

Welcome in this installation guide for your new photo presets ! First I'd like to thank you for your purchase, I hope you will enjoy using our products.

Inside your purchase folder, you will find :

- A folder “**Desktop**” containing .xmp files for your computer ;
- A folder “**Mobile**” containing .dng files for your mobile ;

ON YOUR COMPUTER

STEP N°1 : Adobe Lightroom

To be able to use our presets, you must be on PC or MAC and have the software Adobe Lightroom. If you don't have it, don't worry ! You can download a trial version for free at this address :

<https://www.adobe.com/products/photoshop-lightroom.html>

STEP N°2 : Import presets

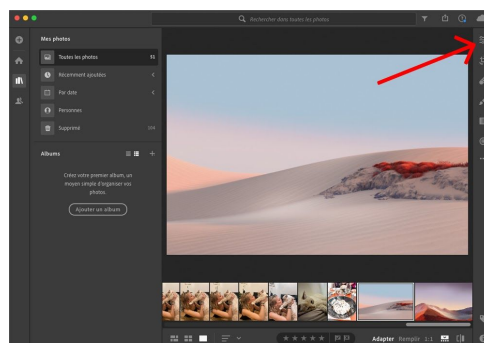

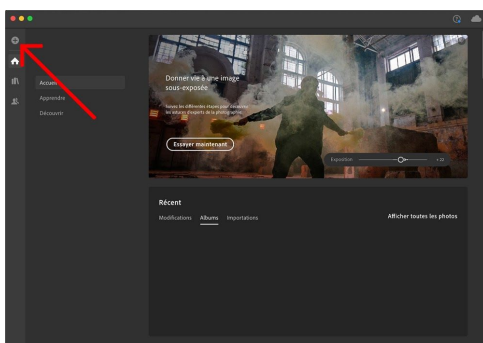

Once you've installed Adobe Lightroom, go to the “**Desktop**” folder provided with your purchase. In this folder you'll find 4 files with .xmp extension.

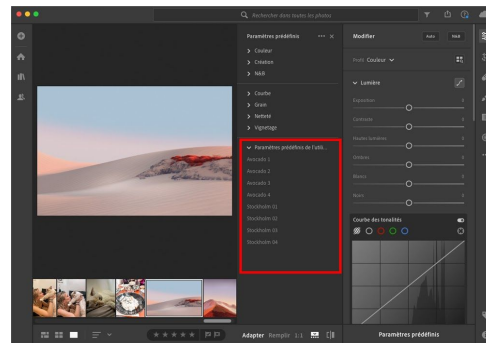

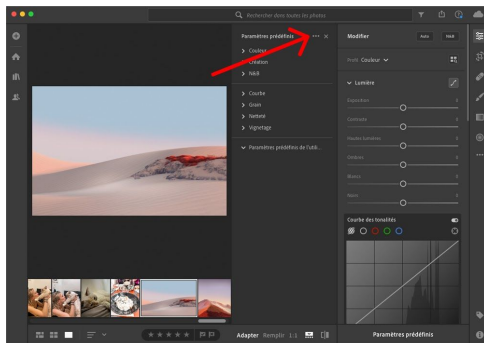

To import them nothing more simple ! Open your software and click on “**add photos**”.

Then click on your photo and go to “**Modify**” and right after “**Presets**”.

After that, click on the three dots and then click on “**Import presets**”, select on your computer the .xmp files and Import them.

All done, in the section Presets you should see your new presets ready to use !

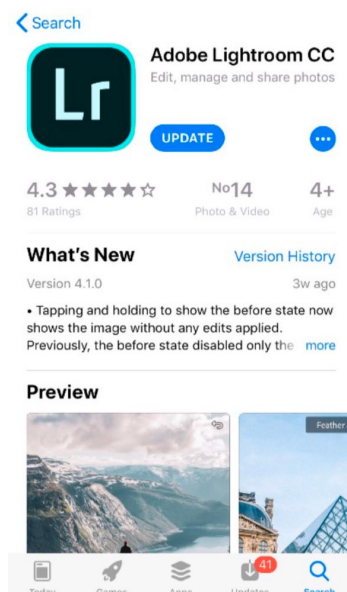

STEP N°3 : Apply a preset to an image

Open a photo on the application and click on “**Modify**” and right after click on “**Presets**”. Under “**User Presets**” you will find all the presets you’ve already added. Then click on the one you want to apply to the image and that’s it ! :)

ON YOUR MOBILE

STEP N°1 : Adobe Lightroom

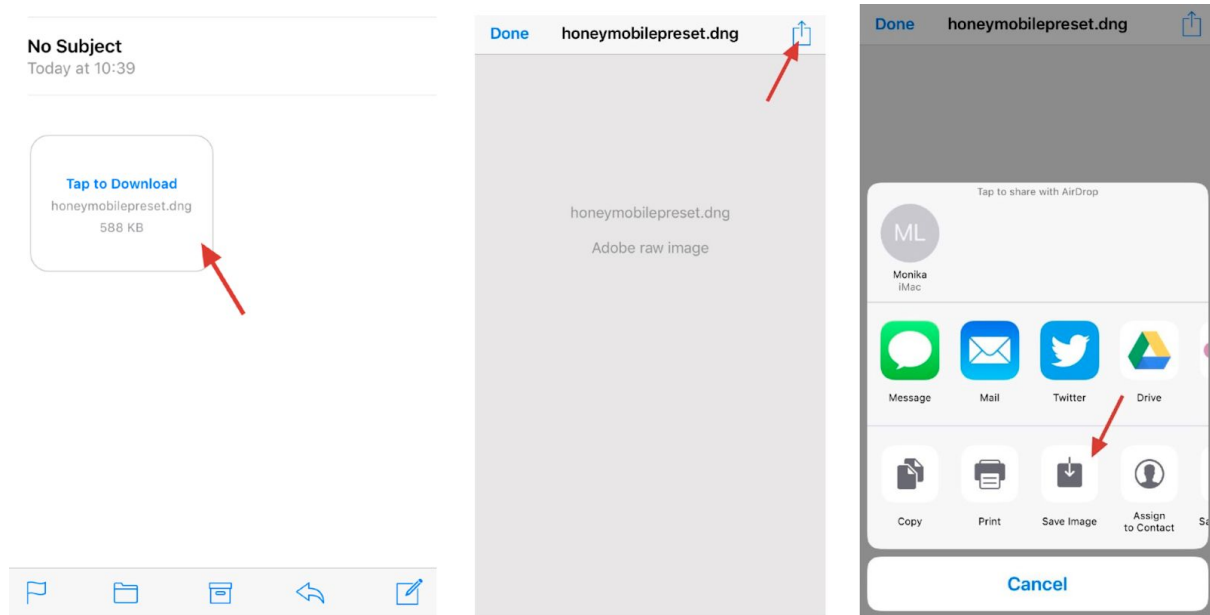

To be able to use our presets, you must install the Adobe Lightroom application on your phone, it’s free !

STEP N°2 : Get the files on your phone

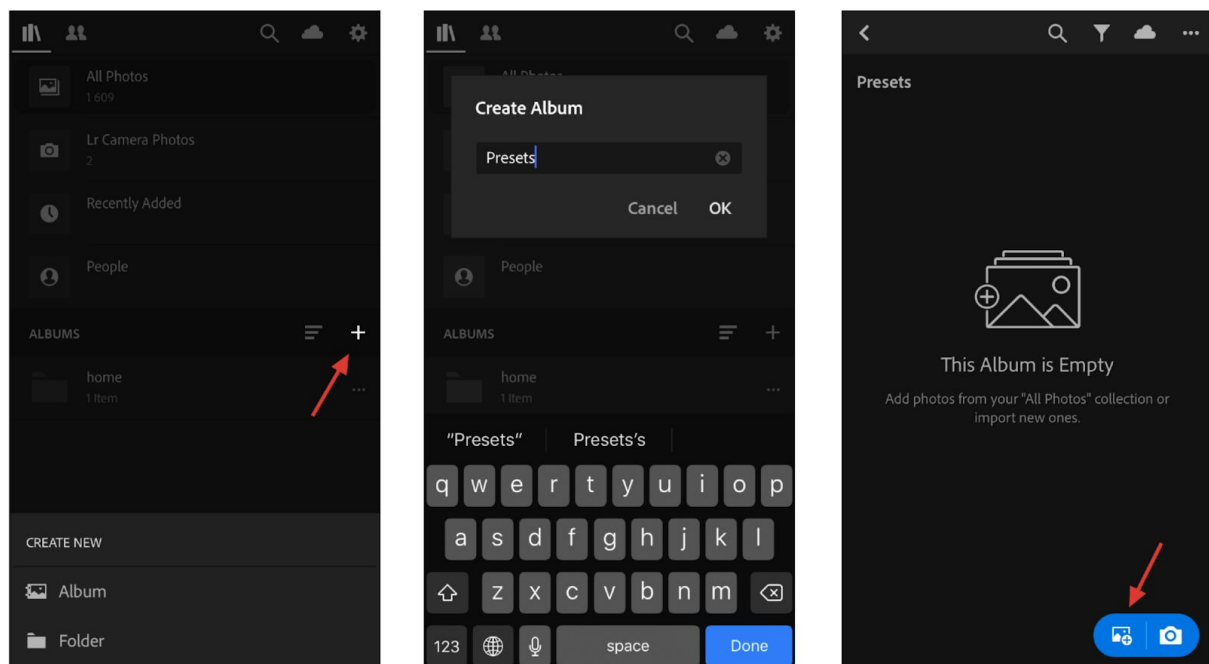

You can download the .dng files right after your purchase by clicking the link sent by Etsy. If you don’t find this section, go to **You > Purchases and Reviews**

You can also download the files on your computer and share them with Airdrop or simply email you the files to yourself and then download and save as images to your camera roll. The photo will be blank but it's normal, so don't worry ;)

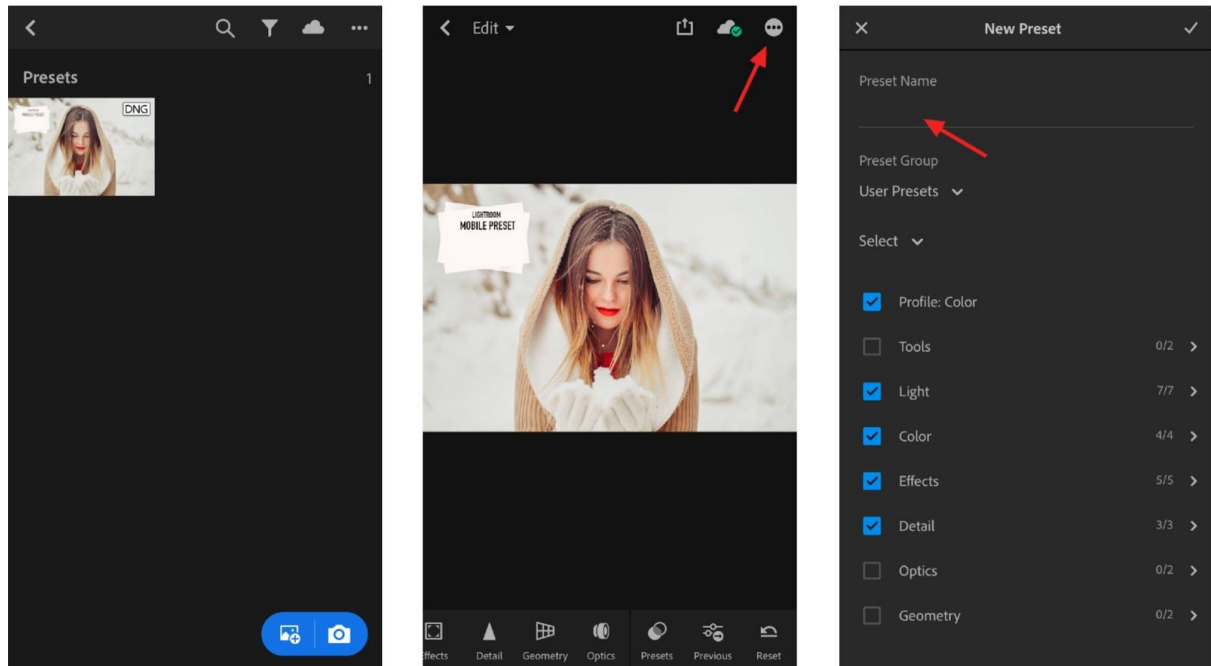

STEP N°3 : Import presets

Now you've downloaded the files on your phone, open the application and create a new Album by clicking on the "+" and name it "**Presets**" to have them all in one place. Then add the files in this album by importing them from your camera roll.

STEP N°4 : Installation of presets

Click on a preset and then on the 3 dots in the top right corner. Choose “**Create Preset**” option and type preset’s name.

STEP N°5 : Apply a preset to an image

To apply the preset, open the photo you want to edit, slide across the bottom menu. Click “**Presets**” icon and under “**User Presets**” you will find all the presets you’ve already added. You can switch between them and pick the one you like the most.

IMPORTANT

Please note that every photo is different and many factors affect the final result as the camera, the lighting, white balance, skin tone, contrast, etc. If your photo doesn’t look perfect to you you may need to change settings as the exposure, saturation or temperature to get best results. All this can be done in Lightroom.

Have fun editing your photos with our presets ! :)
