

CITYTURTLES LUTS

VIDEO LUT INSTALLATION GUIDE

@cityturtles

THANK YOU

First off, I'd like to thank you wholeheartedly for purchasing from my store. By purchasing these LUTs you are also supporting me and my work, and that means the absolute world to me!

All of my LUTs are handmade from scratch and designed to be versatile to be used on both indoor and outdoor video footage. I wanted to create a set of LUTs that work well on all types of photography. You can use these for your lifestyle, travel, portrait, pets, and other creative work.

LUTs are one of the most amazing tools to use because the vast majority of editing software out there is compatible with .cube files! I'm talking Adobe Premiere Pro, Final Cut Pro, DaVinci Resolve, Photoshop, Sony Vegas, Filmora, and many more!

With that said, I can't wait for you to try these out on your project!

HOW TO APPLY LUTS

Adobe Premiere Pro

1. Open the Color workspace by clicking the 'Color' tab in the top center of Premiere Pro
 2. Click on the clip you want to work with.
 3. In the Lumetri panel, open the Basic Correction tab.
 4. Select the 'Input LUT' dropdown menu, and click 'Browse'
 5. Choose the LUT you want to use from your downloads.
- Here's a helpful [video tutorial](#) if needed.

Adobe Photoshop

1. Open the image you want to use and duplicate the layer. This will allow you to adjust the opacity of the LUT.
2. From the menu, select Image < Adjustments < Color Lookup
3. In the popup menu, select 'Load 3D LUT'
3. Choose the LUT you want to use from your downloads.
4. Adjust the intensity of the LUT by using the opacity slider of the duplicated layer.

Final Cut Pro (v10.4 + newer)

1. Open the 'Effects' browser and select 'Color'
2. Select the 'Custom LUT' effect and apply to your footage.
3. In the 'Effects' control tab, select the 'LUT' dropdown menu and click 'Choose Custom LUT'
4. Choose the LUT you want to use from your downloads.
