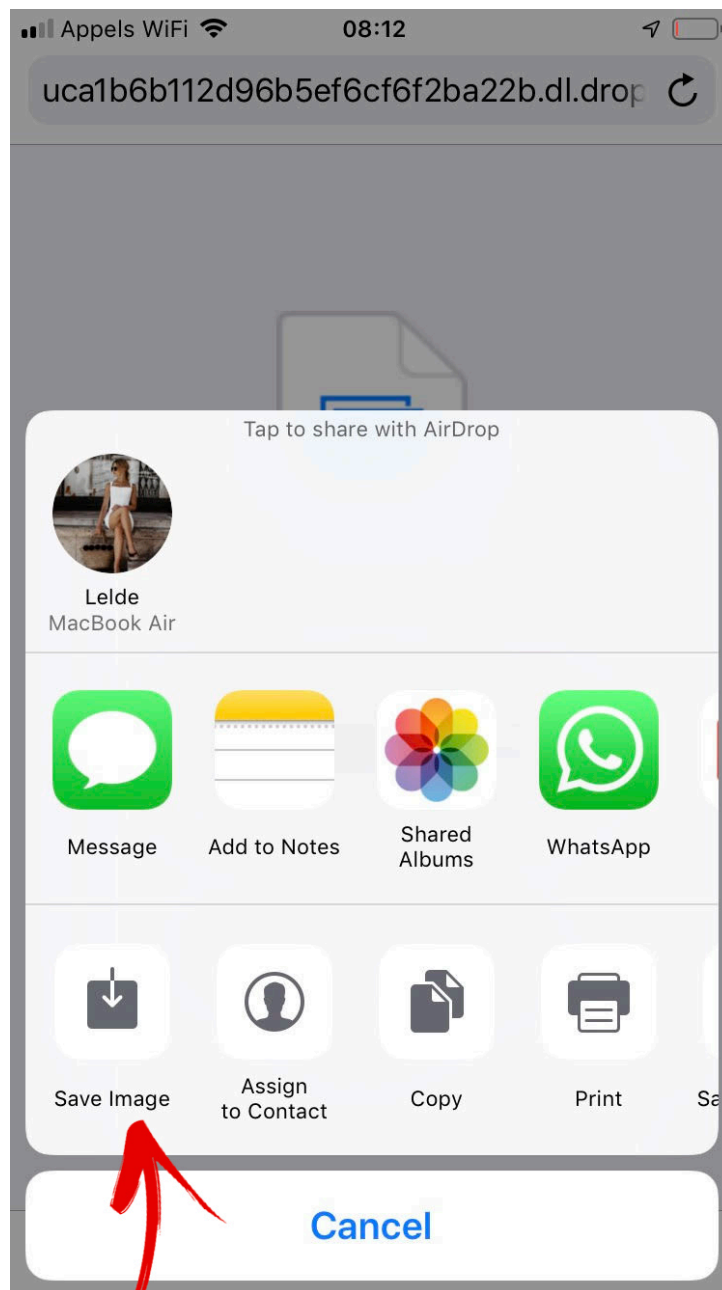

DO NOT worry, if you see this screen saying “something went wrong”, all is good & you are doing awesome! Click “Download”, it will open another window.

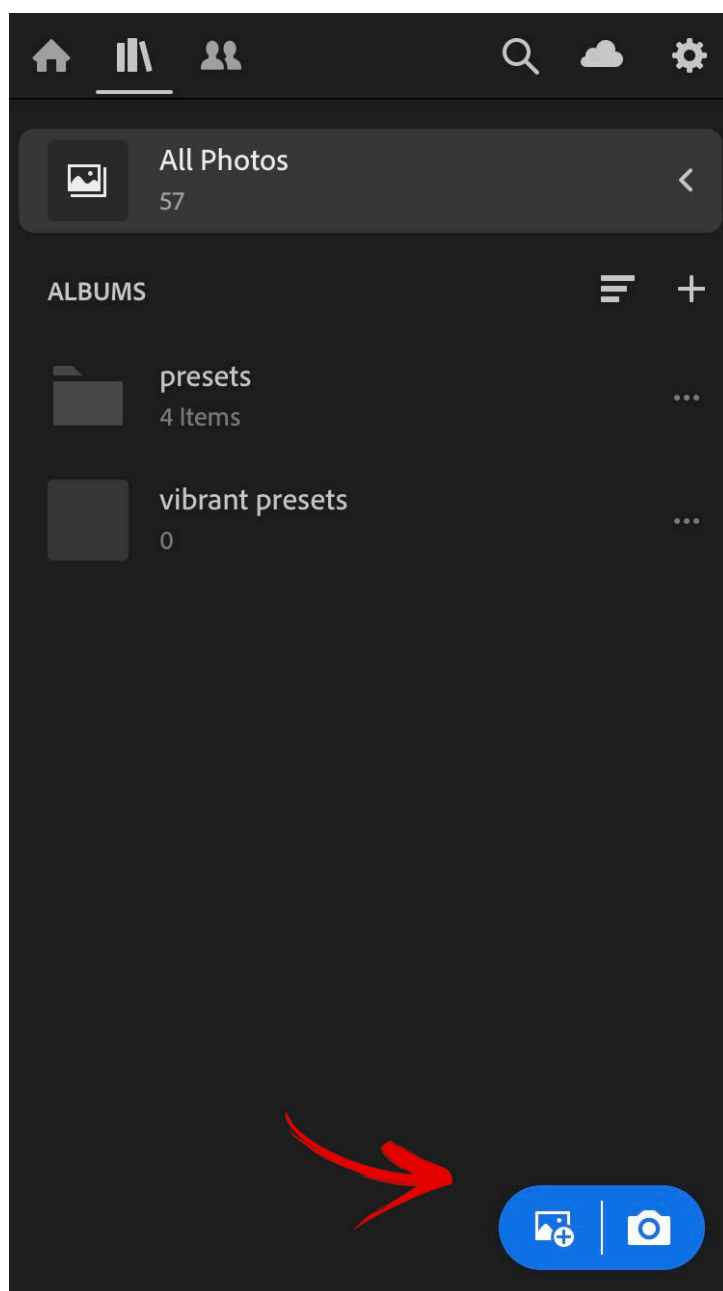

Click on the file + arrow icon at the bottom of the page.

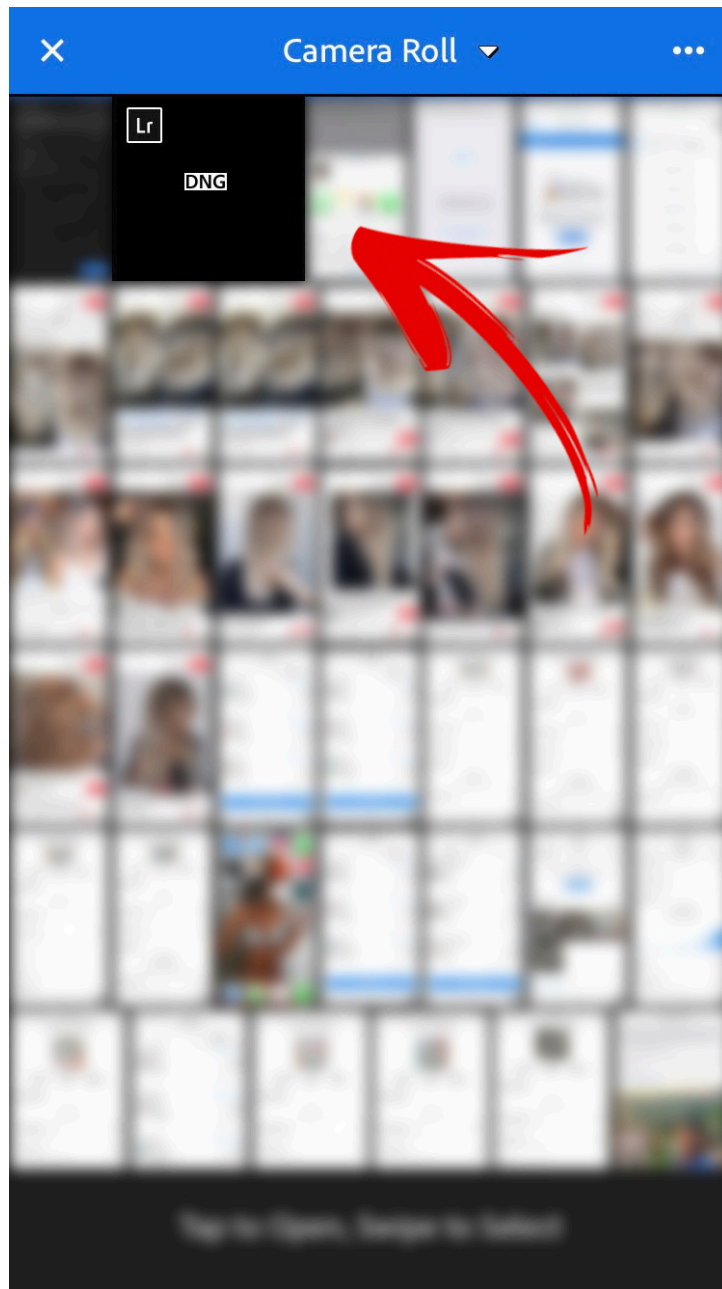

Click on **"Save Image"**, it will save file on your camera roll. It will look blank (again this is normal). Repeat this with all the other ".dng" files.

STEP 1. Open the **LIGHTROOM** app & click on the **image +** icon to import presets you have just downloaded.

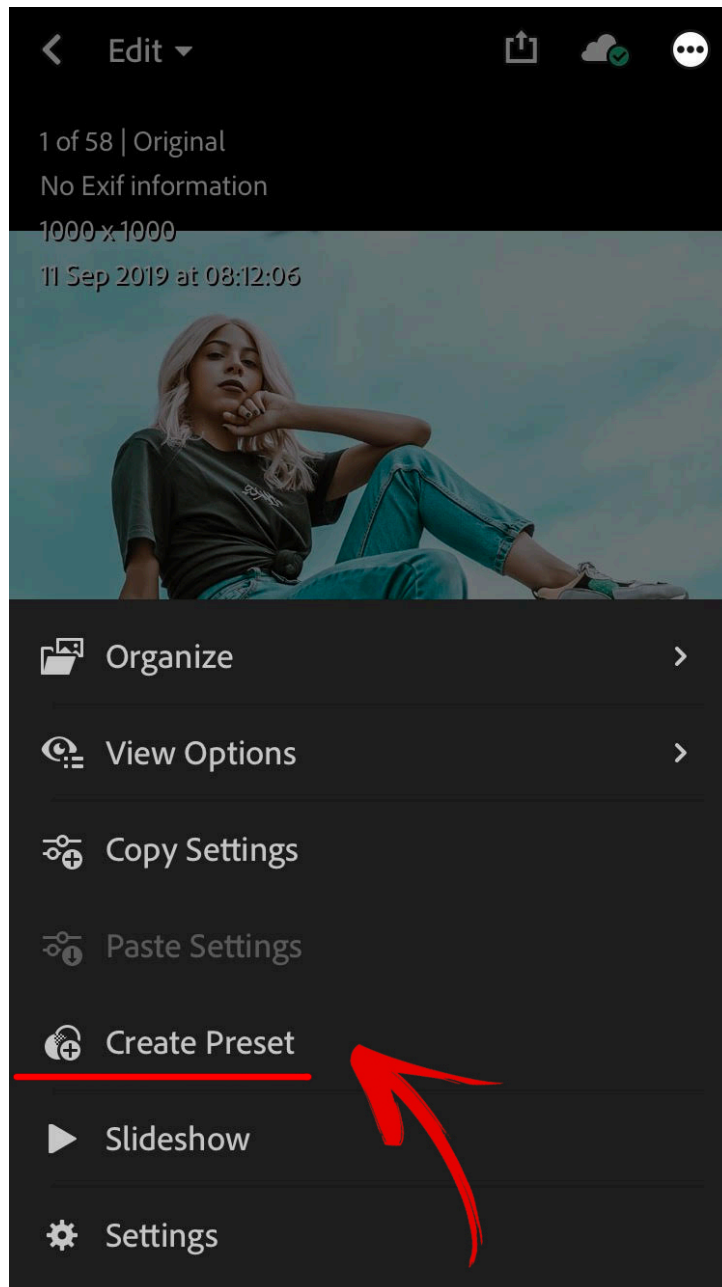

Select DNG files, you just downloaded from your Camera Roll and import those in the app.

STEP 3. Click on the DNG file you just imported. Click on the 3 dots on top right corner.

Select **"Create Preset"**.

Name the preset accordingly to the DNG file. Select a folder where you wish to add this preset to. You can also create a new folder. This will be important later, so you are able to find the presets. Click the tick icon. YAY! Your new preset have just been created!

STEP 4. Click on the image you wish to edit. Select from a bottom slider "presets".

Select the folder where you saved the presets and click on the preset in order to edit the image.

📸 NOW GO AND ENJOY EDITING WITH YOUR NEW PRESETS! 📸

STILL STRUGGLING? 🙋🙋
