

How to customize PSD file

How to place design screenshot, background, shadow, bubble or light overlay JPG or PNG image in smart object layer

- Double click on the smart object square thumbnail (Red, Blue or Yellow signed)
- After opening a new tab, follow the continuation-
 - Go to- **File** menu
 - Click **Place Embedded** from the **File** menu.
 - Select design screenshot from the appeared dialog box.
 - Then Resize it to fit the whole window.
 - Press Enter to place screenshot.
 - Then close window & save.
 - In the similar process, you will have to place other screenshots.

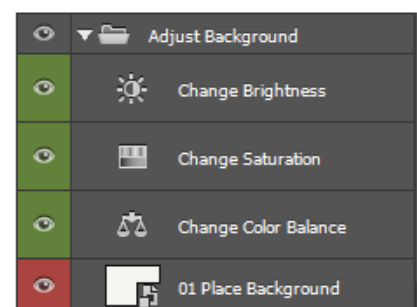

Edit Product mock-up (main mock-up):

- 4 Smart Objects – Front, Side, Top, Bottom (yellow)

01 Edit Background Option:

- Total 16 Backgrounds
- Place Background JPG Image in Red Signed Smart Object.
- Isometric 3D Background.
- Isometric Smart Object for Creating 3D Background.
- Place background JPG image in smart object, then automatically isometric background will be created for 3D environment.

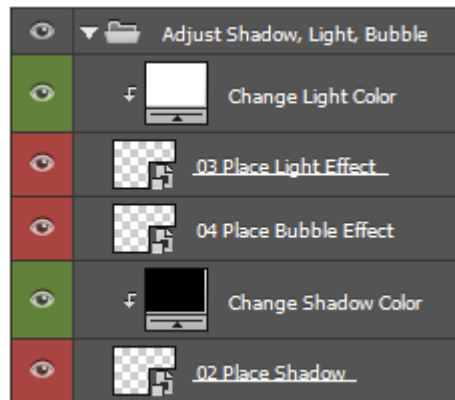

Brightness, Color Balance, Saturation Change Option:

- Double click on the each color option's icon to get the dialog box of respective color option.
- Then change every color scale of dialog box according to your requirement.

Adjust Shadow, Light, Bubble Overlay Options:

Shadow, Light and Bubble options are provided in the same group.

02 Edit Shadow Overlay Option:

- Total 16 Shadows
- Place Shadow PNG Image in Red Signed Smart Object
- Black Shadow Provided

Shadow Color Change Option:

- Double click on the 'Change Shadow Color'-layer's icon to get the dialog box.
- Then select color from the dialog which you would like to provide for shadow color.

03 Edit Light Effect Overlay Option:

- 05 Light Effects

- Place Light Effect PNG Image from “All Light Effect PNG Files”- Folder in Red Signed Smart Object.

- ‘Identify light effect No’- folder will help you to detect the light effect layout so that you can easily detect the PNG image of such layout as PNG images are so transparent.

- White Light Provided

Light Color Change Option:

- Double click on the ‘Change Light Color’- layer’s icon to get the dialog box.
- Then select color from the dialog which you would like to provide for light color.

04 Edit Bubble Overlay Option:

- Total 06 Bubble Overlays

- Place Bubble Effect PNG Image in Red Signed Smart Object.

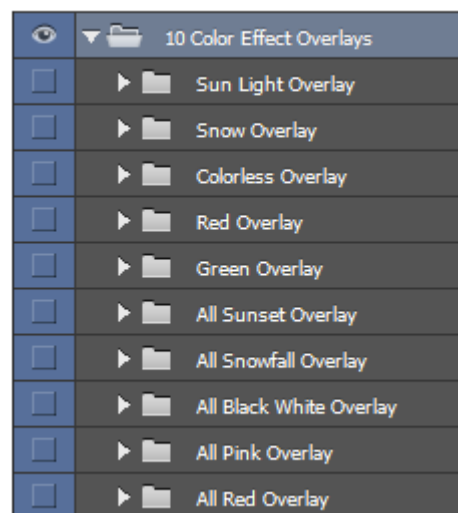

05 Color Effect Overlays

- 10 Color Effect Overlays

- Directly Provided in all PSD Files

- No Smart Object Placement Required

Click Eye Button left side of each group to get a color environment.

Note:

- Only blank smart objects are provided in main download PSD files for background, shadow, light effect, bubble overlay etc.
- If all those decorative graphics were provided in main PSD file, the size of each PSD file would have been more than 1GB. Then it would be so hard to customize as it would have occupied so much space in memory. The PSD file would be much slower to work rather than faster.
- Blank smart object has made sizes of all PSD file below 200MB. You can easily customize it and it would be also faster to work.
- Only for such reason, separate JPG or PNG images are provided for all decorative graphics.
