How To Install Photoshop Actions

Method 1:

1. Download your Photoshop Actions file.

2. Save the .zip file to your desktop.

3. Make a backup copy somewhere.

4. Open the .zip file, usually by double-clicking it. This should produce a folder containing the contents of the .zip file on your desktop. Once you've done that, the easy method goes something like this : 1. Double-click the .atn files within the folder you've just unzipped/created 2. There is no step #2. Your actions should be loaded into the Photoshop Actions Palette.

Method 2:

1. Open Photoshop, and click on windows tab and check on actions or press alt + F9 and then click on the Actions Palette menu button (located in the top-right of the Actions Palette).

2. Select "Load Actions".

3. Select one of the .atn files from the download.

4. Repeat for the other .Atn.

Thanks
