LIGHTROOM INSTALLATION INSTRUCTIONS

MAC USERS (LR CLASSIC)

1. Download the file and unzip the file and open the resulting folder.
2. This folder will contain the preset you purchased with both Mobile and Desktop Lightroom files. For this instructions please open the Desktop folder and you will see the .lrtemplate extension.
3. Open Lightroom Classic.
4. In the top menu bar click on Lightroom>Preferences.
5. A window will pop up, select the Presets tab within this window.
6. In the Presets section there is a button labels 'Show Lightroom Presets Folder', Click this button.
7. In this new Finder window open the 'Lightroom' folder, and then open the 'Develop Presets' folder.
8. Copy and Paste the purchased Presets folder into this location.
9. Restart Lightroom. The presets can now be found in the Presets section in the left panel in the Develop screen.

WINDOWS USERS (LR CLASSIC)

1. Download the file and unzip the preset file.
2. This folder will contain the present you purchased with both Mobile and Desktop Lightroom files. For this instructions please open the Desktop folder and you will see the .lrtemplate extension.
3. Open Lightroom Classic.
4. In the top menu bar choose Edit>Preferences.
5. A window will pop up, select the Presets tab within this window.
6. Click on the button labeled 'Show Lightroom Presets Folder'.
7. In the new explorer window open the 'Lightroom' folder, and then open the 'Develop Presets' folder.
8. Copy and Paste the purchased Presets folder into this location.
9. Restart Lightroom. The presets can now be found in the Presets section in the left panel of the Develop Screen.

Please note that lightroom presets will show differently on each photo based on colors, tones and lighting. Try adjusting these areas to make the preset work for you.
