INSTALLATION GUIDE

COMPUTER + IPAD

Start by downloading your Procreate brushes and unzipping them on your computer.

In the Brush Set folder you will see a single **.brushset** file. This is a new format allows you to install a set of brushes all at once.

You'll need Procreate version 4.1 or higher to install **.brushset files.*

In the Individual Brushes folder you will see a collection of files each with **.brush** after them. This is the standard Procreate **.brush** format allows you to install one brush at a time.

** Use this option if you have an older iPad or Procreate version 4.0 or earlier.*

Installing Procreate Brush Sets (.brushset)

Using AirDrop

If you have a Mac (macOS 10.11 or higher), you can AirDrop the brush set directly from your Computer to your iPad. This transfers and installs the brush set all in one step!

Using Dropbox

Transfer the file(s) ending in **.brushset** from your computer to your Dropbox folder. You might want to put all of your Procreate brushes in a specific Dropbox subfolder.

On your iPad, open the Dropbox app, then navigate to the folder where your brush set is located. Tap on the brush set file, then click the small [...] icon and click Export. Click Open In... and tap Copy to Procreate.

Now, when you open Procreate, you'll see your new brush set at the top of your brush library.

Installing Procreate Brushes (.brush)

Using AirDrop

If you have a Mac (macOS 10.11 or higher), you can AirDrop the brush directly from your Computer to your iPad. This transfers and installs the brush set all in one step!

Using Dropbox

Transfer the file(s) ending in **.brush** to your Dropbox folder. You might want to put all of your Procreate brushes in a specific Dropbox subfolder.

On your iPad, open the Dropbox app, then navigate to the folder where your brush is located. Tap on the brush file, then click the small [...] icon and click Export. Click Open In... and tap Copy to Procreate.

Now, when you open Procreate, you'll see your new brush(es) in a set called "Imported" at the bottom of your brush library.

IPAD ONLY

Download your Procreate brushes and unzip them on your iPad. You can unzip a file on an iPad using a third part app such as [FileExplorer](#) or [ZipApp](#)

1. After unzipping the files on your iPad, you'll be able to locate the [.brush](#) or [.brushset](#) files on your iPad in your Files app in the On My iPad location.
2. Navigate to the [.brush](#) / [.brushset](#) file(s). In the top right, tap Select, then select one of the brush/brushset files (Note: [.brush](#) files can only be installed one at a time.)
3. Tap Share at the bottom left
4. Finally tap Open in Procreate.

Now, when you open Procreate, you'll see your new [.brush](#) files in a set called "Imported" at the bottom of your brush library. [.Brushset](#) files will appear at the top of the Brush Library. Repeat for the rest of the brushes.
