

■ HOW TO INSTALL PRESETS IN THE LIGHTROOM MOBILE APP

- Open the Lightroom Mobile App
- Add the DNG Files to your Lightroom Mobile App
- Click on one of the DNG Files, then click on the three at the upper right corner of the screen.
- Click Create Presets from the DNG Files
- Give your preset a name. We recommend to type the same name that is on the front of the DNG Files.
- Do these same steps for each DNG/preset file.

Thank You
