

Hello,

❤️🙏 **THANK YOU** so much for buying my presets! May it help you to be creative with your photos. 🙏❤️

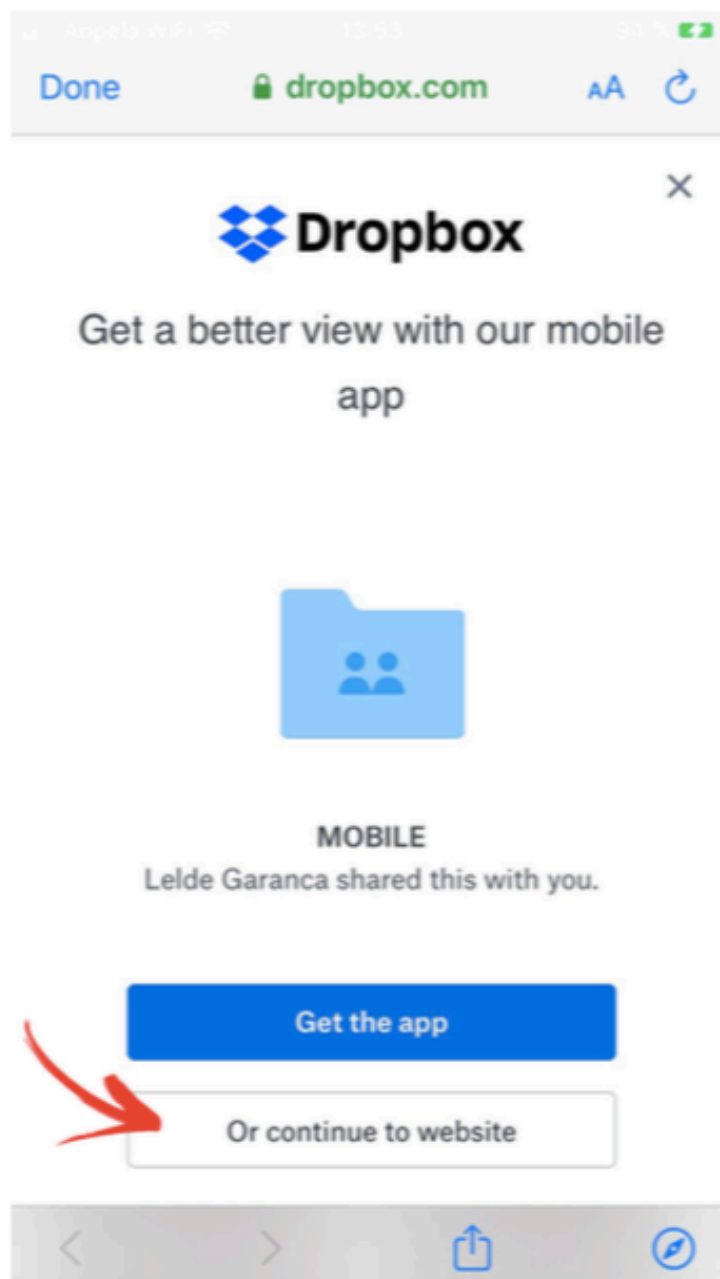

Let's get you all ready and set up!

**TO INSTALL FOR LIGHTROOM MOBILE** let's try to do this step by step:

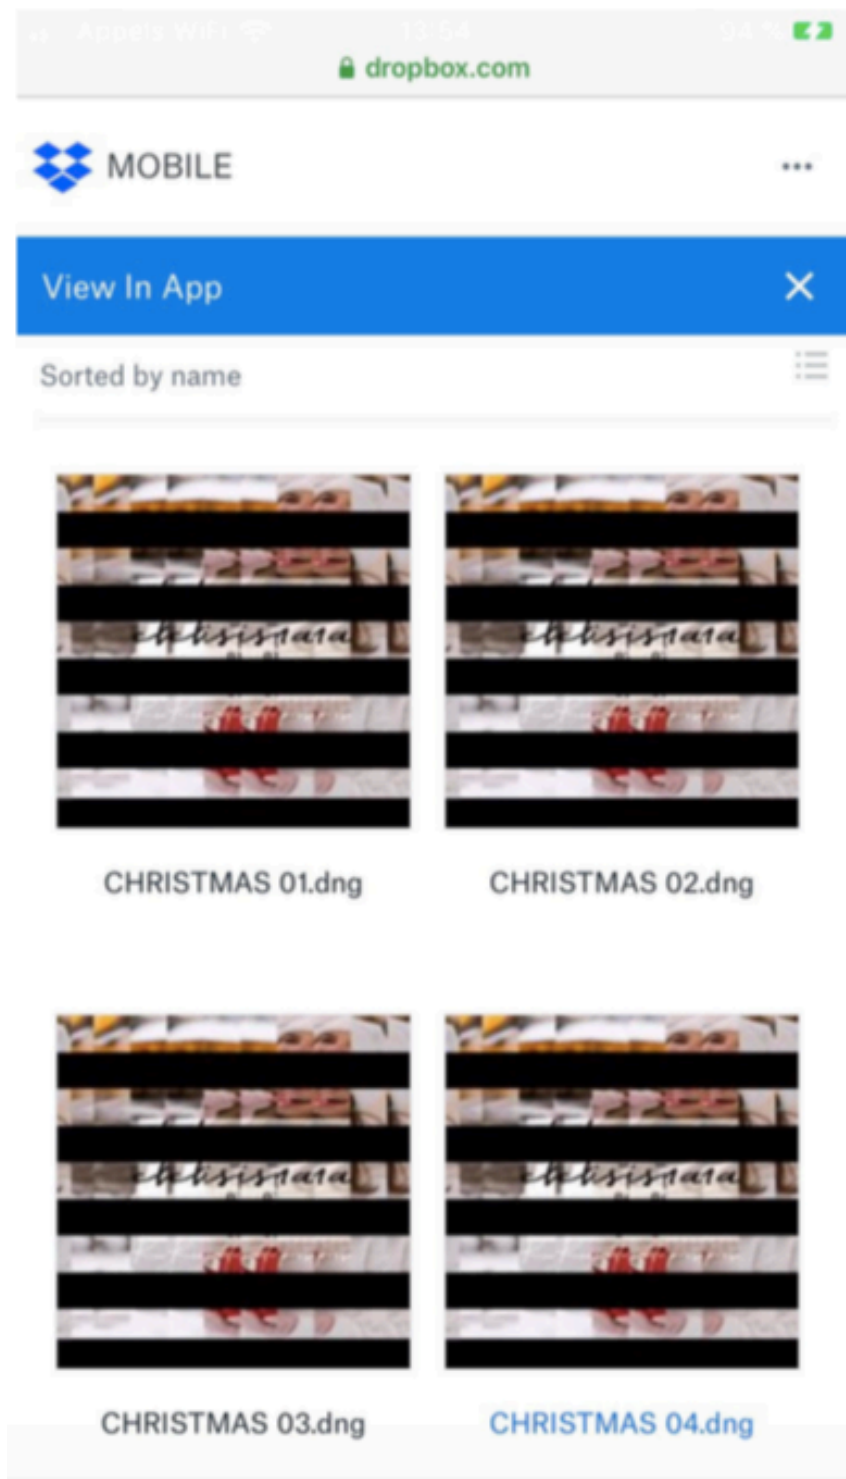

**STEP1 Click on a download link:**

<https://www.dropbox.com/sh/xlklaa0x266xw68/AAAPRDlpqYx4zPOZCDf8G5tRa?dl=0>

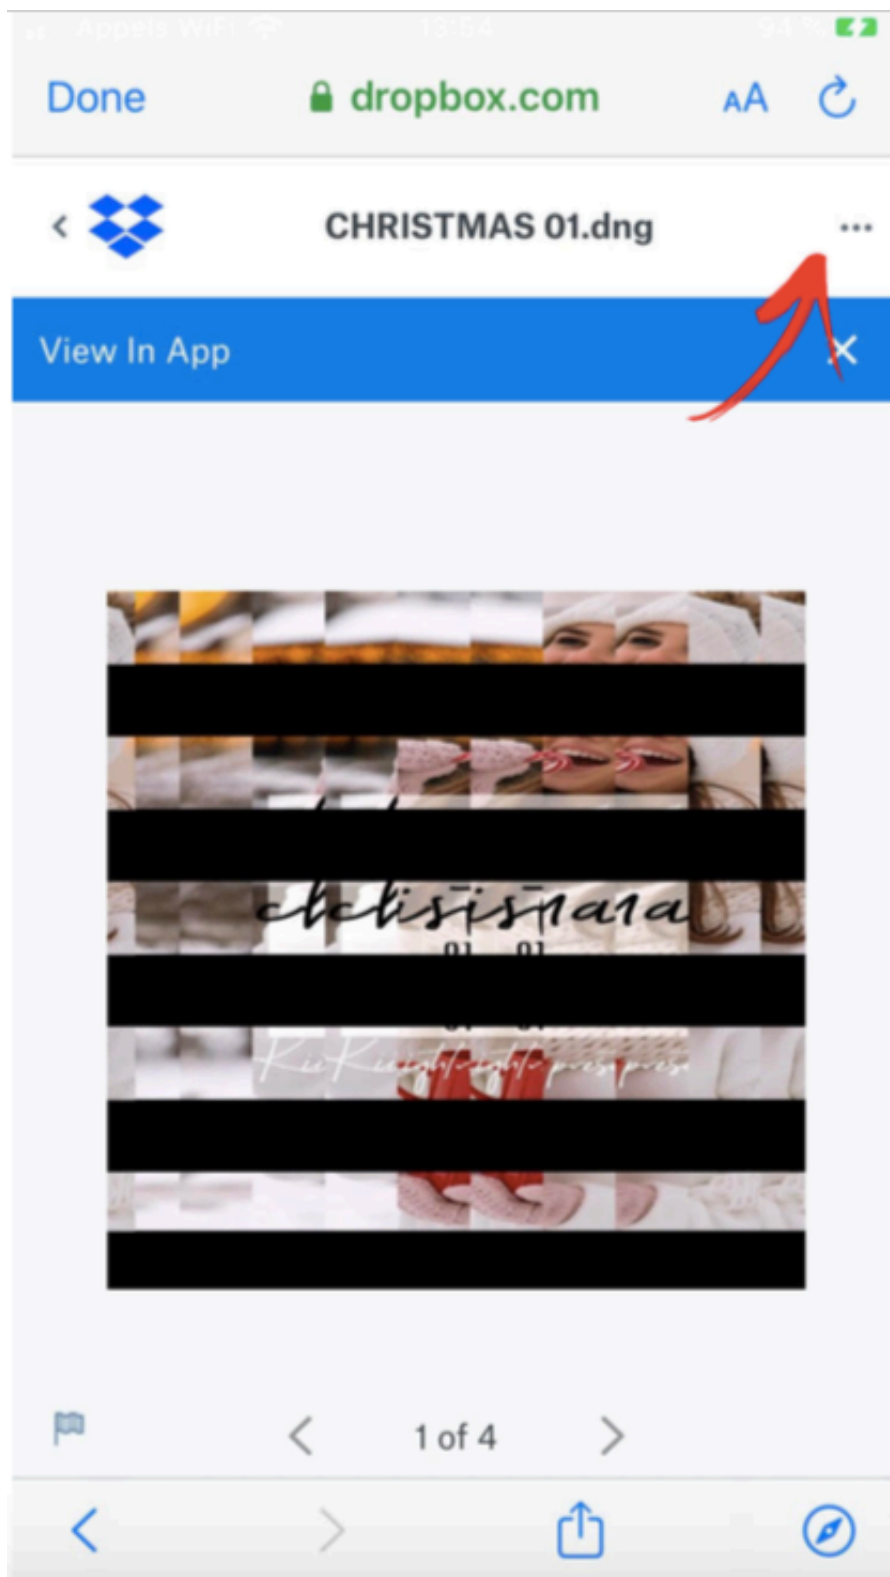

Click on the text that says **"Our continue to website"**.

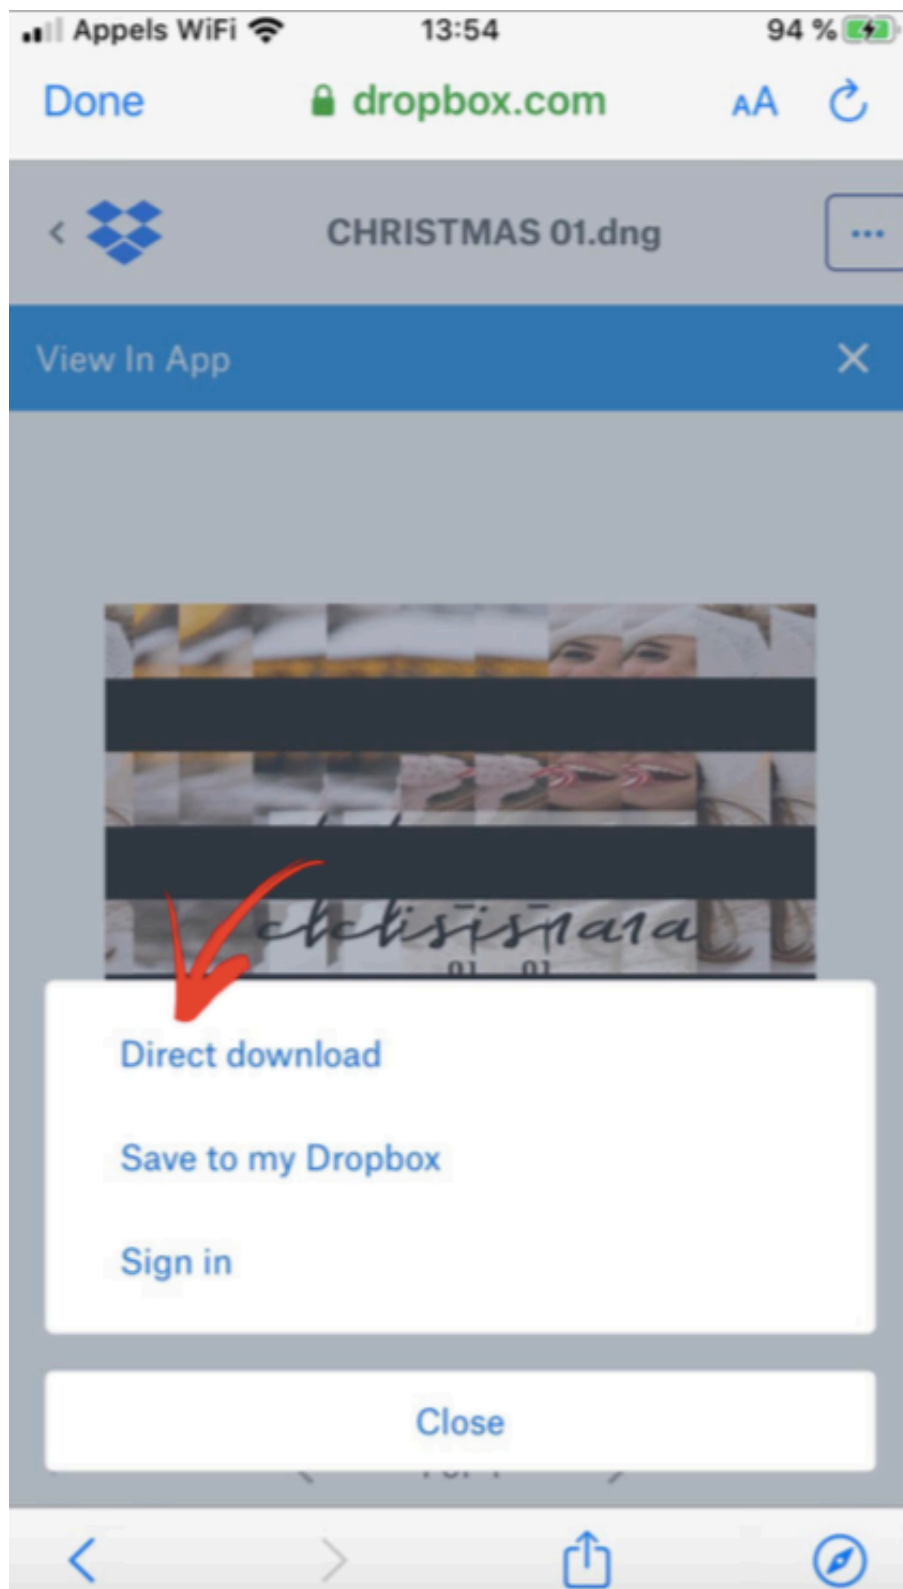

It will open a Dropbox folder with files. **DO NOT worry**, if you see files like this - with the stripes over them. **It's all good!** Click on the file ending with “.dng”, it will open a new window.

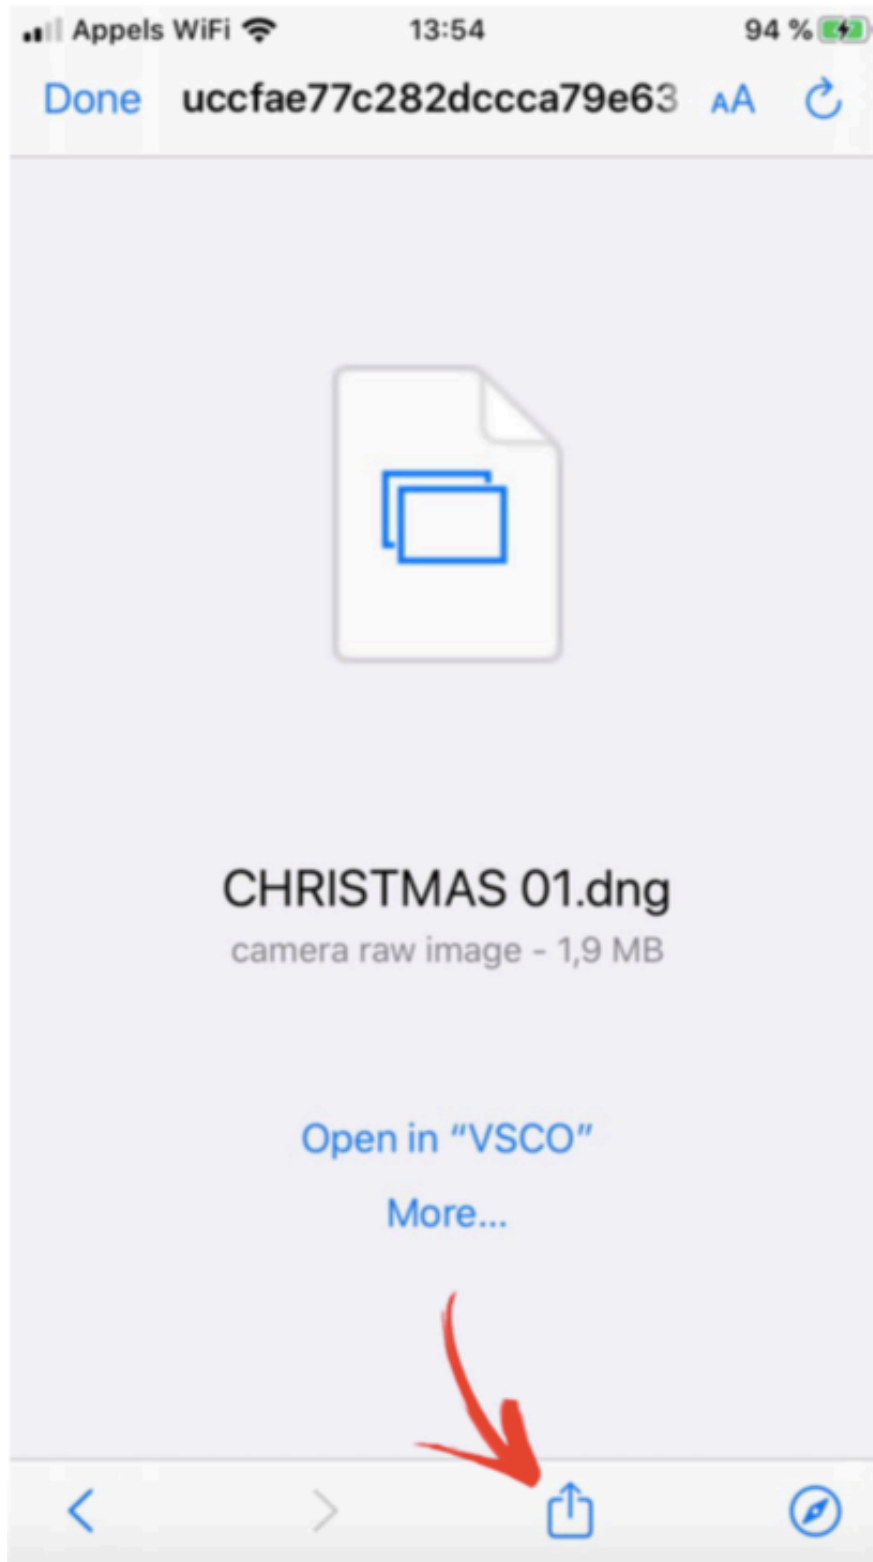

Click on the 3 dots on the top right corner.

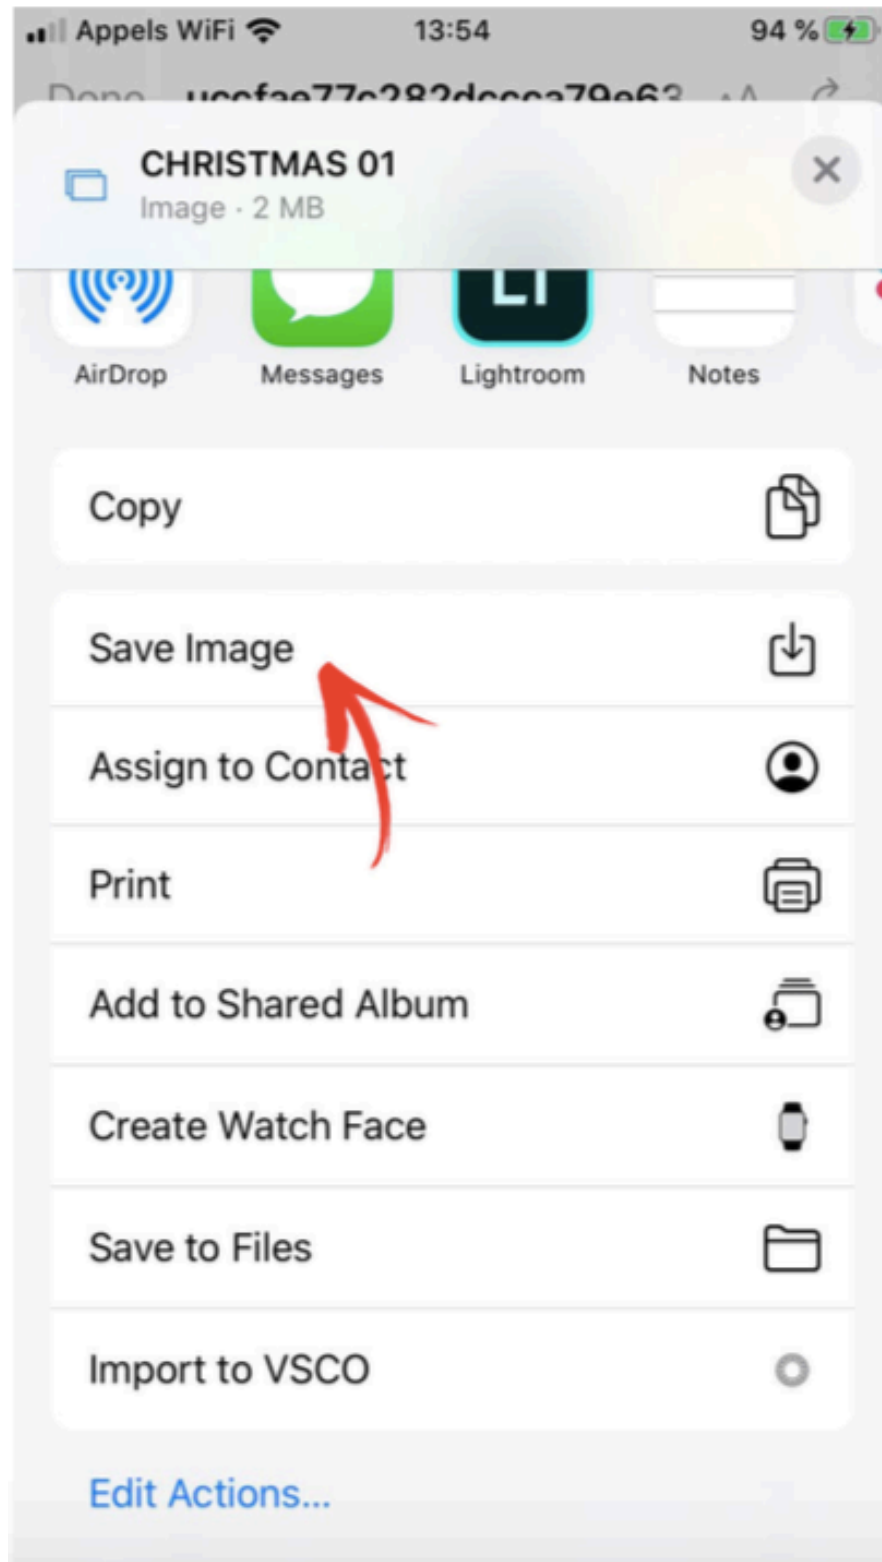

The download option will pop up. Select **“Direct Download”**. It will open the file in a new window.

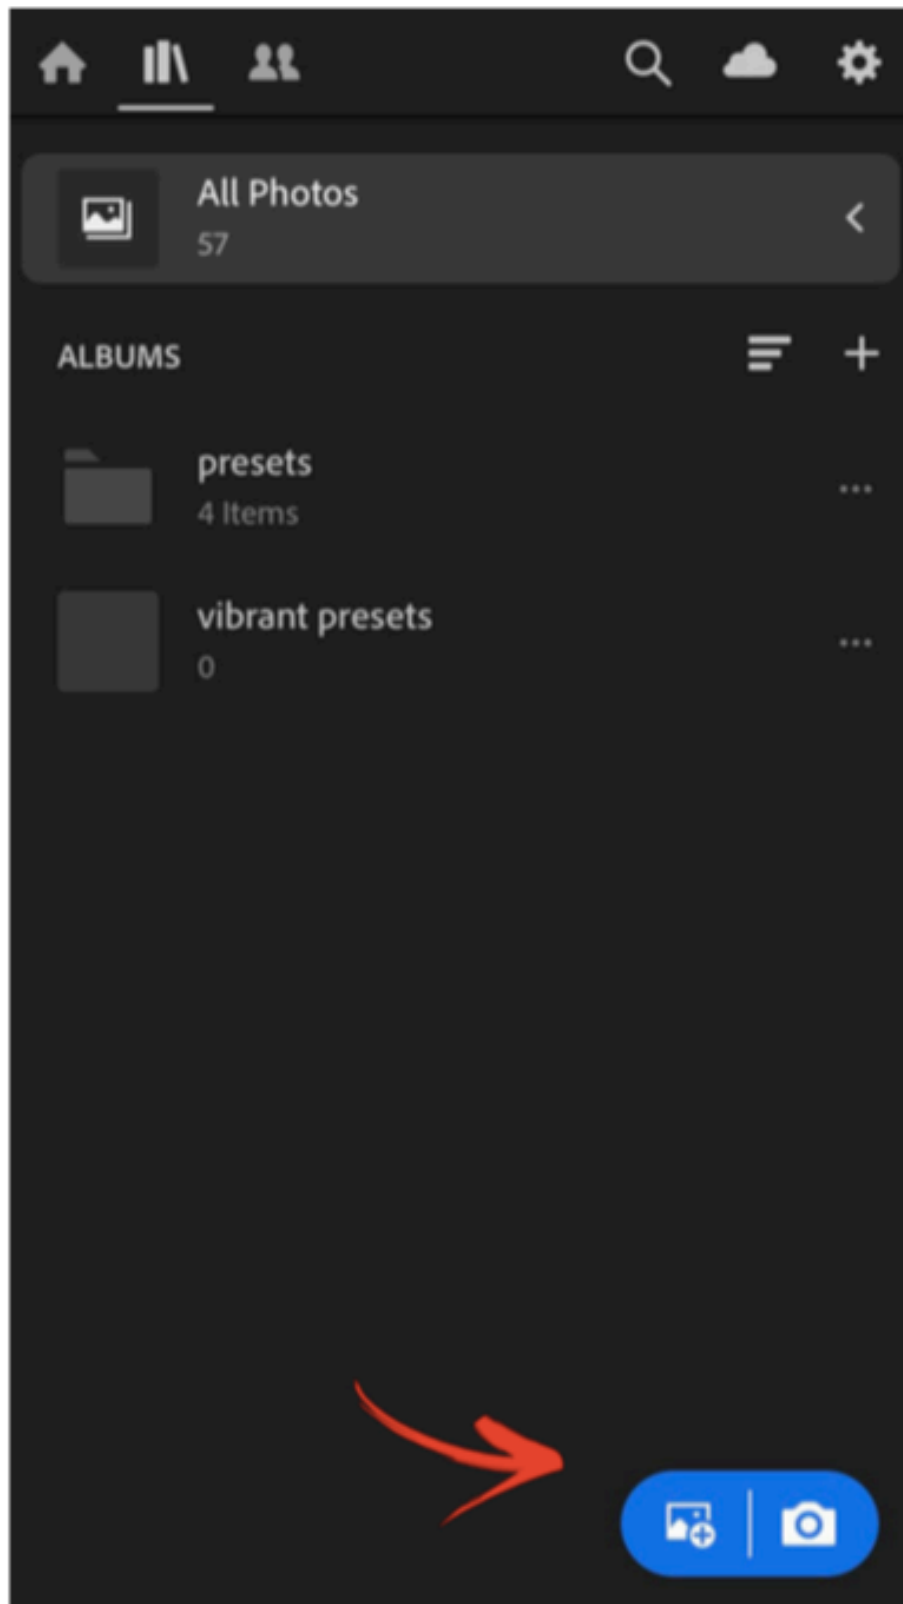

Click on the **file + arrow** icon.

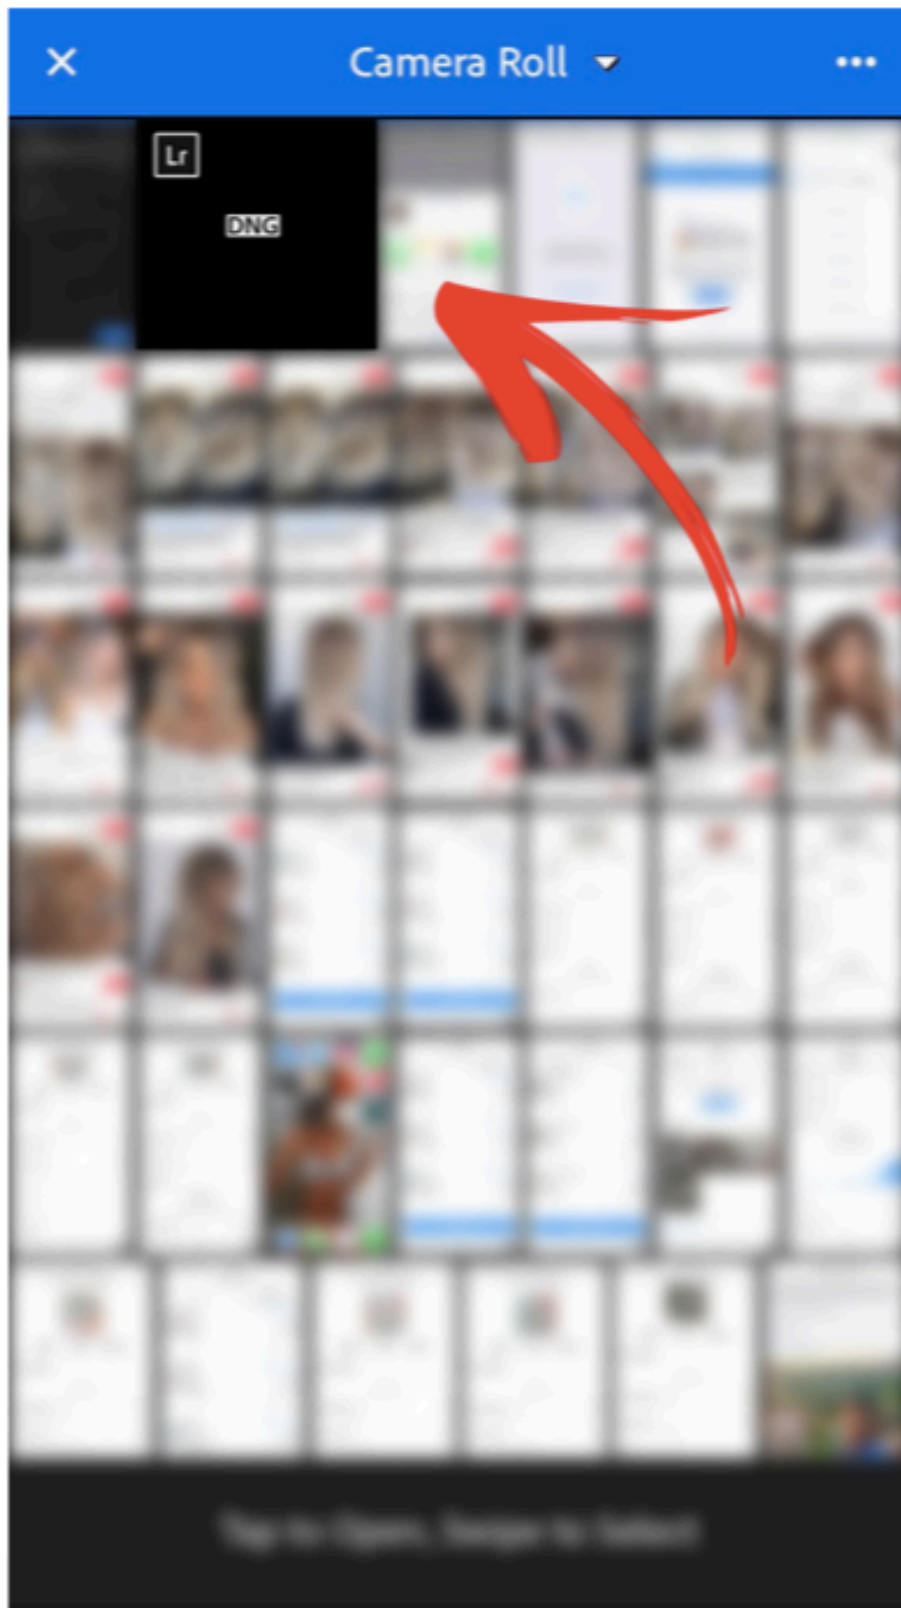

Click on **“Save Image”**, it will save the file on your camera roll. It will look blank (again, this is normal). Repeat this with all the other “.dng” files.

**STEP 2.** Open the **LIGHTROOM** app & click on the **image +** icon to import presets you have just downloaded.

Select **DNG** files you just downloaded from your **Camera Roll** and import those in the app.

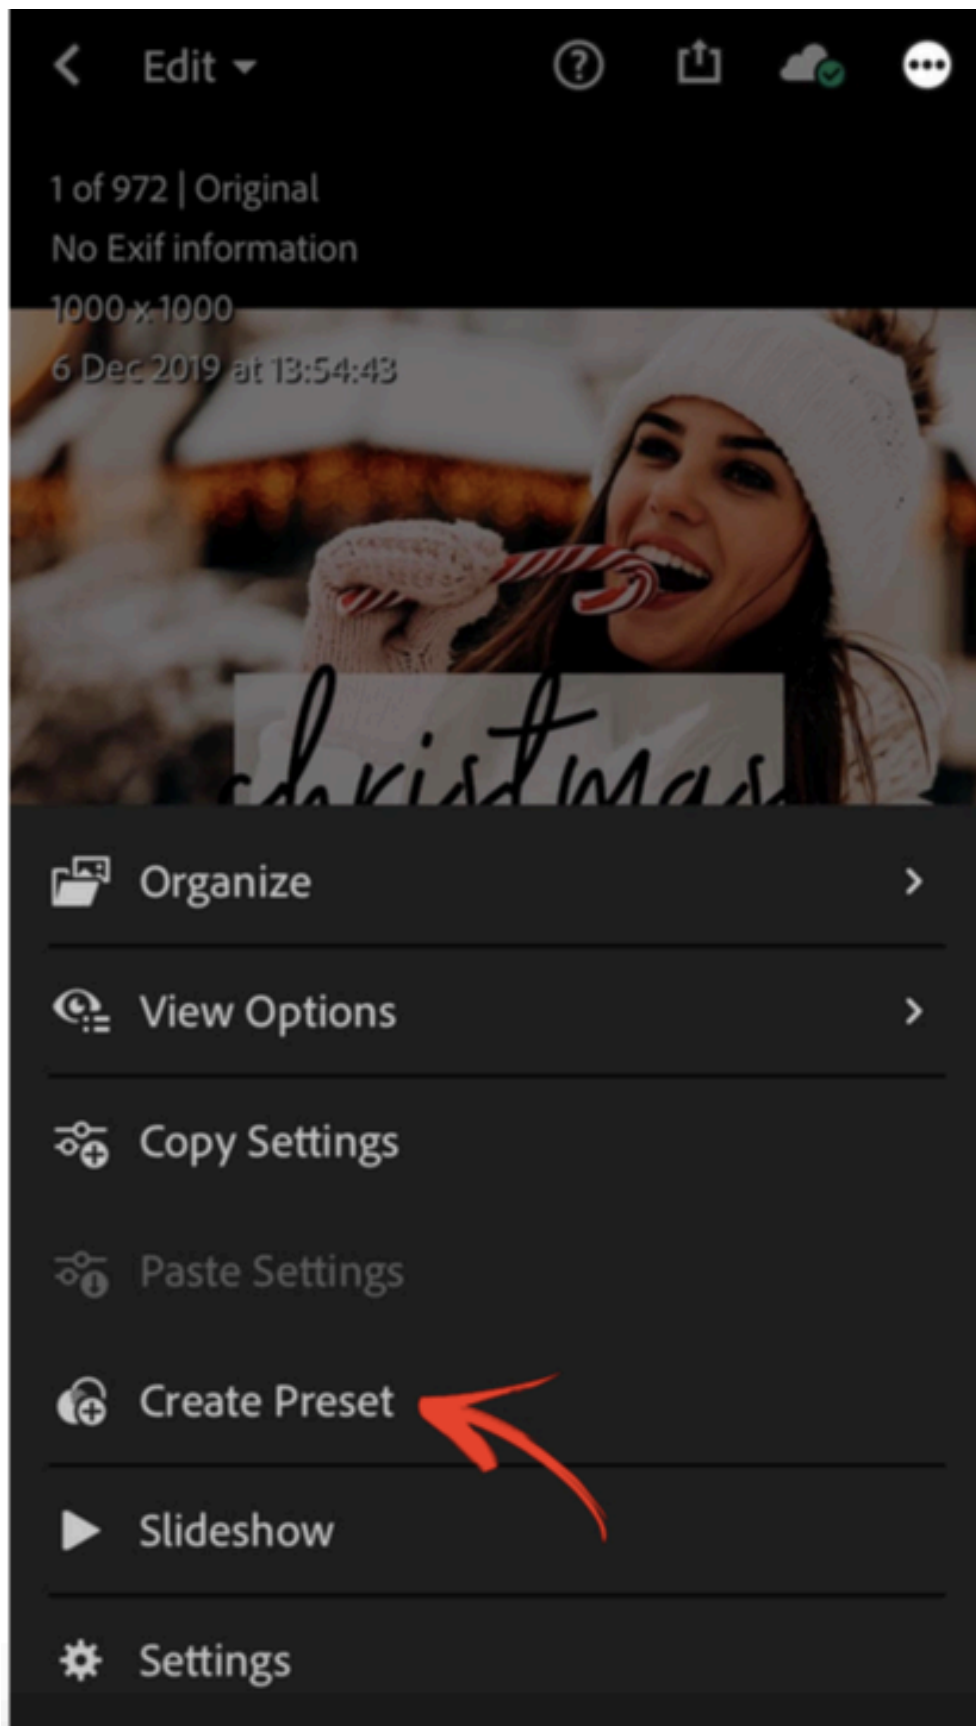

**STEP 3.** Click on the **DNG** file you just imported. Click on the 3 dots on the top right corner.

Select **“Create Preset”**.

Name the preset accordingly to the DNG file. Select a folder where you wish to add this preset to. You can also create a new folder. This will be important later, so you are able to find the presets. Click on the tick icon. **YAY! YOUR NEW PRESETS HAVE JUST BEEN CREATED!**

**New Preset**

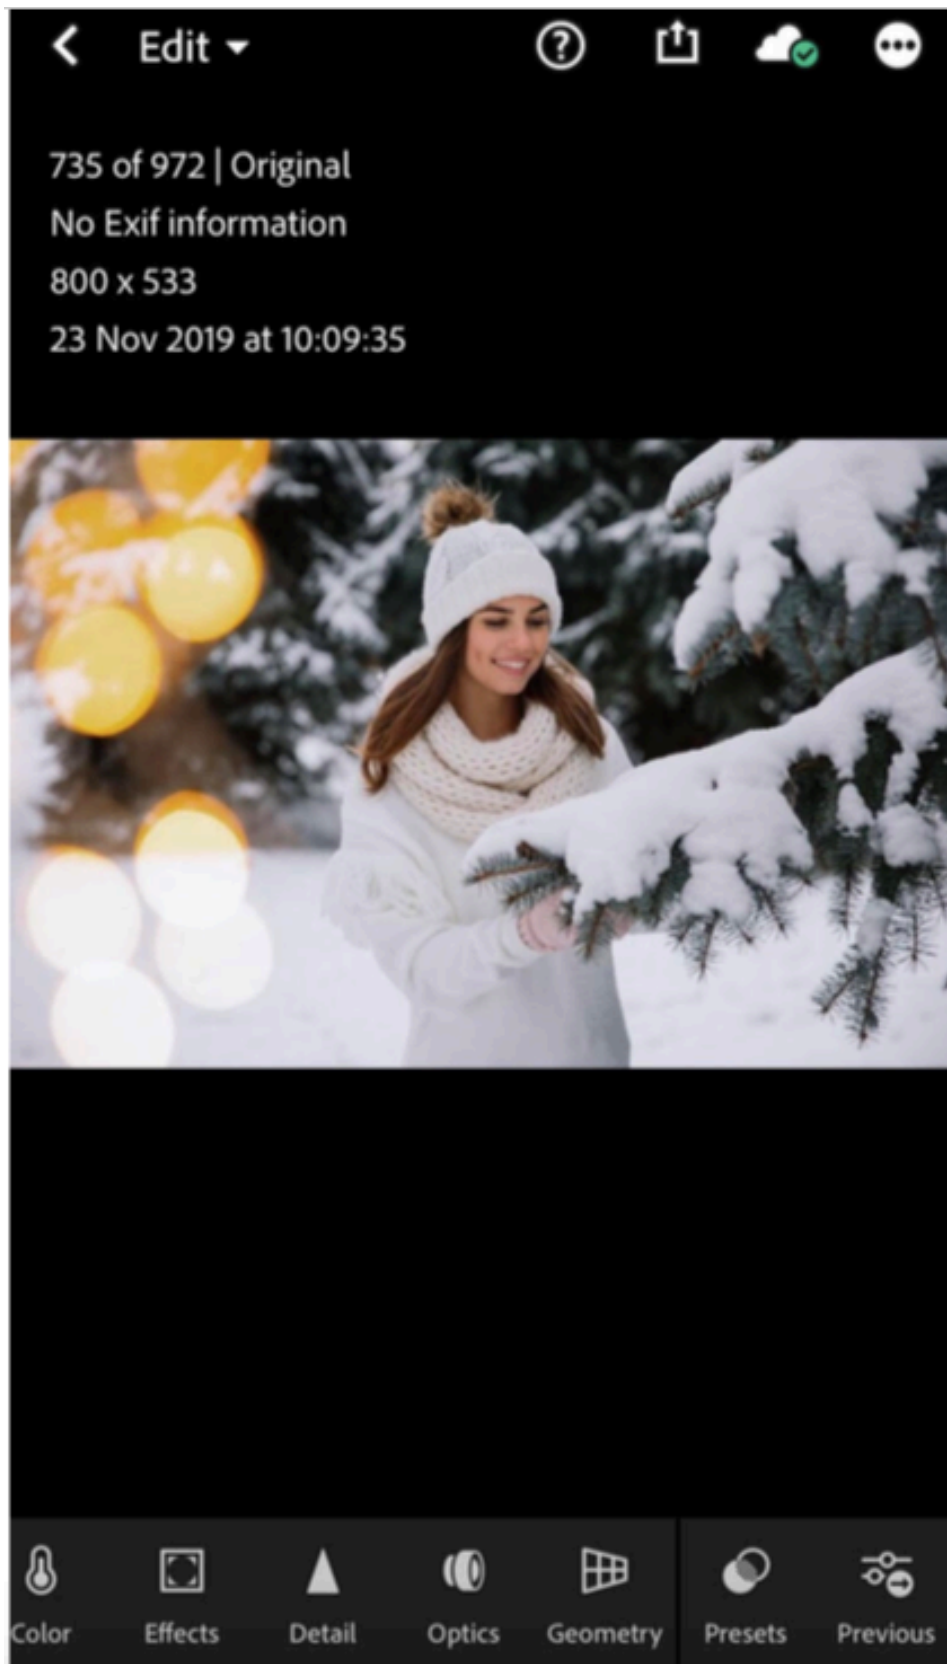

Preset Name  
Xmas 01

Preset Group  
User Presets

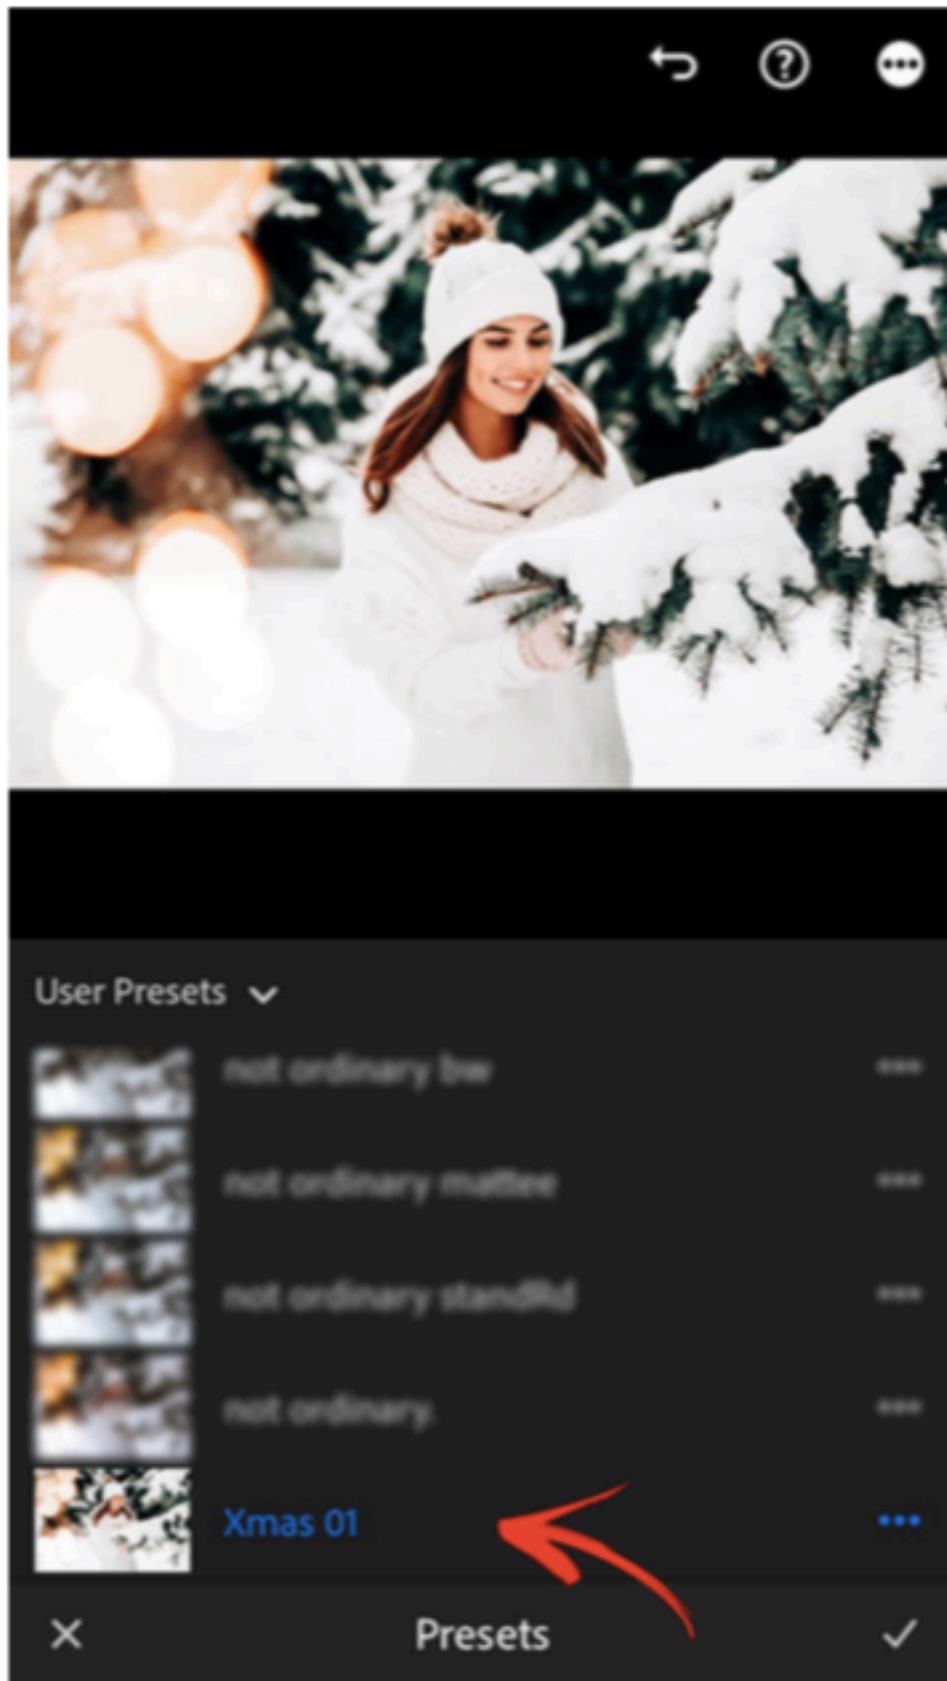

Select

- ☒ Profile: Color
- ☐ Tools 0/2 >
- ☒ Light 7/7 >
- ☒ Color 4/4 >
- ☒ Effects 6/6 >
- ☒ Detail 3/3 >
- ☐ Optics 0/2 >
- ☐ Geometry 0/2 >

**STEP 4.** Click on the image you wish to edit. Select from the bottom slider “presets”.

Select the folder where you saved the presets, and click on the preset in order to edit the image.

**STILL STRUGGLING?** 🙋
