HOW TO USE PRESET?

You can apply the presets in variety of ways! We will teach you some of these. Please don't forget to send us a message if you have any questions. We also recommend to watch youtube videos out there. There are tons of them promise!

*Lightroom Mobile in iOS 14

When you launch your Lightroom Mobile App, you should see your shiny new DNG files together with your photos! Yes, those squary colorful ones are from us!

Please note that we are using iOS 14 on an iPhone X at the time of documentation, it may vary at the time of your purchase. Same concept should be applied if you are using an Android device.

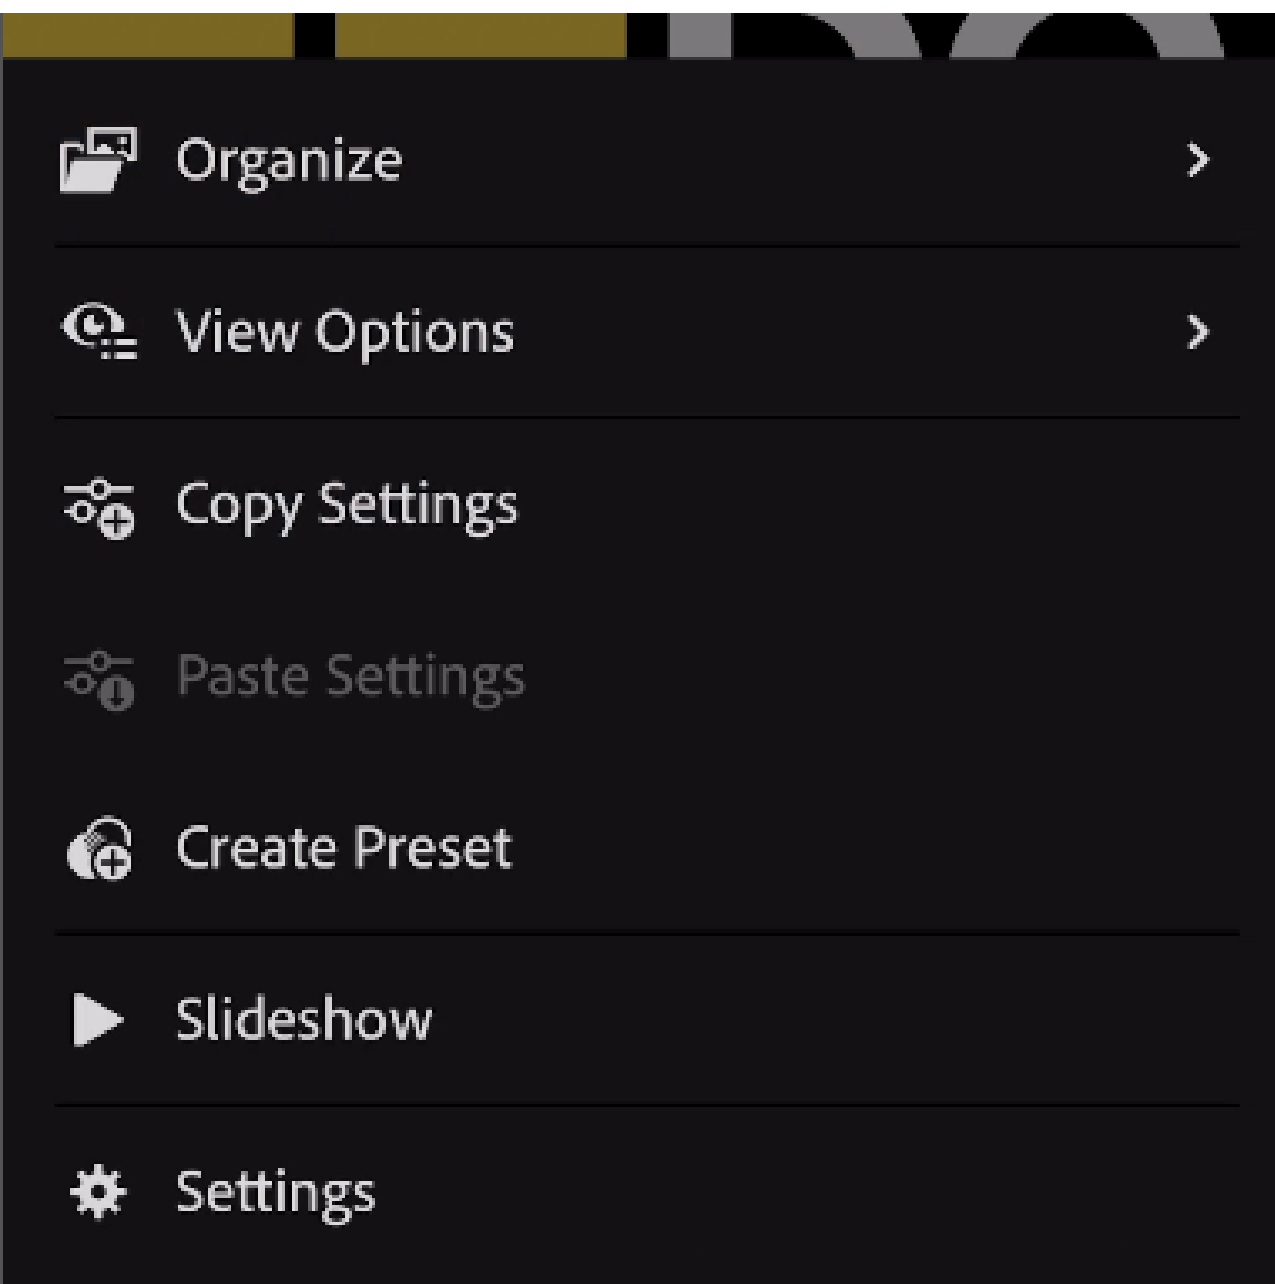

MENU

**YOUR DNG
FILE OR THE
PHOTO YOU
ARE EDITING**

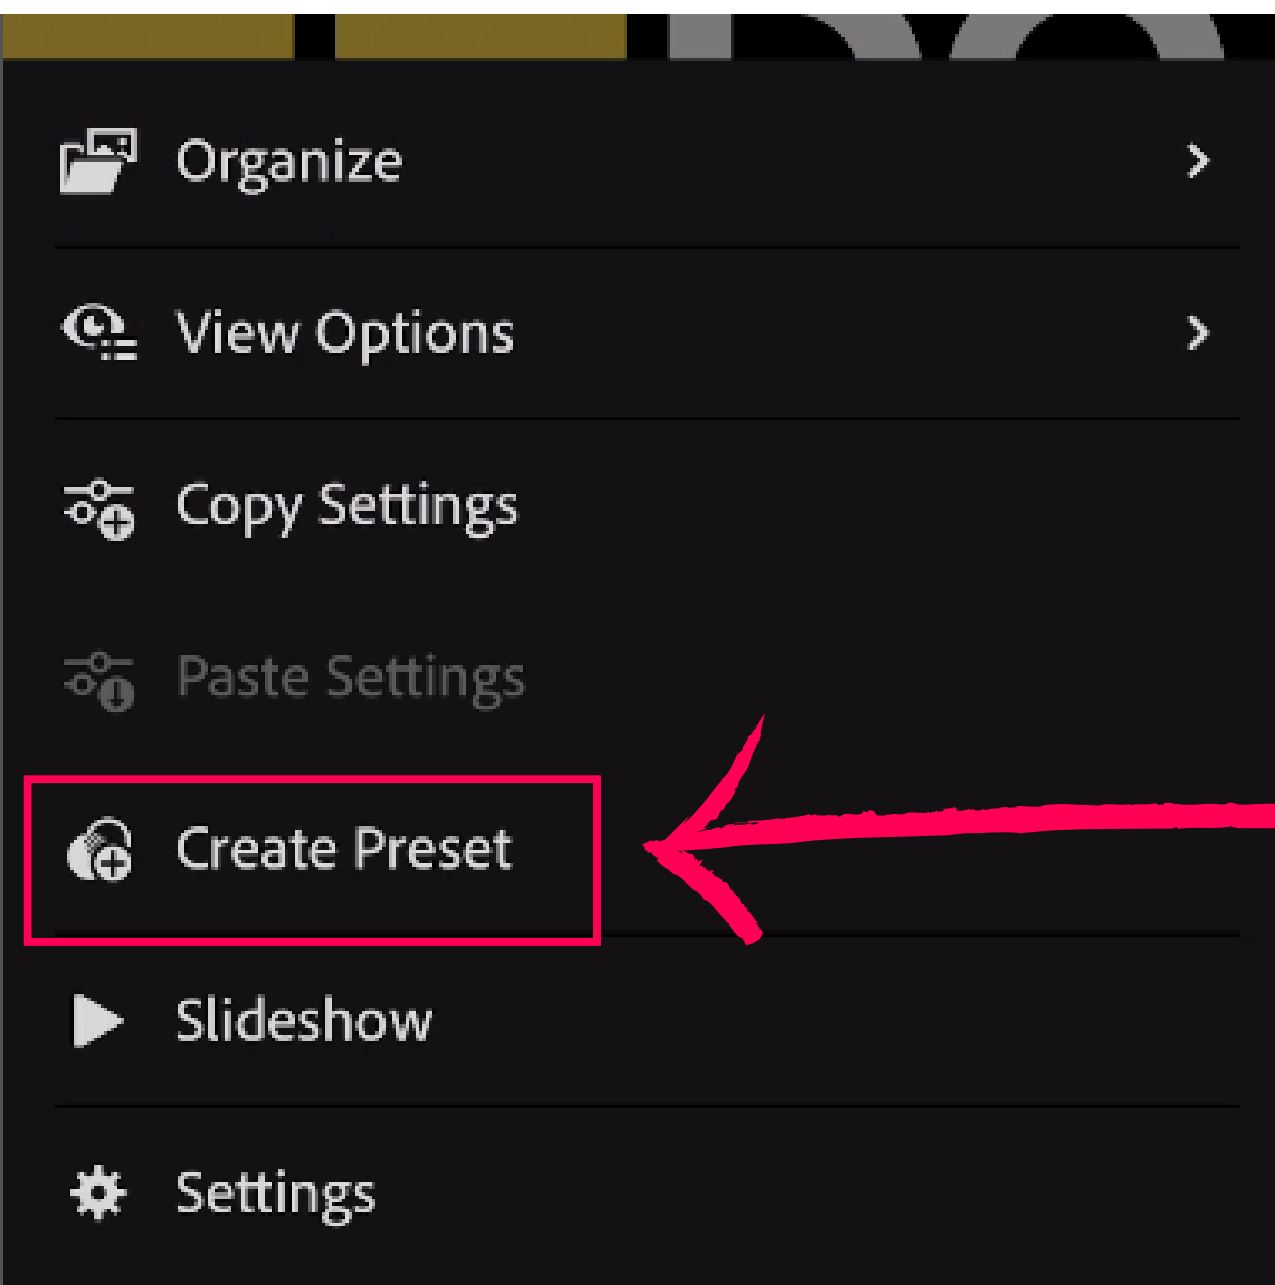

Select one of those
and you will be
directed to THIS image
editing page.

TOOLS

Tapping on the menu will bring some options. From here you can simply "COPY SETTINGS" of your DNG file to use it right away. Then OPEN another image then do the same, but this time, you should "PASTE SETTINGS". You will immediately see the changes in the image. You can now share it to anywhere you want!

But sometimes, this method is repetitive specially if you are applying the preset to more than one image. We will teach you how to Include your new preset in the tools so that you can save time in editing!

From the same menu, tap on **CREATE PRESET**. This will copy all the settings from the DNG you downloaded from us and lets you organize your presets as well! So that the next time you want to use a preset, it's just right there on the tools and Pretty well organized! This is very handy if you have lots of presets downloaded.

Name your lovely preset!

If you want, you can also Create a New Group for Each type of Preset you have. Example if you have presets for Summer, Winter, Black and White! Stay organize captain! Just tap on the Arrow.

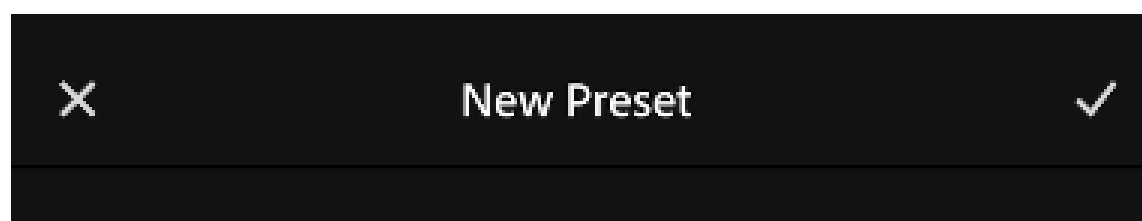

Please do not touch anything in this section! You have been warned :)

Here you can see I have created bunch of Preset Groups for my needs! Just tap on Create New Preset Group to create new one!

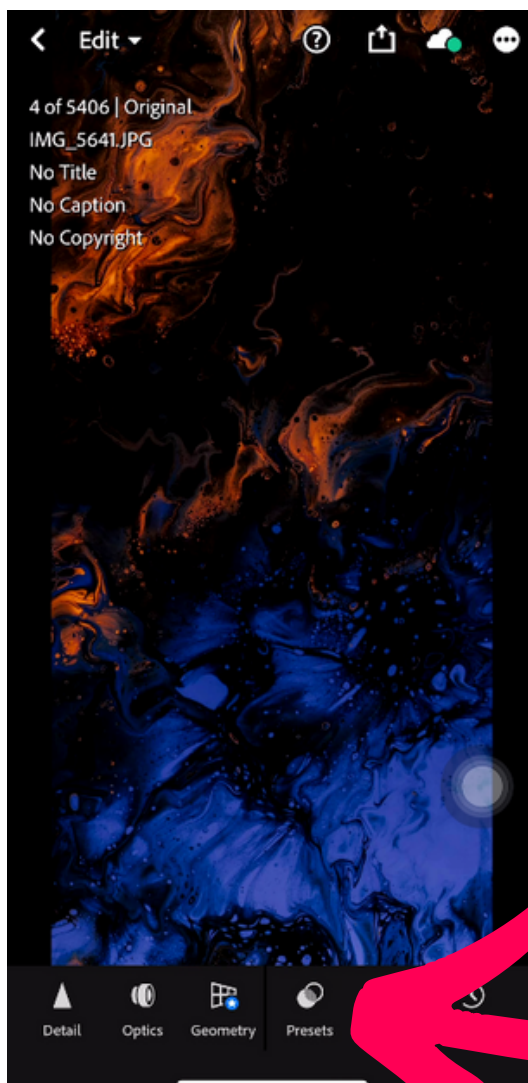

Name your awesome new Group!

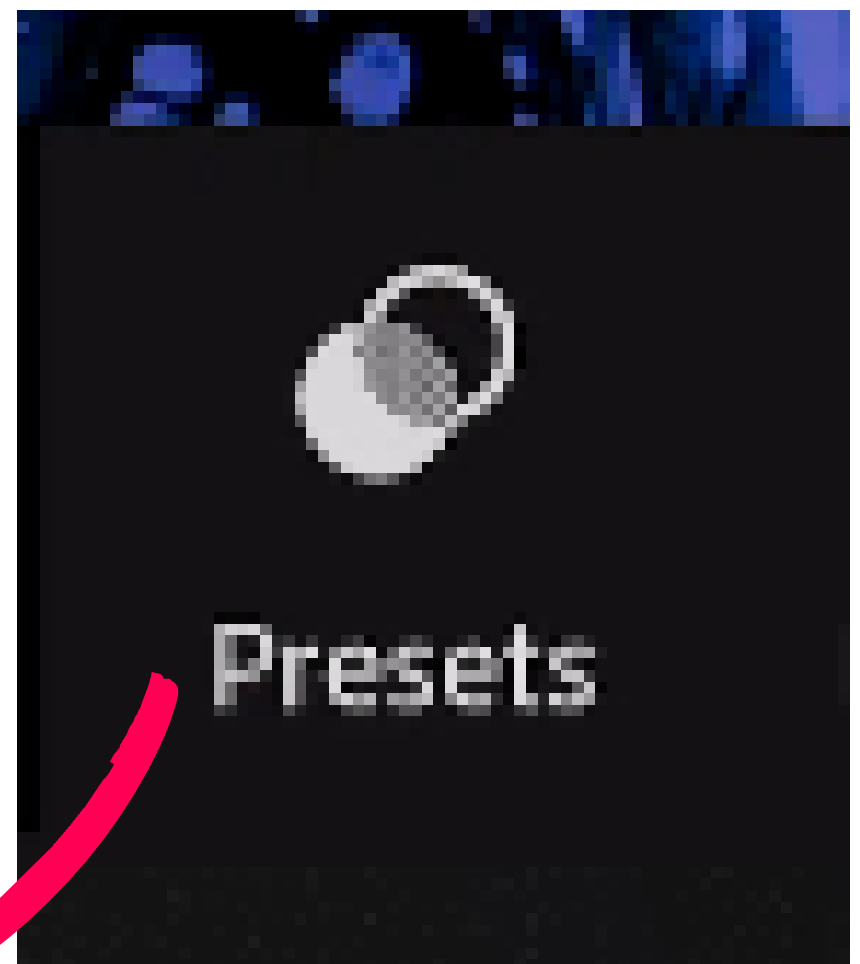

to confirm, just tap on the check mark!

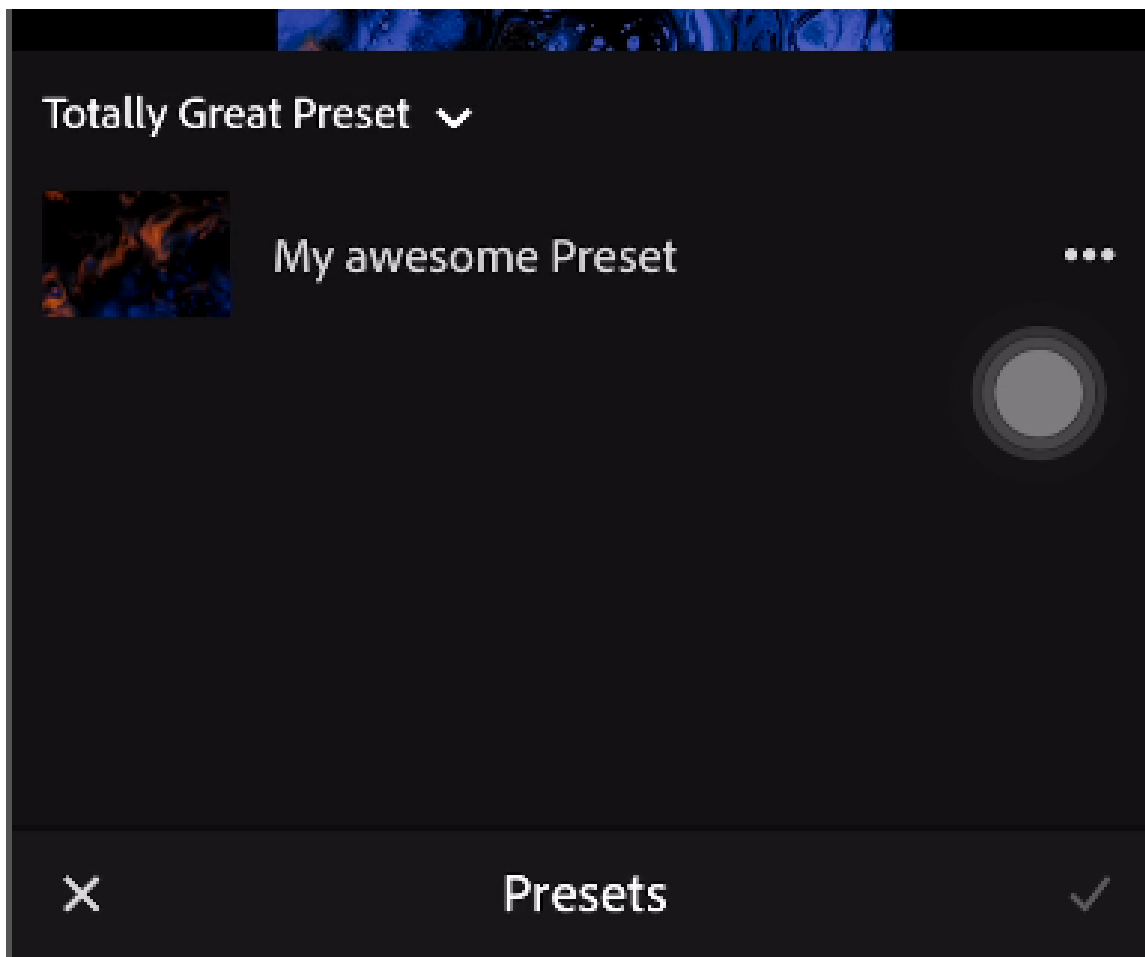

Charaaan!!! You will see something like this after successfully created a Preset and added it to a preset group!

Now to apply your new preset, just select the photo you want to edit, then scroll on the bottom menu until you find the presets tool.

Similar to this will
pop up and you
can select the
presets you just
saved!

TIP!

To see the Before and After, just Tap and Hold to the image and you will see the difference.

RECOMMENDED:

We recommend to adjust the Temperature and the exposure to get the best result!

NOTE:

Using the preset does not guarantee great result! It always depends on many different factors like:

- Image Quality
- Exposure
- camera used

Please if you have blurry image and expecting to make it better, you are on the wrong side of the road! We recommend to use the HIGHEST QUALITY image as much as possible!

Thank you for your purchase! We hope that
you enjoy your new preset! We are
encouraging you to Rate and Review and
showcase your awesome photo in Lazada!
This will help us a lot!
