

## HOW TO INSTALL PHOTOSHOP ACTIONS (MAC & PC)

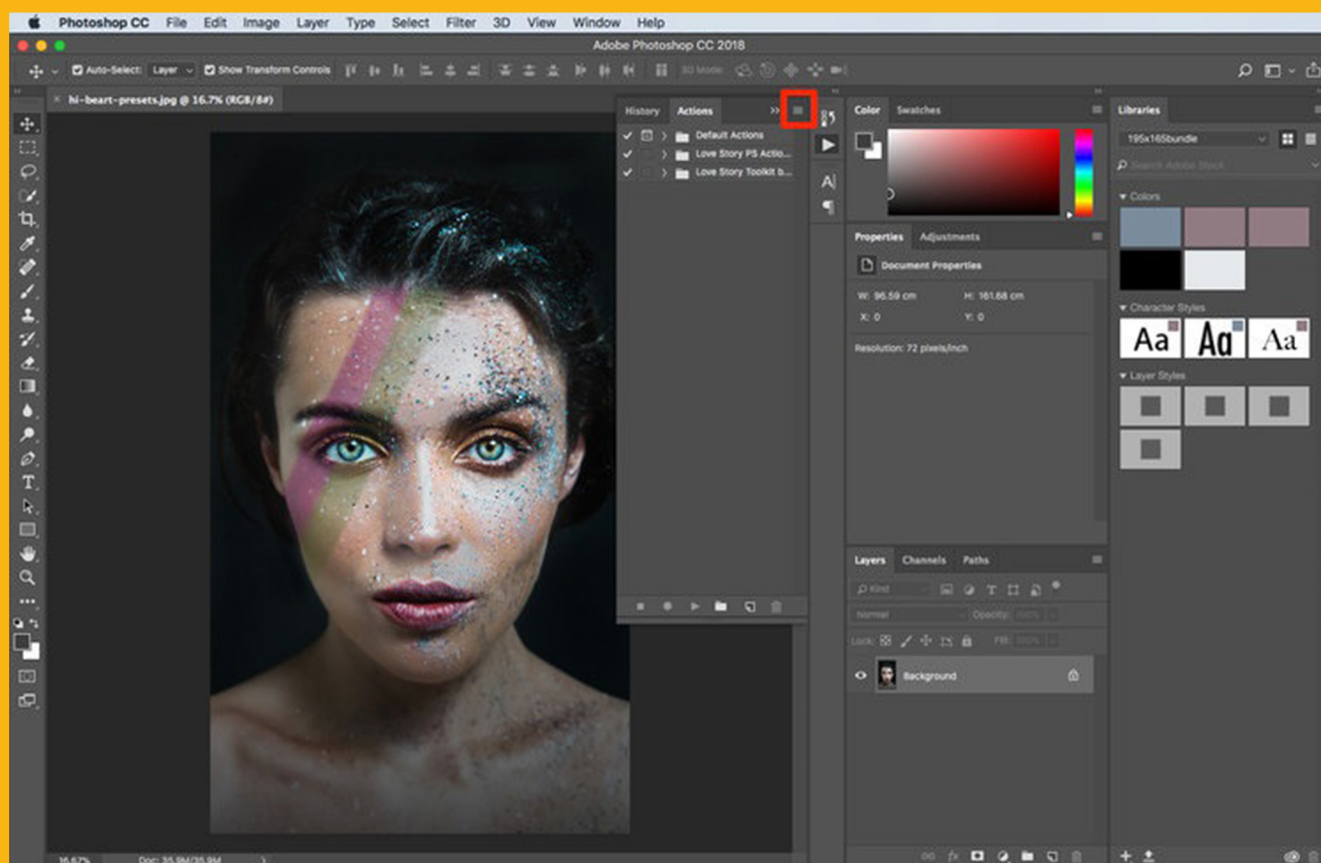

**1. Download and Unzip the actions. Place all your actions in one folder. Keeping them in one place will make it easier to organize and locate them.**

**2. Open Adobe Photoshop.**

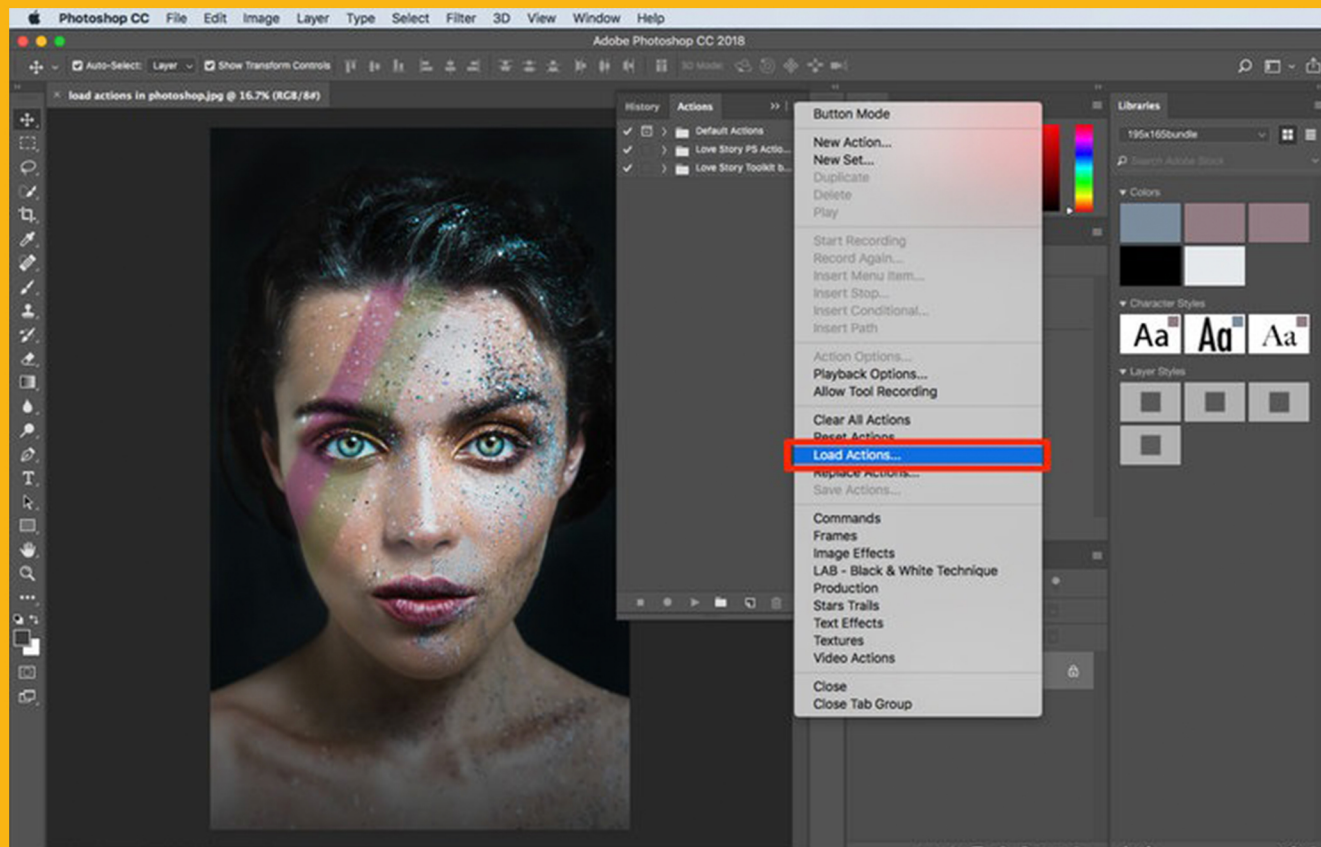

**3. Click "Actions" Under the "Window" button. A checkmark should appear next to it and an Actions window should open.**

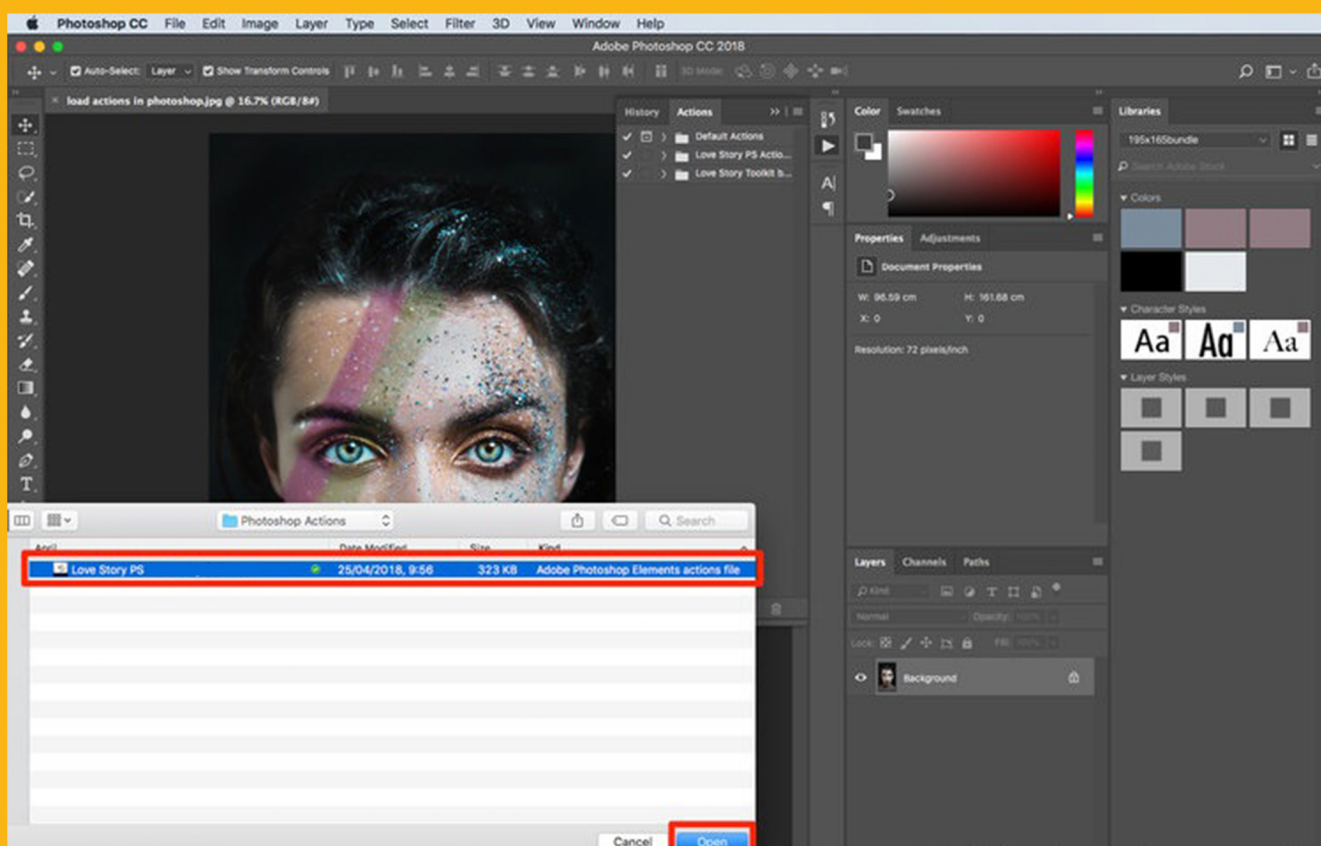

**4. Click the Tab Group small button.**

**5. Select "Load Actions".**

**6. Locate the Action you want to use - you can only load one at a time - and click "Open".**

**7. Check the box of the action you want to use and hit the "Play" button on the bottom of your layers window.**
