

TONE SUPPLIES

Thank you for purchasing our products!

INSTRUCTIONS FOR LIGHTROOM

1. Download and unzip your Tone Supplies Lightroom Presets (.xmp files).
2. Open Lightroom CC or Classic.
3. Select Edit (E) from the toolbar.
4. Click on Presets at the top of the edit toolbar.
5. In the top right corner of the presets window click the three dots and select Import Presets.
6. Select your Tone Supplies presets and click import.
7. Your presets can now be found in your presets toolbar.
8. The presets are profile based and do not touch the sliders. The intensity can be adjusted via the amount slider at the top of the edit toolbar.
9. The installed presets will automatically sync to the mobile Lightroom version if you log in to your Adobe account.

LICENSE RULES

Using this product means that you agree with the following usage rules:

You can use our products for both personal and commercial purposes for unlimited time. You are not able to resell, sublicense, embed or redistribute files of our products as they are or their parts.

We can make changes to prices and licensing rules at any moment.
If you have any questions feel free to contact us.
